While there is a wealth of published information on addiction medicine, the psychological aspects of alcohol abuse, and behavioral medicine with regard to addiction, virtually none of these resources were written with the primary care provider in mind. *Addressing Unhealthy Alcohol Use in Primary Care* is a resource for primary care clinicians who are confronted by patients with these problems daily, and who wish to successfully address these issues in their practice. It would focus on the literature and science relevant to primary care practice and cover the range of interventions appropriate for this setting. Topics include assessment, brief

counseling interventions, pharmacotherapy, referrals to both specialty care and Alcoholics Anonymous (and other self-help programs), psychiatric co-morbidity and other drug use, and other information specific to the needs of the primary care provider. This book offers solutions on how to enhance the normal development of the well child incorporating complementary medicine. The primary care provider is the only healthcare professional to see every child (0-18) and their parent, and can assess the child's health and advise parents on how to provide a healthy environment and important practices to nurture healthy children. The book provides realistic scenarios encountered by new nurse practitioners in their

clinical training. It is structured in a question and answer framework to help practitioners critically think through the best practices to be implemented during the well child visit and develop a plan of action for the family. This book provides assessment and diagnostic criteria and tools and presents common developmental and behavioral issues for each age group. The book promotes the role of professional as advocate by making recommendations for broad social policies to help all children succeed.
