 Now in its second edition, *The Routledge Dictionary of Cultural References in Modern French* reveals the hidden cultural dimension of contemporary French, as used in the press, going beyond the limited and purely lexical approach of traditional bilingual dictionaries. Even foreign learners of French who possess a good level of French often have difficulty in fully understanding

French articles, not because of any linguistic shortcomings on their part but because of their inadequate knowledge of the cultural references. This cultural dictionary of French provides the reader with clear and concise explanations of the crucial cultural dimension behind the most frequently used words and phrases found in the contemporary French press. This vital background information, gathered here in this innovative and entertaining dictionary, will allow readers to go beyond a superficial understanding of the French press and the French language in general to see the hidden yet implied cultural significance

that is so transparent to the native speaker. This fully revised second edition includes: a broad range of cultural references from the historical and literary to the popular and classical; an enhanced analysis of punning mechanisms used in the press; over 3,000 cultural references explained with updated examples; a three-level indicator of frequency; new and expanded chapters on the French of Quebec, institutional and academic references, and English borrowings in the areas of IT and medical science; over 600 online questions to test knowledge before and after reading. The Routledge Dictionary of Cultural References in Modern French is the ideal reference for all

undergraduate and postgraduate students of French seeking to enhance their understanding of the French language. It will also be of interest to teachers, translators and Francophiles alike. First published in 1982, *The Truth of Poetry* attempts to answer a

seemingly simple question: What kind of truth does poetry offer in modern times?

Michael Hamburger's answer to this question ranges over the last century of European and American poetry, and the result is a phenomenology of modern poetry rather than a history of appreciations of individual poets.

Stressing the tensions and conflicts in and behind the work of every major poet of the period, he considers the many different possibilities open to poets since Baudelaire. This expansive work of analysis will be of interest to students of English literature, poetry enthusiasts and literary historians.

*This Critical Perspectives on Language Teaching Materials* brings together a collection of critical voices on the subject of language teaching materials for use in English, French, Spanish, German and Content and Language Integrated Learning (CLIL) classrooms. It is firmly located within the 'critical turn' in Applied Linguistics and seeks to build on the growing body of work in this vein. Collectively the authors take it as axiomatic that the politics of representation and identity, and issues of ideology and commercialism cannot be neglected in any serious study of language teaching materials. Rather, it

sees these issues as central. The book draws on research carried out in the UK, Spain, North America and Brazil, and is aimed at language teachers, teacher educators, students, researchers, materials writers and those working in the materials publishing industry.
