This book advances a new understanding of producing change in psychotherapy. It proposes the concept of interaction structure, repeated mutually influencing interactions between therapist and patient that are a fundamental aspect of therapeutic action. Interaction structures allow consideration of both the intrapsychic and the interpersonal by recognizing the intrapsychic as an important basis for what occurs in clinical interaction. This book clarifies the process of therapy, and is a guide to

the practice of psychoanalytic psychotherapy. Using transcripts of clinical sessions, Dr. Enrico E. Jones offers an unusual window on the interactive structures that actually occur between patient and therapist and identifies specific interventions that successfully promote change.

2015 Reprint of 1954 Edition. Full facsimile of the original edition. Not reproduced with Optical Recognition Software. Carl Rogers was among the founders of the humanistic approach (or client-centered approach) to psychology. The person-centered approach, his own unique

approach to understanding personality and human relationships, found wide application in various domains such as psychotherapy and counseling (client-centered therapy), education (student-centered learning), organizations, and other group settings. These two lectures, first delivered in 1954, comprise the core of his teachings. In 1961 his shorter works would be collected and published as "On Becoming a Person." Contents: Some Hypotheses Regarding the Facilitation of Personal Growth What It Means to Become a Person [Like Mother Like Son Oh Shit](#) PublicAffairs This book gathers selected papers presented at the 2nd International Conference on Computing, Communications and Data

Engineering, held at Sri Padmavati Mahila Visvavidyalayam, Tirupati, India from 1 to 2 Feb 2019. Chiefly discussing major issues and challenges in data engineering systems and computer communications, the topics covered include wireless systems and IoT, machine learning, optimization, control, statistics, and social computing.

This "inside account captures the energy—and the madness—of the software giant's race to develop a critical new program. . . . Gripping" (Fortune Magazine). Showstopper is the dramatic, inside story of the creation of Windows NT, told by Wall Street Journal reporter G. Pascal Zachary. Driven by the legendary David Cutler, a picked band of software engineers sacrifices almost everything in their lives to build a new, stable, operating system aimed at giving Microsoft a platform for growth through the next decade of development in the computing business. Comparable in many ways to the Pulitzer Prize-winning book The

Soul of a New Machine by Tracy Kidder, Showstopper gets deep inside the process of software development, the lives and motivations of coders and the pressure to succeed coupled with the drive for originality and perfection that can pull a diverse team together to create a program consisting of many hundreds of thousands of lines of code.

The era of online video has arrived—now make it work for your business In the last year, the world of online video exploded. Hollywood got into the game, professional actors and writers joined in, and independent producers looked to find their niche. Now, companies are wide awake to the opportunities for product and brand promotion as well as customer engagement. So how do you want to fit into the new online video universe? The must-have guide, Get Seen by Steve Garfield, the "Paul Revere of video blogging," offers a quick and complete toolkit to get you up to speed on the latest that online video and related

media have to offer. Examines success stories of how companies have used online video Presents a series of plans and tools that businesses can follow as they expand onto the social web Provides clear step by step directions on how to record, edit, and export videos, where to post them, how to build a community around their content, and what to do to increase views by making it go viral If you're ready to take full advantage of online video's many benefits, Get Seen is the one resource you need. Mike Hoffman Remastered Masterworks Collection John Wiley & Sons Around the globe, poverty has held too many people in its grip for too long. While microfinance - small loans to impoverished individuals - initially attracted attention in the press, it didn't achieve the scale, scope, and profitability necessary to substantially combat poverty. All that changed with Vikram Akula's creation of SKS Microfinance. In this highly personal narrative, A Fistful of Rice, Akula reveals how he pieced together the best of both philanthropy and (to his surprise) capitalism to help millions of India's

poor transition from paupers to customers to business owners. As thoughtful as Barack Obama's personal journey in *Dreams from My Father*, as harrowing as Paul Farmer's battle against infectious disease in *Mountains Beyond Mountains*, and as gripping as Greg Mortensen's fight for education in *Three Cups of Tea*, Akula's story shows how traditional business principles can be brought to bear on global problems in new ways. *A Fistful of Rice* offers not only inspiration but also lessons for anyone seeking to transform tenacity, creativity, and innovation into potent tools for fighting even the most seemingly intractable human burdens.

