100 Years of Harley-Davidson HarperCollins Australia

Make Haste Slowly chronicles the grand prix motorcycle racing career of Canadian Mike Duff, the first North American and only Canadian ever to win a world championship grand prix race. Duff won three GP events, the 1964 250 Belgian GP at Spa Francorchamps, the 1965 125 Dutch GP at Assen The Netherlands and the 1965 250 Finnish GP at Imatra Finland. In 1964 Duff finished 3rd in the 350 world championship riding a private 350 AJS 7R single. In 1965 riding a factory Yamaha RD56 250 twin Duff finished 2nd in the 250 world championship. He never won a world title nor an Isle of Man TT, but he rode some of the most exotic racing machines ever built on race courses throughout the Grand Prix Continental Circus. He rode and conquered the intricacies of the Isle of Man TT and forever instilled its magic in his veins. He accelerated along glamorous racing circuits that are but names in a book to most, and he mixed it with the best of the world's motorcycle racers and often emerged victorious. During the 1960s, when the Japanese manufacturers began their dominance of GP racing, Duff had the best seat in the house to watch the titanic battles for first place between the stars of the time, riders like Mike Hailwood, Phil Read, Jim Redman Giacomo Agostini, Luigi Taveri and Bill Ivy. Share these experiences with the author in minute detail from the perspective of Duff's seat aboard a factory Yamaha RD56 or RA97, a Matchless G50 or AJS 7R, or the legendary AJS Porcupine. A story of courage, disappointment and reward, Make Haste Slowly is a must read for all motorcycle racing fans. Duff has stood alone atop a winner's rostrum in silence to his country's national anthem then raised his arms to the tumultuous cheers of thousands all proclaiming an accomplishment that was singularly his. What four times world champion, New Zealander Hugh Anderson says about Make Haste, SLOWly - A tale of human endeavour with a truly unique ending; I truly enjoyed it.

MOTOCOURSE 2020-2021 celebrates its 45th year of publication - and despite the World pandemic throwing the sport into chaos, what a year it was for motorcycle racing! In a thrilling MotoGP season, Marc Marquez and Honda were expected to be the dominant force once more, but an accident in the opening round saw him side-lined for much of the season and left him with but a slim chance of retaining his MotoGP crown. Other riders stepped up in his absence and shared out victories. Ducati's Andrea Dovizioso, and Yamaha's trio of Maverick Vinales, Fabio Quartararo and Franco Morbidelli all took to the top step of the podium. The emergence of KTM as a race winning machine saw both Brad Binder and Miguel Oliveira join the list of first time winners, in a close fought battle for supremacy throughout the whole of the MotoGP field. Once again, Valentino Rossi defied the years to remain at the sharp end of the grid, whilst the Suzuki pair of Alex Rins and Joan Mir both looked equally capable of adding to the list of winners in an enthralling contest for the title. Editor Michael Scott provides a no-holds-barred assessment of all the aspects of a compelling season's action. MOTOCOURSE alone has full coverage of the support classes, Moto2 and Moto3, where Italian riders Luca Marini, Estea Bastinanini, Marco Bezzecchi were contenders to clinch the Moto2 crown, whilst Albert Arenas,

Ai Ogura and John McPhee hotly disputed the Moto3 title. In World Superbikes, Kawasaki's dominance was challenged by Ducati's Scott Redding, with Jonathan Rea looking to retain his championship title for the sixth successive year, ahead of the chasing pack including Alvaro Bautista, Chaz Davies and Yamaha's Michael van der Mark. No book covers the motorcycle racing world in as much detail as MOTOCOURSE, which, in addition to the two major world series covers The World Supersport Championship, The British Superbike Championship and the AMA USA Superbike series. Incredible value for money, with 304 large-format pages, bursting with over 450 stunning colour photographs from the world's finest photographers, MOTOCOURSE covers it all. No wonder MOTOCOURSE is regarded worldwide as 'The Bible of Motorcycle Racing'.

The Larrikin Kiwi Biker tells his story. In 1979 Graeme Crosby arrived in Britain with his worldly possessions in a carry-bag. His racing suit draped over his left shoulder, a scratched helmet in his right hand and just £150 in his wallet, he was ready to take on the world. I lifted up my cracked UV visor with my thumb. 'Which way does the track go and what's the lap record?' I called out over the noise of the valve gear rattling and clanging between my legs. the flag marshal's eyebrows raised in disbelief. I could see him muttering, 'And who the hell do you think you are - Mike Hailwood?' Four years later 'Crozz', as he is affectionately known to millions of fans, walked away from the glamour of world championship Grand Prix racing, taking with him a bag full of trophies and his ever-present sense of humour. In that short time he had achieved more than most riders could ever hope for in a lifetime of racing. Become his pillion passenger as he takes you on a fast and furious journey from the grassroots of New Zealand motorcycle racing through Australia, Japan, the UK and Europe. Experience with him the crashes, the pain, the elation of winning and the international controversies. While the politics, boycotts and tragic fatalities make enthralling reading, the common thread is his determination to enjoy life and have fun. And win a few world championships.

