Handbook of Research for Educational Communications and Technology Springer Science & Business Media

In this the 2nd book of the E series, characters and events brought to the reader in *Troubled Destiny* draw Elaine and Ryan deeper into a quagmire neither of them expected. Their lives after all are filled with work and duties and a newfound love still struggling to take hold and flourish. Over the next 70 days however, bliss turns to suspicion, tragedy and fear from Istanbul Turkey to the plains of Troy and finally to the bay-city of Izmir, nestled beside the waters of the Aegean. It is the summer of 1971, an idyllic time for those fortunate enough to grasp it. It is also a period on the edge of turmoil soon to envelope the world when terrorism takes hold with hijackings, suicide bombers, assassinations and the mass killing of civilians as a means to an end. The difference between now and 1971 is the absence of rules; those guideposts that were followed for much of the cold war in an honorable game of spy and counterspy. The rules no longer apply in this age of terror, but even then they were beginning to slip, making the idyllic susceptible to the hazards of circumstance and fate. Follow the journey through this maze of intrigue as it ends with one more mystery to solve in the last of this trilogy.

The year was 1966, and Susie, a senior in high school, found herself with a new label: unwed mother. It was an era of "silent surrender," and Susie was forced to leave home and move in with her aunt for three months of seclusion until her baby was born and could be put up for adoption. She somehow found the inner strength to survive the solitude, shame, physical changes, and the incredible loss of giving up her baby. Susie was told to forget about her baby and go on with life, but that was impossible. While other birthmothers may have turned to alcohol or drugs to deal with their loss, Susie transformed her deep longing into art. Her most remarkable works were annual paintings of the child she privately named "Mary." For more than two decades, Mary grew to adulthood on canvas. And twenty-seven years after giving birth, Susie would finally meet Mary—whose given name was Jeanne—in person. The resemblance between the woman before her and the woman in the paintings was remarkable, and there was a connection of epic proportion

between mother and child. The adoption experience had come full circle. This inspirational memoir sheds new light on the shadowy era of closed adoption and shares how one woman translated her pain and guilt into art.

This book offers a new contribution to the debate concerning the acquisition of the syntax-discourse interface. It provides evidence that children acquiring European Portuguese have a very early ability to spontaneously produce VP ellipsis as answers to yes-no questions. It is also argued that the distribution of VP ellipsis in European Portuguese (including its co-existence with Null Complement Anaphora) supports the hypothesis that the identification condition on ellipsis is derivable from some innate knowledge of the syntax-discourse interface. Answers to yes-no questions also provide evidence concerning children's interpretation of questions containing a cleft or the operator só 'only'. The analysis of spontaneous production is complemented by a comprehension experiment, showing that children have two problems in the interpretation of these questions: (i) they do not understand that the cleft and só introduce a presupposition and (ii) they start with a default focus assignment strategy and may not access other focus interpretations.
