Life of Admiral Sir Charles Saunders, K.B. Simon and Schuster

To protect the human race, 6T9 evolved with the flip of a switch and a few lines of code. But he's made himself a killer as well as a protector. The programming that may save humanity has driven him from Volka, the woman he loves. In the heart of the Dark's first strike against the Republic, 6T9 must discover what he has become, who he wants to be, and who he wants to be with. Slowly and almost unnoticed, Volka has been evolving, too. Heartbroken by 6T9's departure, she is torn between love and duty. Accepting the latter, she takes a mission that will lead her to the edge of the universe. There, she will be tested, and her evolution will pass a point where there will be no turning back. An android who has become more than a sex 'bot, a mutant who has developed startling abilities, 6T9 and Volka have become more than human. The changes they've endured may save the galaxy, but have driven them further apart. Will they find a way forward together, or will the bond between them be another casualty of the Dark?

Amongst the heroic figures of the Royal Navy of the Revolutionary and Napoleonic wars; Admiral Nelson stands out from a number of great men. Without Lord St. Vincent, it is difficult to imagine how Horatio Nelson would have been afforded the latitude he needed for his victories. Before Nelson flew his pennant in the Victory, Sir John Jervis would lead that ship and his squadron, of which Nelson was a conspicuous part, to huge success at the battle of Cape St. Vincent that would earn Jervis his earldom. John Jervis ran away to join the Navy at the tender age of 13. After much time spent on board ships in the Caribbean, he worked his way up the ladder of promotion - from seaman to first lieutenant - before he was assigned to the expedition under General Wolfe to Canada, during which he impressed all with his conduct. At the outbreak of the wars with France, Sir John Jervis was a vice-admiral of long service and huge experience, his various postings around the fleet - along with his crowning achievement at the battle of St. Vincent - all captured in this biography. Although greatly outnumbered, his determination to bring the enemy to battle was the foundation of the aggressive self-confidence carried by the Royal Navy for many years to come. Stern disciplinarian when confronted by mutiny in the fleet, he nevertheless had a softer side which was indulged when he saw a deserving case of a man in dire straits. On his elevation to the post of First Lord of the Admiralty, his determination to improve the efficiency of the Navy and the lot of the common sailor gained him a great reputation among the Navy of the day. A first-rate biography. Illustrations - 10 portraits and 4 battle plans.

The 281st AHC gun platoon named the "Wolf Pack" was the 3d platoon where a select and well-known platoon of professional helicopter pilots and crew flying the C-model Huey UH-1C known as the Charlie Model from 1965 through 1971 in Vietnam. These men were like the knights of old, going day after day in twos or threes, to hold the battlefield against all comers and to do battle in defense of the Fifth Special Forces and its long-range reconnaissance unit. Detachment B-52, Project Delta. Pilots and aircrews felt like they were invincible, 6 Feet Tall, bulletproof, and kin to the gun-slingers of the old west. Unfortunately, some made the ultimate sacrifice, others were wounded, and to this day, some still have to deal with that time. Indeed, the legacy of the 281st Wolf Pack is a story of a remarkable, unyielding spirit and uncompromisingly fierce defiance in the face of death with a determined enemy. This book is a work of respect and honor covering the life and times of the U.S. Army's first special operations helicopter company, the "Wolf Pack." As an element of the 281st

Assault Helicopter Company, the Wolf Pack provided armed helicopter support for the special forces units in Vietnam, with emphasis on aerial weapons support for Project Delta and the MACV Recondo School, which was recognized as the deadliest school in the armed forces. This book contains the real-time stores of the men who flew and maintained the helicopters that operated under the banner; "Hell From Above." For the most part, these young men were fresh out of school and had been expeditiously trained to fly and maintain their helicopters. Few had previous combat experience. In performing one of the most dangerous missions of the war, these young men, proudly known as the "Wolf Pack," developed aerial gunnery and support skills that identified them as one of the top helicopter gun units of the war! This book tells their story and honors each of them. John "Jack" Mayhew was a major and the 281st AHC commander in 1967-68. He later retired as a colonel with more than 30 years of service. The Star Trek: Signature Edition series continues with this thrilling adventure featuring Commander Spock, Captain Kirk, and the U.S.S. Enterprise. Of all the experiences shared by Captain Kirk and the crew of the Starship Enterprise™ during their first five-year mission, two were among the most perilous: a journey to the nonphysical realm of Transition where the massive computer known as Memory Prime was situated, and the nightmarish mission to Talin IV, a world poised on the brink of destruction that Kirk was forbidden to save. In the twenty-third century, a hundred years before a sentient artificial life-form would be allowed to earn a Starfleet commission, the Federation considers the use of self-aware artificial intelligences to be little more than slavery, except for the immense computer system of Memory Prime—the key hub in the Federation's vast network of interstellar library planets. There, the A.I.s known as Pathfinders inhabit Transition—a virtual world so different from our universe that the A.I.s themselves debate whether or not the physical universe is real. But when an ancient enemy reaches out from the shadows of Vulcan's darkest history and threatens to destroy the Federation, Spock must risk his career, and his life, to enter the Pathfinders' realm. Technologically and politically, Talin IV is little different from late-twentieth century Earth. But as a series of mysterious events pushes that world closer to self-annihilation, the Prime Directive prevents Captain Kirk and his crew from doing anything to prevent it. When the worst appears to happen and Kirk takes desperate action to give the Talin a chance to step back from the nuclear abyss, Talin IV is consumed by radioactive fire. Now, with a world destroyed and the Enterprise dead in space, the careers of Kirk and his crew are over. Disgraced and despised, Kirk has only one chance to redeem himself and his crew: Somehow, he must make his way back to Talin IV and discover what really happened, even if it means proving that a world died because he broke Starfleet's most sacred law.
