First published in 2006
and now with over 10,000

copies sold, this award-winning book on the worldwide history of the chainsaw will captivate all gadget fanciers, even if

they've never had a chainsaw in their hands. [The Ghost in My Brain](#)
Cool Springs Press
The dramatic story of one man's recovery offers new hope to those suffering from concussions and other brain traumas In 1999, Clark Elliott suffered a concussion when his car was rear-ended. Overnight his life changed from that of a rising professor with a research career in artificial intelligence to a humbled man struggling to get through a single day. At times he couldn't

walk across a room, or even name his five children. Doctors told him he would never fully recover. After eight years, the cognitive demands of his job, and of being a single parent, finally became more than he could manage. As a result of one final effort to recover, he crossed paths with two brilliant Chicago-area research-clinicians—one an optometrist emphasizing neurodevelopmental techniques, the other a cognitive psychologist—working on

the leading edge of brain plasticity. Within weeks the ghost of who he had been started to re-emerge. Remarkably, Elliott kept detailed notes throughout his experience, from the moment of impact to the final stages of his recovery, astounding documentation that is the basis of this fascinating book. [The Ghost in My Brain](#) gives hope to the millions who suffer from head injuries each year, and provides a unique and informative window into the world's most

complex computational device: the human brain.

The Book of Iowa Films

John Wiley & Sons

This newly up-to-date edition of the best-selling DIY reference *Small Engines and Outdoor Power Equipment* offers them same great comprehensive and illustrated instruction but with new and improved content for today's motorized equipment.

Independent Sawmill & Woodlot Management

ArgusBooks

This is the first comprehensive history of

films made in or about Iowa. It reflects some twenty years of collecting, lecturing, and talking with some of Iowa's current generation of independent filmmakers. It covers the span from 1918 to 2013 and gives important background information on dozens of high profile films such as the STATE FAIR films of 1933 and 1945, THE BRIDGES OF MADISON COUNTY, FIELD OF DREAMS, and many others. It is designed as a companion for the State Historical Society's blockbuster "Hollywood in

the Heartland" exhibition in Des Moines that is scheduled to run at least through 2016. The book has an interpretive essay covering the entire history as well as paragraph length descriptions of each film. A user-friendly feature is the Index of Films, which makes it easy to locate discussions of individual films. Marty Knepper is a featured commentator on video screens in the "Hollywood in the Heartland" exhibition.

Sustainable Management of Pinus

Radiata Plantations

Cool Springs Press

The saw is one of the most basic tools and tends to be taken very much for granted. Many hours and much effort can be saved, and more accurate work produced, if the user has the knowledge of how his saw works and how to keep it in good condition. In this book Ian Bradley provides detailed guidance on the use and maintenance of all types of saw.

NOTE: NO FURTHER DISCOUNT FOR THIS PRINTED PRODUCT-OVERSTOCK SALE -- Significantly reduced list price Engineers at War describes the role of military engineers, especially the U.S. Army Corps of Engineers, in the Vietnam War. It is a story of the engineers' battle against an elusive and determined enemy in one of the harshest underdeveloped regions of the world. Despite these challenges, engineer soldiers successfully carried out

their combat and construction missions. The building effort in South Vietnam allowed the United States to deploy and operate a modern 500,000-man force in a far-off region. Although the engineers faced huge construction tasks, they were always ready to support the combat troops. They built ports and depots, carved airfields and airstrips out of jungle and mountain plateaus, repaired roads and bridges, and constructed bases. Because of these efforts,

ground combat troops with their supporting engineers were able to fight the enemy from well-established bases. Although most of the construction was temporary, more durable facilities, such as airfields, port and depot complexes, headquarters buildings, communications facilities, and an improved highway system, were intended to serve as economic assets for South Vietnam. This volume covers how the engineers grew from a few advisory detachments

to a force of more than 10 percent of the Army troops serving in South Vietnam. The 35th Engineer Group began arriving in large numbers in June 1965 to begin transforming Cam Ranh Bay into a major port, airfield, and depot complex. Within a few years, the Army engineers had expanded to a command, two brigades, six groups, twenty-eight construction and combat battalions, and many smaller units. Set against the backdrop of over one hundred years of world history, Take a Walk on the Bright Side begins with the story of Eugene Bright's restless, entrepreneurial grandfather, Tom Bright, who uprooted his young family in 1907 to travel west and build a homestead in Saskatchewan. A few years later, he moved on and started over again in Montana, only to flee the United States when a confrontation with a neighbour turned dangerous. Tom was a

colourful character who was married six times - twice to the same woman. Eugene's father, Ray Bright, left home at eighteen to work as a cowboy in Montana before marrying Lottie Sampson and settling down in Ontario to start farming. Although Lottie did not want any children, they had four boys and four girls. The family lived without running water or electricity, but they "ate like kings" according to a hired man. Eugene and his brothers and sisters walked across

neighbouring fields to a one-room schoolhouse run by an outstanding teacher. Eugene worked hard on the farm and at school, and he went on to attend bible college and university, beginning a thirty-one-year career as a teacher, a school principal and a "master" at a teachers' college. Told by the decade and extensively illustrated, *Take a Walk on the Bright Side* is a multi-generational tale brought to life by a keen observer. **Popular Science** Food and Agriculture

 This updated edition of the best-selling Small Engines and Power Equipment is more than a simple engine repair manual. Designed for the beginner with little or no mechanical experience, this book is a graphically appealing, step-by-step

guide that covers all of the most important engine maintenance and repair skills you'll need to keep your equipment running at peak performance. It also shows exactly how to perform mechanical upkeep and repairs on the most common outdoor power implements. With new and improved content for today's motorized equipment, this DIY bible includes engine and mechanical repair plus maintenance instruction for all your outdoor power equipment,

including lawn mowers, snow blowers, chain saws, power washers, generators, leaf blowers, rototillers, wood splitters, lawn edgers, and weed whips. With clear how-to photos and detailed diagrams, you'll see exactly what needs to be done. A comprehensive troubleshooting guide helps you define problems and enact solutions. Among the many skills you'll learn are seasonal tune-ups, changing oil, servicing spark plugs, cleaning filters, replacing muffler, servicing the fuel

tank, overhauling the carburetor, servicing brakes, inspecting flywheels, replacing the fuel pump, and replacing a rewind cord. With *Small Engines and Outdoor Power Equipment 2nd Edition* in your library, you won't need to haul the lawn mower off to the repair center and wait a few weeks just because a filter is plugged or the old gas needs to be replaced. This is a book every home-owning, weekend warrior should have a copy of.
