For millennia, war was viewed as a supreme test. In the period 1750-1850 war became much more than a test: it became a secular revelation. This new understanding of war as revelation completely transformed Western war culture, revolutionizing politics, the personal experience of war, the status of common soldiers, and the tenets of military theory.

This analysis of the distinctive fighting concepts of the 1st Cavalry Division (Airmobile), as demonstrated in Vietnam combat, also considers the airmobile concept's relevance in the current Army and its potential in future military conflicts

In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

Julián Romero, Sancho Dávila, Cristóbal de Mondragón, and Francisco de Valdés were prominent Spanish military commanders during the first decade of the Revolt in the Low Countries (1567-1577). Occupying key positions in this conflict, they featured as central characters in various war narratives and episodal descriptions of the events they were involved in, ranging

from chronicles, poems, theatre plays, engravings, and songs to news pamphlets. To this day, they still figure as protagonists of historical novels: brave heroes in some, cruel oppressors in others. Yet personal, first-hand accounts also exist. Archival research into the letters written by these commanders now makes it possible to include their perspectives and the way they describe their own experiences. Looking through the eyes of four Spanish commanders, Protagonists of War provides the reader with an alternative reading of the Revolt, contrasting the subjective experiences of these protagonists with fictionalised perceptions.

Dagomar Degroot offers the first detailed analysis of how a society thrived amid the Little Ice Age, a period of climatic cooling that reached its chilliest point between the sixteenth and eighteenth centuries. The precocious economy, unusual environment, and dynamic intellectual culture of the Dutch Republic in its seventeenth-century Golden Age allowed it to thrive as neighboring societies unraveled in the face of extremes in temperature and precipitation. By tracing the occasionally counterintuitive manifestations of climate change from global to local scales, Degroot finds that the Little Ice Age presented not only challenges for Dutch citizens but also opportunities that they aggressively exploited in conducting commerce, waging war, and creating culture. The overall success of their Republic in coping with climate change offers lessons that we would be wise to heed today, as we confront the growing crisis of global warming.

The best-selling comprehensive history of the world, from the perspective of struggling peoples throughout the ages—now with new material and a foreword by Howard Zinn From the earliest human societies to the Holy Roman Empire, from the Middle Ages to the Enlightenment, from the Industrial Revolution to the end of the twentieth century, Chris Harman provides a brilliant and comprehensive history of the human race. Eschewing the standard accounts of “Great Men,” of dates and kings, Harman offers a groundbreaking counter-history, a breathtaking sweep across the centuries in the tradition of “history from below.” In a fiery narrative, he shows how ordinary men and women were involved in creating and changing society and how conflict between classes was often at the core of these developments. While many scholars see the victory of capitalism as now safely secured, Harman explains the rise and fall of societies and civilizations throughout the ages and demonstrates that history moves ever onward in every age. This magisterial study is essential reading for anyone interested in how society has changed and developed and the possibilities for further radical progress. “I have had many people ask me if there is a book which does for world history what my book *A People’s History of the United States* does for this country. I always responded that I know of only one book that accomplishes this extremely difficult task, and that is Chris Harman’s *A People’s History of the World*.” —Howard Zinn

Includes over 30 maps and Illustrations The Staff Ride Handbook for the Vicksburg Campaign, December 1862-July 1863, provides a systematic approach to the analysis of this key Civil War campaign. Part I describes the organization of the Union and Confederate Armies, detailing their

weapons, tactics, and logistical, engineer, communications, and medical support. It also includes a description of the U.S. Navy elements that featured so prominently in the campaign. Part II consists of a campaign overview that establishes the context for the individual actions to be studied in the field. Part III consists of a suggested itinerary of sites to visit in order to obtain a concrete view of the campaign in its several phases. For each site, or “stand,” there is a set of travel directions, a discussion of the action that occurred there, and vignettes by participants in the campaign that further explain the action and which also allow the student to sense the human “face of battle.” Part IV provides practical information on conducting a Staff Ride in the Vicksburg area, including sources of assistance and logistical considerations. Appendix A outlines the order of battle for the significant actions in the campaign. Appendix B provides biographical sketches of key participants. Appendix C provides an overview of Medal of Honor conferral in the campaign. An annotated bibliography suggests sources for preliminary study.

Discussing the key issues of modern warfare, Hew Strachan’s work examines the theory and practice of land warfare in Europe since 1700. Looking at warfare in the context of social and political change, Dr. Strachan interprets his subject matter as widely as possible, and *European Armies and the Conduct of War* considers the roles of air power and the impact of the United States on European military developments. Through the eyes of the major theorists of the day, *European Armies* examines: * how the social and political influences which shape armies, also mould the attitude of those armies to warfare * the story of technical innovation * the mounting pace of industrialization and its impact of warfare. Recent military history has tended to focus on the relationship between armies and society and there has been much original research on the subject of the conduct of war. This book brings these approaches together, providing information and insight vital to the study of this fascinating era.