Environmental rights are a category of human rights necessarily central to both democracy and effective earth system governance (any environmental-ecological-sustainable democracy). For any democracy to remain democratic, some aspects must be beyond democracy and must not be allowed to be subjected to any ordinary

democratic collective choice processes shy of consensus. Real, established rights constitute a necessary boundary of legitimate everyday democratic practice. We analyze how human rights are made democratically and, in particular, how they can be made with respect to matters environmental, especially matters that have import beyond the confines of the modern nation state.

This open access monograph argues established democratic norms for freedom of expression should be implemented on the internet. Moderating policies of tech companies

as Facebook, Twitter and Google have resulted in posts being removed on an industrial scale. While this moderation is often encouraged by governments - on the pretext that terrorism, bullying, pornography, "hate speech" and "fake news" will slowly disappear from the internet - it enables tech companies to censor our society. It is the social media companies who define what is blacklisted in their community standards. And given the dominance of social media in our information society, we run the risk of outsourcing the definition of our principles for discussion in the public domain to private companies. Instead of leaving it to social media companies only to take action, the authors argue democratic institutions should take an active role in moderating criminal content on the internet. To make this possible, tech companies should be analyzed whether they are approaching a monopoly. Antitrust legislation should be applied to bring those monopolies within democratic governmental oversight. Despite being in different stages in their lives, Anne Mette is in the

startup phase of her research career, while Frederik is one of the most prolific philosophers in Denmark, the authors found each other in their concern about Free Speech on the internet. The book was originally published in Danish as *Dit opslag er blevet fjernet - techgiganter & ytringsfrihed*. Praise for 'Your Post has been Removed' "From my perspective both as a politician and as private book collector, this is the most important non-fiction book of the 21st Century. It should be disseminated to all European citizens. The learnings of this book and the use we make of them today are crucial for every man, woman and child on earth. Now and in the future." Jens Rohde, member of the European Parliament for the Alliance of Liberals and Democrats for Europe "This timely book compellingly presents an impressive array of information and analysis about the urgent threats the tech giants pose to the robust freedom of speech and access to information that are essential for individual liberty and democratic self-government. It constructively explores potential strategies for

restoring individual control over information flows to and about us. Policymakers worldwide should take heed!" Nadine Strossen, Professor, New York Law School. Author, *HATE: Why We Should Resist It with Free Speech, Not Censorship*. *The Idea Factory* Cambridge University Press From cell phones to Web portals, advances in information and communications technology have thrust society into an information age that is far-reaching, fast-moving, increasingly complex, and yet essential to modern life. Now, renowned scholar and author David Luenberger has produced *Information Science*, a text that distills and explains the most important concepts and insights at the core of this ongoing revolution. The book represents the material used in a widely acclaimed course offered at Stanford University. Drawing concepts from each of the constituent subfields that collectively comprise information science, Luenberger builds his book around the five "E's" of information: Entropy, Economics, Encryption, Extraction, and Emission. Each area

directly impacts modern information products, services, and technology--everything from word processors to digital cash, database systems to decision making, marketing strategy to spread spectrum communication. To study these principles is to learn how English text, music, and pictures can be compressed, how it is possible to construct a digital signature that cannot simply be copied, how beautiful photographs can be sent from distant planets with a tiny battery, how communication networks expand, and how producers of information products can make a profit under difficult market conditions. The book contains vivid examples, illustrations, exercises, and points of historic interest, all of which bring to life the analytic methods presented: Presents a unified approach to the field of information science Emphasizes basic principles Includes a wide range of examples and applications Helps students develop important new skills Suggests exercises with solutions in an instructor's manual *Applied Marketing* John

