Edexcel Chemistry Oxford University Press - Children

An investigative approach to Cambridge IGCSE Geography, written in partnership with the Geographical Association. Encourage students to make links between case studies and their own local contexts as well as exploring the core themes and skills of the 0460 syllabus in the context of global case studies and processes. Prepare for exam success with full coverage of the core themes of Paper 1 (Population and Settlement, The Natural Environment, Economic Development and the Use of Resources) as well as the geographical and fieldwork skills elements of Papers 2, 3 and 4. Help students focus on achieving the best grades with excellent exam support for each Paper, with exam-style questions, answers at different levels and accompanying comments. Be confident in the content and approach - this resource is written by highly experienced Geography teachers, consulted edited by a CIE Principal Examiner, and produced in partnership with the UK Geographical Association - the home of best practice in Geography teaching.

Complete Additional Mathematics for Cambridge IGCSE® & O Level Oxford University Press, USA In Bathing in the Roman World, Fikret Yegul examines the social and cultural aspects of one of the key Roman institutions. Guiding the reader through the customs, rituals, and activities associated with public bathing, Yegul traces the origins and development of baths and bathing customs and analyzes the sophisticated technology and architecture of bath complexes, which were among the most imposing of all Roman building types. He also examines the reception of bathing throughout the classical world and the transformation of bathing culture across three continents in Byzantine and Christian societies. The volume concludes with an epilogue on bathing and cleanliness in post-classical Europe, revealing the changes and continuities in culture that have made public bathing a viable phenomenon even in the modern era. Richly illustrated and written in an accessible manner, this book is geared to undergraduates for use in courses on Roman architecture, archaeology, civilization, and social and cultural history.

Economics Hodder Murray

This highly respected and valued textbook has been the book of choice for Cambridge IGCSE students since its publication. This new edition, complete with CD-ROM, continues to provide comprehensive, up-to-date coverage of the core and extended curriculum topics specified in the IGCSE Chemistry syllabus. The book is supported by a CD-ROM containing extensive revision and exam practice questions, background information and reference material.

Cambridge O Level Principles of Accounts Hodder Murray

This comprehensive book on transfusion practices and immunohematology offers concise, thorough guidelines on the best ways to screen donors, store blood components, ensure safety, anticipate the potentially adverse affects of blood transfusion, and more. It begins with the basics of genetics and immunology, and then progresses to the technical aspects of blood banking and transfusion. Chapters are divided into sections on: Basic Science Review; Blood Group Serology; Donation, Preparation, and Storage; Pretransfusion Testing; Transfusion Therapy; Clinical Considerations; and Safety, Quality Assurance, and Data Management. Developed specifically for medical technologists, blood bank specialists, and residents, the new edition conforms to the most current standards of the American Association of Blood Banks (AABB). Expert Opinion essays, written by well-known, frequently published experts, discuss interesting topics of research or new advances in the field. Important terms are defined in the margins of the pages on which they appear, enabling readers to easily check the meaning of an unfamiliar term where it appears in context. Margin notes highlight important concepts and points, remind readers of previously discussed topics, offer an alternative perspective, or refer readers to other sources for further information. Material conforms to the most recent AABB standards for the most accurate, up-to-date information on immunohematology. Advanced concepts, beyond what is required for entry-level practice, are set apart from the rest of the text so readers can easily differentiate between basic and advanced information. A new chapter on Hematopoietic Stem Cells and Cellular Therapy (chapter 19) provides cutting-edge coverage of cellular therapy and its relevance to blood-banking. New content has been added on molecular genetics, component therapy, and International Society of Blood Transfusion (ISBT) nomenclature, as well as the latest information on HIV, hepatitis, quality assurance, and information systems. Coverage of new technologies, such as nucleic acid technology and gel technology, keeps readers current with advances in the field.

Biology for IGCSE Cambridge University Press

This concise guide provides the content needed for the Chemistry IB diploma at both Standard and Higher Level. It follows the structure of the IB Programme exactly and includes all the options. Each topic is presented on its own page for clarity, Higher Level material is clearly indicated, and there are plenty of practice questions. The text is written with an awareness that English might not be the reader's first language