History of the Royal Regiment of Artillery Leuven University Press

The Regiment, which forms the subject of the following memoir, is one of the seventeen corps, now in the British army, which derive their origin from the commotions in England during the first year of the reign of King James II. The origin of these commotions may be traced to the pernicious councils adopted by King Charles I., which were followed by a flame of puritanical zeal and of democratical fury and outrage in the country, which deprived the monarch of life, and forced the royal family to reside for several years in exile on the continent, where King Charles II. and his brother, James Duke of York, imbibed the doctrines of the Church of Rome. After the Restoration, in 1660, the King concealed his religion from his Protestant subjects; but the Duke of York openly avowed the tenets of the Roman Catholic Church, which rendered him exceedingly unpopular. King Charles II. having no legitimate issue, his eldest illegitimate son, James Duke of Monmouth, an officer of some merit, who had espoused the Protestant cause with great warmth, and had become very popular, aspired to the throne. In a few months after the accession of James II., this nobleman arrived from Holland (11th June, 1685) with a band of armed followers, and erecting his standard in the west of England, called upon the people to aid him in gaining the sovereign power. Although a deep feeling of anxiety was general in the kingdom at this period, yet the King had declared his determination to support the Protestant religion, as by law established, and his designs against the constitution had not been manifested; hence loyalty to the sovereign, a principle so genial to the innate feelings of the British people, prevailed over every other consideration. A number of Mendip miners and other disaffected persons joined the Duke of Monmouth; but men of all ranks arrayed themselves under the banners of royalty. To officers and soldiers imbued with a laudable esprit de corps, the particulars relating to the origin and services of their regiment are of intense interest, and the circumstances which gave rise to the formation of their corps are of themselves an era. To encourage such feelings is one of the objects of the present undertaking, and, although the general reader may think the narrative tedious, the officers and men of the Royal Irish Dragoon

Guards will feel gratified at learning by whom, and where, each troop, of which their regiment was originally composed, was raised. This information has been procured from public documents, in which it is recorded that, in the midst of the hostile preparations which the Duke of Monmouth's rebellion occasioned in every part of the kingdom, a troop of horse was raised by James Earl of Arran, eldest son of William Duke of Hamilton, a nobleman distinguished alike for loyalty and attachment to the Protestant religion; a second troop was raised, in the vicinity of London, by Captain John Parker, Lieutenant of the Horse Grenadier Guards attached to the King's Own troop of Life Guards (now First Regiment of Life Guards); a third at Lichfield, by William Baggott, Esq.; a fourth at Grantham, by Thomas Harrington, Esq.; a fifth at Durham, by John Fetherstonhalgh, Esq.; and the sixth at Morpeth, by William Ogle, Esq.; and that, after the decisive battle of Sedgemoor had destroyed the hopes of the invader, these six troops were ordered to march to the south of England, and were incorporated into a regiment of Cuirassiers, which is now the Fourth or Royal Irish Regiment of Dragoon Guards. The Colonelcy was conferred on the Earl of Arran, by commission, dated the 28th of July, 1685; the Lieutenant-Colonelcy on Captain Charles Nedby, from the Queen's regiment of horse; and the commission of Major on Captain John Parker. This is the fourth volume in an operational and chronological series covering the U.S. Marine Corps' participation in the Vietnam War. This volume details the change in focus of the III Marine Amphibious Force (III MAF), which fought in South Vietnam's northernmost corps area, I Corps. This volume, like its predecessors, concentrates on the ground war in I Corps and III MAF's perspective of the Vietnam War as an entity. It also covers the Marine Corps participation in the advisory effort,

the operations of the two Special Landing Forces of the U.S. Navy's Seventh Fleet, and the services of Marines with the staff of the U.S. Military Assistance Command, Vietnam. There are additional chapters on supporting arms and logistics, and a discussion of the Marine role in Vietnam in relation to the overall American effort.

Excerpt from History of Ancient Woodbury, Connecticut: From the First Indian Deed in 1659 to 1854, Including the Present Towns of Washington, Southbury, Bethlem, Roxbury, and a Part of Oxford and Middlebury The simple, unfortunate race of the early days has departed faded from the View, and almost from the memory of men. In their lowly, unnoticed, and unknown graves, they sleep well. The chiefs of other times are departed. They have gone without their fame. Another race has arisen. The people are like the waves of the ocean; like the leaves of woody Morven they pass away in the rustling blast, and other green leaves lift their heads on high. In 1683, an Ottoman army that stretched from horizon to horizon set out to seize the "Golden Apple," as Turks referred to Vienna. The ensuing siege pitted battle-hardened Janissaries wielding seventeenth-century grenades against Habsburg armies, widely feared for their savagery. The walls of Vienna bristled with guns as the besieging Ottoman host launched bombs, fired cannons, and showered the populace with arrows during the battle for Christianity's bulwark. Each side was sustained by the hatred of its age-old enemy, certain that victory would be won by the grace of God. The Great Siege of Vienna is the centerpiece for historian Andrew Wheatcroft's richly drawn portrait of the centuries-long rivalry between the Ottoman and Habsburg empires for control of the European continent. A gripping work by a master historian, *The Enemy at the Gate* offers a timely examination of an epic clash of civilizations.
