"The purpose of this study is to evaluate the condition of streams and riparian zones in a watershed after a substantial amount of time has passed since logging. The Bowron River watershed was chosen based on past harvesting challenges similar to those associated with the mountain pine beetle outbreak and a post-logging recovery time of 20-30 years. By evaluating a watershed in an advanced stage of recovery, it is possible to identify impacts to the riparian system and use the information to consider whether adverse effects will be manifested as a result of compounding forest activities and hydrological response under present forest management practices. The evaluation also provides insight into which components recover first."-- Document.

This edited book explores the use of technology to enable us to visualize the life sciences in a more meaningful and engaging way. It will enable those interested in visualization techniques to gain a better understanding of the applications that can be used in visualization, imaging and analysis, education, engagement and training. The reader will also be able to learn about the use of visualization techniques and technologies for the historical and forensic settings. The reader will be able to explore the utilization of technologies from a number of fields to enable an engaging and meaningful visual representation of the biomedical sciences. We have something for a diverse and inclusive audience ranging from healthcare, patient education, animal health and disease and pedagogies around the use of technologies in these related fields. The first four chapters cover healthcare and detail how technology can be used to illustrate emergency surgical access to the airway, pressure sores, robotic surgery in partial nephrectomy, and respiratory viruses. The last six chapters in the education section cover augmented reality and learning neuroanatomy, historical artefacts, virtual reality in canine anatomy, holograms to educate children in cardiothoracic anatomy, 3D models of cetaceans, and the impact of the pandemic on digital anatomical educational resources.

What Have I Gotten Myself Into?: A Questions and Answers Guide for Parents - about Children's Questions... Kind Of... Carson-Dellosa Publishing

Awakening in a haze of confusion one night a few weeks before the birth of his first son, Mark leaned over to his wife and said, "I'm not quite sure it's a good idea that we are having a kid, are you?" It was then his mind began to spin uncontrollably about all of the things he didn't know how to explain... and, if he couldn't explain things as basic as wind, television and gasoline pump shut-off valves, how in the hell was he going to be able to answer questions in a way that would not irreversibly damage a moldable mind during critical childhood development years. He immediately began to formulate a plan... just like when starting a new project at work. It was a plan to establish strategic guardrails to follow based on the complexity of the question(s) asked by his children. In his writing, Mark gives some tongue & cheek "advice" to others finding themselves in a similar quandary while sharing some personal anecdotes lending to the baseless conclusions he has put down on paper to share with whomever cares to take a read and hopefully enjoy some laughs too. Mark is a N. Little Rock, AR native who has spent the past 20+ years navigating a career in marketing and management consulting working with some of the world's largest companies. During his career he has relocated to multiple cities and traveled domestically and internationally quite extensively. As a pastime during the seemingly never-ending work travel, Mark began to revisit a passion from younger years and started putting his thoughts and stories from childhood on paper. Always enjoying pictures in books, he began scribbling down sketches to assist in the storytelling... He quickly realized he was no illustrator, so he recruited his brother-in-law (a very talented graphic designer and artist) to help in the effort. Mark currently lives in Charlotte, NC with his two children, Grant (8) & Nolan (5) and his fiancé Sara. In addition to experiencing all that comes with his boys growing up, his favorite pastime is to laugh & learn while enjoying the company of both new people and lifelong friends.

A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are

chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

Heart of Darkness Ginn

"A novelistic mosaic that simultaneously reads like a thriller and like a strange, dreamlike excursion into the subconscious." —The New York Times Years ago, when *House of Leaves* was first being passed around, it was nothing more than a badly bundled heap of paper, parts of which would occasionally surface on the Internet. No one could have anticipated the small but devoted following this terrifying story would soon command. Starting with an odd assortment of marginalized youth -- musicians, tattoo artists, programmers, strippers, environmentalists, and adrenaline junkies -- the book eventually made its way into the hands of older generations, who not only found themselves in those strangely arranged pages but also discovered a way back into the lives of their estranged children. Now this astonishing novel is made available in book form, complete with the original colored words, vertical footnotes, and second and third appendices. The story remains unchanged, focusing on a young family that moves into a small home on Ash Tree Lane where they discover something is terribly wrong: their house is bigger on the inside than it is on the outside. Of course, neither Pulitzer Prize-winning photojournalist Will Navidson nor his companion Karen Green was prepared to face the consequences of that impossibility, until the

day their two little children wandered off and their voices eerily began to return another story -- of creature darkness, of an ever-growing abyss behind a closet door, and of that unholy growl which soon enough would tear through their walls and consume all their dreams.
