Storia Dei Musulmani Di Sicilia, Volume 1 - Primary Source Edition
Nabu Press

With new topics and contributions, this updated second edition discusses the history and contemporary presence of Islam in Europe and America. The book debates the relevance and multi-faceted participation of Muslims in the dynamics of Western societies, challenging the changing perception on both sides. Collating over 30 chapters, written by experts from around the world, the volume presents a wide range of perspectives. Case studies from the Muslim presence in the Iberian Peninsula between the Middle Ages and the modern age set off the Handbook, along with an outline of Muslims in America up to the twentieth century. The second part covers concepts around new conditions in terms of consolidating identities, the emergence of new Muslim actors, the appearance of institutions and institutional attitudes, the effects of Islamic presence on the arts and landscapes of the West, and the relational dynamics like ethics and gender. Exploring the influence of Islam, particularly its impact on society, culture and politics, this interdisciplinary volume is a key resource for policymakers, academics and students interested in the history of Islam, religion and the contemporary relationship between Islam and the West.

Storia dei musulmani di Sicilia Dario Flaccovio Editore

This book is a collection of milestone articles of a leading scholar in the study of the Norman Kingdom of Sicily, a crossroads of Latin-Christian, Greek-Byzantine, and Arab-Islamic cultures and one of the most fascinating but also one of the most neglected

kingdoms in the medieval world. Some of his articles were published in influential journals such as English Historical Review, Viator, Mediterranean Historical Review, and Papers of the British School at Rome, while others appeared in hard-to-obtain festschrifts, proceedings of international conferences, and so on. The articles included here, based on analysis of Latin, Greek, and Arabic documents as well as multi-lingual parchments, explore subjects of interest in medieval Mediterranean world such as Norman administrations, multi-cultural courts, Christian-Muslim diplomacy, conquests and migrations, religious tolerance and conflicts, cross-cultural contacts, and so forth. Some of them dig deep into curious specific topics, while others settle disputes among scholars and correct our antiquated interpretations. His attention to the administrative structure of the kingdom of Sicily, whose bureaucracy was staffed by Greeks, Muslims and Latins, has been a particularly important part of his work, where he has engaged in major debates with other scholars in the field.

Over the past decade, scholars have vigorously reconsidered the history of Orientalism, and though Edward Said's hugely influential work remains a touchstone of the discussion, Karla Mallette notes, it can no longer be taken as the final word on Western perceptions of the Islamic East. The French and British Orientalisms that Said studied in particular were shaped by the French and British colonial projects in Muslim regions; nations that did not have such investments in the Middle East generated significantly different perceptions of Islamic and Arabic culture. European Modernity and the Arab Mediterranean examines

Orientalist philological scholarship of southern Europe produced between the mid-nineteenth and mid-twentieth century. In Italy, Spain, and Malta, Mallette argues, a regional history of Arab occupation during the Middle Ages gave scholars a focus different from that of their northern European colleagues; in studying the Arab world, they were not so much looking on a distant and radically different history as seeking to reconstruct the past of their own nations. She demonstrates that in specific instances, Orientalists wrote their nations' Arab history as the origin of modern national identity, depicting Islamic thought not as exterior to European modernity but rather as formative of and central to it. Joining comparative insights to the analytic strategies and historical genius of philology, Mallette ranges from the complex manuscript history of the Thousand and One Nights to the invention of the Maltese language and Spanish scholarship on Dante and Islam. Throughout, she reveals the profound influences Arab and Islamic traditions have had on the development of modern European culture. *European Modernity and the Arab Mediterranean* is an engaging study that sheds new light on the history of Orientalism, the future of philology, and the postcolonial Middle Ages.

Palermo city guide Boydell & Brewer Ltd

When Muslim invaders conquered Sicily in the ninth century, they took control of a weakened Greek state in cultural decadence. When, two centuries later, the Normans seized control of the island, they found a Muslim state just entering its cultural prime. Rather than replace the practices and idioms of the vanquished people with their own, the Normans in Sicily adopted and adapted the Greco-Arabic culture that had developed on the island. Yet less than a hundred years later, the cultural and linguistic mix had been reduced, a Romance tradition had come to dominate, and Sicilian poets composed the first body of love lyrics in an Italianate vernacular. Karla Mallette has written the first literary history of the Kingdom of Sicily in the twelfth and thirteenth centuries. Where other scholars have separated out the island's literature along linguistic grounds, Mallette surveys the literary production in Arabic, Latin, Greek, and Romance dialects, in addition to the architectural remains, numismatic inscriptions, and diplomatic records, to argue for a multilingual, multicultural, and coherent literary tradition. Drawing on postcolonial theory to consider institutional and intellectual power, the exchange of knowledge across cultural boundaries, and the containment and celebration of the other that accompanies cultural transition, the book includes an extensive selection of poems and documents

translated from the Arabic, Latin, Old French, and Italian. The Kingdom of Sicily, 1100-1250 opens up new venues for understanding the complexity of a place and culture at the crossroads of East and West, Islam and Christianity, tradition and innovation.

Palermo has about 3,000 years of history and its roots predate the Punic colonisation of the 8th century BC. Because of its favourable geographical location and its fertile land, the city was preyed upon by a variety of peoples and was conquered, among others, by the Muslims, the Normans, the Aragonese and the Spaniards. From the 16th century onwards a number of hamlets and new agglomerations started to spring up in the country environs. All these have now been absorbed by urbanisation. The countryside was also characterised by the social phenomenon of *villeggiatura*, which considerably enhanced urbanisation of the countryside from the 17th century to the 1850s. This has given the city and its environs a unique image, outstanding for its blend of different architectural styles and historical strata. This guide, based on a number of historical itineraries, is intended to enable the visitor to discover Palermo and its surroundings through a detailed account of the countless churches, the numerous palazzi and the various street patterns which all testify to the city's development throughout the centuries.

The Kingdom of Sicily, 1100-1250 BRILL

This book traces the dynamic advances in textile technology and changes in the structure of demand that accompanied the rise, in the late Middle Ages, of an Italian industry geared to mass production of cotton fabrics. The Italian manufacture, based on borrowed techniques and imitations of Islamic cloth, was the earliest large-scale cotton industry in western Europe. It thus marked a pivotal stage in the transmission of the knowledge and use of this textile fibre from the Mediterranean basin to northern Europe. The success of the Italians in creating new markets for a wide variety of products that included pure cotton, as well as mixed fabrics combining cotton with linen, hemp, wool and silk, permanently altered the patterns of taste and consumption in European society. Cotton, in various stages of proceeding, was at the heart of a complex network of communications that linked the north Italian towns to the source of raw materials and to international markets for finished goods. In the developing urban

economy of northern Italy, cotton played a role comparable in magnitude to that of wool and shared with the latter certain basic features of early capitalistic organization.
