A personal journey leads a celebrated critic to discover "knights of the medium," contemporary artists who battle the aesthetic meaninglessness of the post-medium condition. In *Under Blue Cup*, Rosalind Krauss explores the relation of aesthetic mediums to memory—her own memory having been severely tested by a ruptured aneurysm that temporarily washed away much of her short-term memory. (The title, *Under Blue Cup*, comes from the legend on a flash card she used as a mnemonic tool during cognitive therapy.) Krauss emphasizes the medium as a form of remembering; contemporary artists in what she terms the "post-medium" condition reject that scaffolding. Krauss

explains the historical emergence of the post-medium condition and describes alternatives to its aesthetic meaninglessness, examining works by "knights of the medium"—contemporary artists who extend the life of the specific medium. These artists—including Ed Ruscha, William Kentridge, Sophie Calle, Harun Farocki, Christian Marclay, and James Coleman—reinstates the recursive rules of a modernist medium by inventing what Krauss terms new technical supports, battling the aesthetic meaninglessness of the post-medium condition. The "technical support" is an underlying ground for aesthetic practice that supports the work of art as canvas supported oil paint. The technical support for Ruscha's fascination with gas stations and parking lots is the automobile; for Kentridge, the animated film; for Calle, photojournalism; for Coleman, a modification of PowerPoint; for Marclay, synchronous sound. Their work, Krauss argues, recuperates more than a century of modernist practice. The work of the post-medium condition—conceptual art, installation, and relational aesthetics—advances the idea that the "white cube" of the museum or gallery wall is over. Krauss argues that the technical support extends the life of the white cube, restoring autonomy and specificity to the work of art.

A call for a broadened environmental movement that addresses issues of everyday life. In *Environmentalism Unbound*, Robert Gottlieb proposes a new strategy for social and environmental change that involves reframing and linking the movements for environmental justice and pollution prevention. According to Gottlieb, the environmental movement's narrow conception of environment has isolated it from vital issues of everyday life, such as workplace safety, healthy communities, and food security, that are often viewed separately as industrial, community, or agricultural concerns. This fragmented approach prevents an awareness of how these issues are also environmental issues. After tracing a history of environmental perspectives on land and resources, city and countryside, and work and industry, Gottlieb focuses on three compelling examples of this new approach to social and environmental change. The first involves a small industry (dry cleaning) and the debate over pollution prevention approaches; the second involves a set of products (janitorial cleaning supplies) that may be hazardous to workers; and the third explores the obstacles and opportunities presented by community or regional approaches to food supply in the face of an increasingly globalized food system.

This volume covers a wide range of topics in Interpreting and Translation Research. Some deal with scientometrics and the history of Interpreting Studies, arguments about conceptual analysis, meta-language and interpreters' risk-taking strategies. Other papers are on research skills like career management, writing communicative abstracts and the practicalities of survey research. Several contributions address empirical issues such as expertise in Simultaneous Interpreting, the cognitive load imposed on interpreters by a non-native accent, the impact of intonation on interpreting quality, linguistic interference in Simultaneous Interpreting, similarities between translation and interpreting, and the relation between translation competence and revision competence. The collection is a tribute to Daniel Gile, in appreciation of his creativity and his commitment to interpreting and translation research. All the contributions in some way show his influence or are related to the models and research he has shaped.