 There are not many books about how people get younger. It doesn't happen very often. But Ageing with Smartphones in Ireland documents a radical change in the experience of ageing. Based on two ethnographies, one within Dublin and the other from the Dublin region, the book shows that people, rather than seeing themselves as old, focus on crafting a new life in retirement. Our research participants apply new ideals of sustainability both to themselves and to their environment. They go for long walks, play bridge, do yoga and keep as healthy as possible. As

part of Ireland's mainstream middle class, they may have more time than the young to embrace green ideals and more money to move to energy-efficient homes, throw out household detritus and protect their environment. The smartphone has become integral to this new trajectory. For some it is an intimidating burden linked to being on the wrong side of a new digital divide. But for most, however, it has brought back the extended family and old friends, and helped resolve intergenerational conflicts though facilitating new forms of grandparenting. It has also become central to health issues, whether by Googling information or looking after frail parents. The smartphone enables this sense of getting younger as people download the music of their youth and develop new interests. This is a book about acknowledging late middle age in contemporary Ireland. How do older people in Ireland experience life today? Praise for Ageing with Smartphones in Ireland 'An innovative and thorough description and analysis of how one small

 The courageous acts of whistleblowing that inspired the world over the past few years have changed our perception of surveillance and control in today's information society. But what are the wider effects of whistleblowing as an act of dissent on politics, society, and the arts? How does it contribute to new courses of action, digital tools, and contents? This urgent intervention based on the work of Berlin's Disruption Network Lab examines this growing phenomenon, offering interdisciplinary pathways to empower the public by investigating whistleblowing as a developing political practice that has the

ability to provoke change from within.

The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is

subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

The New York Times and Wall Street Journal bestselling book on building powerful, effective teams! "An amazing book that bucks the old paradigm that maverick leaders and self-made entrepreneurs set the bar. It will forever

change the way you look at leadership." —Marshall Goldsmith, author of The Wall Street Journal #1 business bestseller *What Got You Here Won't Get You There* "In *Never Fly Solo*, Rob 'Waldo' Waldman shares potent, personal leadership lessons on what it takes to access the power of your wingmen. If you want a former fighter pilot with 65 combat missions as your wingman and if business success is your target, take flight with Waldo's book and earn your wings. You'll never fly solo again." —Jeffrey Gitomer, bestselling author of *The Little Red Book of Selling* "If you are serious about building trusting relationships and launching your business and life to new heights, then invest in yourself and buy this book." —Keith Ferrazzi, author of the New York Times #1 bestseller *Who's Got Your Back* "Authentic and inspirational, *Never Fly Solo* is a winning formula for successful leadership that everyone in business should read." —Howard Putnam, former CEO of Southwest Airlines and author of *The Winds of Turbulence* "Waldo does a superb job of applying to the business world the lessons he learned in his

military career. His excellent use of vignettes shows how standards and values are applicable to leading an honorable life.” —General Ron Fogleman, U.S. Air Force Retired, former Chief of Staff, USAF “Waldo the Wingman knows the value of relationships and how to build real partnerships that benefit everyone involved.” —Mark Sanborn, speaker and bestselling author of *The Fred Factor* and *You Don’t Need a Title to Be a Leader* Rob “Waldo” Waldman understands one thing better than most businesspeople: You can’t reach your highest potential alone. You need wingmen—trusted partners—who can help you overcome obstacles, adapt to change, and prepare for success. A decorated former combat F-16 fighter pilot and now

a successful entrepreneur, Waldman lives his life by this rule. Whether you’re a senior executive, mid-level manager, or new hire fresh out of college, your success depends on the mutual support of trusted associates. In *Never Fly Solo*, Waldo helps you maximize your relationships to reach your greatest potential. You’ll learn how to: Commit to the core wingman values of integrity, accountability, service, and excellence Transform your relationships with colleagues into interdependent partnerships for success Take courageous action and ask for help when adversity strikes Communicate effectively in high-stress situations Connect with your coworkers and customers on a deeper level Through

compelling, real-world stories, Waldo relates how his Air Force wingmen helped him overcome challenges and become successful by teaching him lessons that work in an office as well as in a cockpit. Like the world of aerial combat, today’s high-stakes business world operates faster than the speed of sound. Teamwork and trust are critical for thwarting the missiles of fear, change, and risk that too often send even the most seasoned professional into a downward spiral. You can’t dodge these missiles alone. *Never Fly Solo* is your flight plan for taking positive action that leads to greater success. Find out more at www.neverflysolo.com. The author will donate a portion of the book’s proceeds to veterans charities.
