Why did Spenser write his epic, *The Faerie Queene*, in stanzas instead of a classical meter or blank verse? Why did he affect the vocabulary of medieval poets such as Chaucer? Is there, as centuries of readers have noticed, something lyrical about Spenser's epic style, and if so, why? In this accessible and wide-ranging study, David Scott Wilson-Okamura reframes these questions in a larger, European context. The first full-length treatment of Spenser's poetic style in more than four decades, it shows that Spenser was English without being insular. In his experiments with style, Spenser faced many of the same problems, and found some of the same solutions, as poets writing in other languages. Drawing on classical rhetoric and using concepts that were developed by literary critics during the Renaissance, this is an account of long-term, international trends in style, illustrated with examples from Petrarch, Du Bellay, Ariosto and Tasso.

Cambridge University Press  
Meaningful or meaningless? Purposeful or pointless? When we look at nature, whether at our living earth or into deepest space, what do we find? In stark contrast to contemporary claims that the world is meaningless, Benjamin Wiker and Jonathan Witt reveal a cosmos charged with both meaning and purpose. Their journey begins with Shakespeare and ranges through Euclid's geometry,

the fine-tuning of the laws of physics, the periodic table of the elements, the artistry of ordinary substances like carbon and water, the intricacy of biological organisms, and the irreducible drama of scientific exploration itself. Along the way, Wiker and Witt fashion a robust argument from evidence in nature, one that rests neither on religious presuppositions nor on a simplistic view of nature as the best of all possible worlds. In their exploration of the cosmos, Wiker and Witt find all the challenges and surprises, all of the mystery and elegance one expects from a work of genius.

Howard Smith had often made the run between Port Sudan and Cairo, but when his plane crashed in the desert near a small Red Sea port he was carrying drugs for the first time. Somehow he had to pay his way out of the wreckage and dispose of his illicit cargo. Signore Maraccini, a marine biologist, offered him employment in his exploration of a coral reef and of course he met his daughter, Reta. Somewhere in life there is always the other person who, for each one of us, can drive out loneliness. For Howard, Reta was that person. But it was a dangerous love he had found, perilous as the sharp coral or the shark-hungry waters.

Hilary Clark develops the theory of an encyclopaedic form in the interests of making clear distinctions between the realist narrative form and that of the encyclopaedic-parodic or fictional encyclopaedia. She makes clear the special links that non-realist, parodic fictions have with the forms of essay, Menippean satire and epic, and indeed with the encyclopaedia itself. The study pays particular attention to the way in which literary encyclopaedism has flourished in the twentieth century, with special reference to the works of James Joyce, Ezra Pound and Philippe Sollers.

*Alliteration, Again and Again* Heinemann

The genesis of the alliterations in this book was an email exchange in 2001 with a colleague in Albany, New York. In the emails, we traded alliterations back and forth, variously signing our emails Phrantic in Philadelphia, Accommodating in Albany, Perplexed in Philadelphia and finally, Alliterative in Albany. This email exchange was ultimately the inspiration for my first alliteration about the city of Albany. I then set myself the challenge of exploring the alliterative possibilities of each letter of the alphabet and this slim volume of alliterative verse, *Alliteration, Again and Again*, is the culmination of that endeavor. My earnest hope is that this work will not be dismissed as: Alliteration, an author affliction and awful addiction, avoiding any actual artistic achievement.!
