Springer  
Announcements for the following year

included in some vols. *Announcements, College of Engineering*  
UM Libraries

This book seeks to explore the history of

descriptive geometry in relation to its circulation in the 19th century, which had been favoured by the transfers of the model

of the École Polytechnique to other countries. The book also covers the diffusion of its teaching from higher instruction to technical and secondary teaching. In relation to that, there is analysis of the role of the institution - similar but definitely not identical in the different countries - in the field under consideration. The book contains chapters focused on different countries, areas, and

institutions, written by specialists of the history of the field. Insights on descriptive geometry are provided in the context of the mathematical aspect, the aspect of teaching in particular to non-mathematicians, and the institutions themselves. *United States Air Force Academy* Innovations in E-learning, Instruction Technology, Assessment and Engineering Education

This book includes a set of rigorously reviewed world-class manuscripts addressing and detailing state-of-the-art research projects in the areas of Engineering Education, Instructional Technology, Assessment, and E-learning. The book presents selected papers from the conference proceedings of the International Conference on Engineering Education, Instructional Technology,

Assessment, and E-learning (EIAE 2006). All aspects of the conference were managed on-line.
