Merchants of Doubt Basic Books

Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril,

adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding—and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page.

2016 Newbery Honor Book New York Times Bestseller An impassioned, uplifting, and virtuosic tour de force from a treasured storyteller! Lost and alone in a forbidden forest, Otto meets three mysterious sisters and suddenly finds himself entwined in a puzzling quest involving a prophecy, a promise, and a harmonica. Decades later, Friedrich in Germany, Mike in Pennsylvania, and Ivy in California each, in turn, become interwoven when the very same harmonica lands in their lives. All the children face daunting challenges: rescuing a father, protecting a brother, holding a family together. And ultimately, pulled by the invisible thread of destiny, their suspenseful solo stories converge in an orchestral crescendo. Richly imagined and masterfully crafted, *Echo* pushes the boundaries of genre, form, and storytelling innovation to create a wholly original novel that will resound in your heart long after the last note has been struck.

A playful easy reader in the tradition of Dr. Seuss's *Hop on Pop* that teaches the basics of word construction. From award-winning humorist Christopher Cerf comes a super-simple, delightfully silly Beginner Book in which the rhymed text and the position of the words on the page teach the basics of word construction. Written in the style of Dr. Seuss's classic *Hop on Pop* with rhyming words placed directly above each other to show their shared construction, *A Skunk in My Bunk!* combines phonics and word recognition to make learning to read easy—and fun! With bright, charming illustrations by Nicola Slater, kids will be delighted to read for themselves about a goat in a coat in a boat in a moat, a pig in a wig dancing a jig, a skunk in a bunk, and much, much more! Launched in 1957 with *The Cat in the Hat* and written specifically for emergent readers, Beginner Books combine an exacting blend of simple words and fun pictures that encourage children to read—all by themselves.

Happy to spend his summer vacation at home in the city, eight-year-old Jay is horrified by his parent's plan to spend two weeks in the Vermont woods sharing a house with another family. *The Associated Press Stylebook 2015* University of Chicago Press Canine behaviourist, dog advocate and bestselling author Brad Pattison is back with his essential guide for all things puppy. From choosing the right breeder and your pup's first days with your family to street safety, chew training, grooming and bathing, Brad Pattison's *Puppy Book* covers pretty much everything a new dog owner needs to know. While *Unleashed* covered Pattison's basic

training philosophies and how to correct negative behaviour, this book will ensure that you get things started on the right foot, and will keep those negative habits from forming later in life. With his proven canine communication techniques and safe, effective training methods, you don't have to be a fan of one of his shows to realize that Pattison's innovative approach stands out from the pack. He teaches you how to recognize and work with your puppy's needs, so that you can effectively communicate and bond with them. Pattison knows that there's no such thing as one-size-fits-all when it comes to dog training, and puppies everywhere will be better off if their owners buy this book.

New Zealand has a huge range of backcountry huts, most of which are available for public use. Some can sleep 80 people, while others are tiny two-bunk affairs with not even room to stand up in. They are located in our mountains, on the edges of our fiords, coastlines and lakes, beside rivers, in the bush and on the open tops. Together they form an internationally unique network of backcountry shelter, and these huts, so often full of character and history, are destinations in their own right. 'A Bunk for the Night' offers an updated guide to over 200 of the best of these huts to visit. This inspirational guide has been written by Shaun Barnett, Rob Brown and Geoff Spearpoint, the authors of the seminal, best-selling history of 'New Zealand's backcountry huts Shelter from the Storm'. Featuring well-known tramping huts in the major mountain axis of the North Island, Tongariro and Egmont national parks, as well as the Southern Alps, Fiordland and Stewart Island, the authors have also scoured the country for other interesting huts in out-of-the-way places, such as those in the Bay of Islands, on Banks Peninsula, in the Whanganui hinterland, the Takitimu Mountains and the dry ranges of Marlborough. From the famous huts of our Great Walk tracks to the obscurity of bivs with names like 'Adventure' and 'Brass Monkey', this is a wonderful smorgasbord of must-visit huts. Fully illustrated throughout and with all the information required to visit these iconic huts, 'A Bunk for the Night' is an essential book for anyone tramping in New Zealand.

A Bunk for the Night REVISED: A Guide to New Zealand's Best Backcountry Huts - Revised Graywolf Press

The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. *Human Dimension and Interior Space* is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies

prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments.

A First-Rate Madness Rowman & Littlefield

Recent polls suggest that fewer than 40 percent of Americans believe in Darwin's theory of evolution, despite it being one of science's best-established findings. Parents still refuse to vaccinate their children for fear it causes autism, though this link has been consistently disproved. And about 40 percent of Americans believe that the threat of global warming is exaggerated, including many political leaders. In this era of fake news and alternative facts, there is more bunk than ever. But why do people believe in it? And what causes them to embrace such pseudoscientific beliefs and practices? In this fully revised second edition, noted skeptic Massimo Pigliucci sets out to separate the fact from the fantasy in an entertaining exploration of the nature of science, the borderlands of fringe science, and—borrowing a famous phrase from philosopher Jeremy Bentham—the nonsense on stilts. Presenting case studies on a number of controversial topics, Pigliucci cuts through the ambiguity surrounding science to look more closely at how science is conducted, how it is disseminated, how it is interpreted, and what it means to our society. The result is in many ways a "taxonomy of bunk" that explores the intersection of science and culture at large. No one—neither the public intellectuals in the culture wars between defenders and detractors of science nor the believers of pseudoscience themselves—is spared Pigliucci's incisive analysis in this timely reminder of the need to maintain a line between expertise and assumption. Broad in scope and implication, Nonsense on Stilts is a captivating guide for the intelligent citizen who wishes to make up her own mind while navigating the perilous debates that will shape the future of our planet.