This book examines why the religion-science skirmishes known as the Evolution Wars have persisted into the 21st century. It does so by considering the influences of mass media in relation to decision-making research and the Elaboration Likelihood Model, one of the most authoritative persuasion theories. The book's analysis concentrates on the expression of cues, or cognitive mental shortcuts, in Darwin-sceptic and counter-creationist broadcasts. A multiyear collection of media generated by the most prominent Darwin-sceptic organizations is surveyed, along with rival publications from supporters of evolutionary theory described as the pro-evolutionists. The analysed materials include works produced by Young Earth Creationist and Intelligent Design media makers, New Atheist pacesetters, as well as both agnostic and religious supporters of evolution. These cues are shown to function as subtle but effective means of shaping public opinion, including appeals to expertise, claims that ideas are being censored, and the tactical use of statistics and technical jargon. Contending that persuasive mass media is a decisive component of science-religion controversies, this book will be of keen interest to scholars of Religion, Science and Religion interactions, as well as researchers of Media and Communication Studies more generally.

. The book that takes a comprehensive look at the threat to our food supply from genetic engineering. . 15,000 copies sold in the first six months. . Includes new studies about the dangers of genetically engineered food. . Refutes the "feed the poor" propaganda spread by agribusinesses. . Is both an expose and educational primer on this controversial technology that is already a part of every American's diet. . Explains the dangers of these foods to ourselves and our environment in easily understood terms. Picture a world? . Where the french fries you eat are registered as a pesticide, not a food. . Where vegetarians unwittingly consume fish genes in their tomatoes. . Where corn plants kill monarch butterflies. . Where soy plants thrive on doses of herbicide that kill every other plant in sight. . Where multinational corporations own the life forms that farmers grow and legally control the farmers' actions. That world exists These things are all happening, and they are happening to you. Genetically engineered foods--plants whose genetic structures are altered by scientists in ways that could never occur in nature--are already present in many of the products you buy in supermarkets, unlabeled, unwanted, and largely untested. The threat of these organisms to human and environmental health has caused them to be virtually banned in Europe, yet the U.S. government, working hand-in-hand with a few biotech corporations, has actively encouraged their use while discouraging labeling that might alert consumers to what they are eating. The authors show what the future holds and give you the information you need to preserve the independence and integrity of our food supply. What can you do? First, inform yourself. *Genetically Engineered Food: Changing the Nature of Nature* is the first book to take a comprehensive look at the many ramifications of this disturbing trend. Authors Martin Teitel and Kimberly Wilson explain what genetic engineering is and how it works, then explore the health risks involved with eating organisms never before seen in nature. They address the ecological catastrophe that could result from these modified plants crossing with wild species and escaping human control altogether, as well as the economic devastation that may befall small farmers who find themselves at the mercy of mega-corporations for their livelihood. Taking the discussion a step further, they consider the ethical and spiritual implications of this radical change in our relationship to the natural world, showing what the future holds and giving you the information you need to act on your own or to join others in preserving the independence and integrity of our food supply.

"I've realised that when things are really tough and there seems no hope for the future, it's sometimes just Chapter One of a really cool story, and the ending is entirely up to you." Joey Evans has always loved bikes, from his first second-hand Raleigh Strika at the age of six to the powerful off-road machines that became his passion later on in his life. His dream was one day to ride the most gruelling off-road race in the world, the 9000km Dakar Rally. In 2007 his dream was shattered when he broke his back in a racing accident. His spinal cord was crushed, leaving him paralysed from just below his chest. Doctors gave him a 10 per cent chance of ever walking again. Many would have given up and become resigned to life in a wheelchair, but not Joey Evans. Not only would he get back on his feet and walk, but he would also keep his Dakar dream alive. It was a long and painful road to recovery, involving years of intensive rehabilitation and training, but he had the love and support of both family and friends and an incredible amount of determination. Joey shares the many challenges he and his family faced, relating the setbacks, as well as successes, along the way to the Dakar start line. But the start line was only the first goal. His sights were set on reaching the finish line, which he did in 2017, the only South African to do so. *From Para to Dakar* is so much more than the story of one man reaching the Dakar finish line. It is a story of friendship and respect, compassion and kindness. It is about defying the odds to reach a dream, it is about grit, endurance and raw courage, and it is inspiring in its true heroism.

Motorcycle Engineering Routledge

It started on a cold, frosty morning in 1951 in Christchurch, New Zealand, with a seventeen-year-old-boy, a crate of sheep's kidneys and a dream. The boss of the city's Belfast meatworks, had arrived an hour early to set up for the day, when he noticed one of his workers packing up a crate on the countertop. The young lad was battling to move it so the boss went over to help. When asked what time he'd started, the boy replied 'Five o'clock this morning'. Stunned, and amused, the boss told him he'd be earning a good bonus at the end of the week, and wondered aloud what he'd spend it on. But the boy knew, and immediately replied, 'I'm going to race speedway in England.' And he did. That boy was Barry Briggs, and it was just the start of his great adventure. Little did he know he was soon to become the legendary speedway racer more commonly known as Briggo, and later as Barry Briggs MBE. From dangerous encounters in the jungles of Liberia to teaching Steve McQueen to slide a speedway bike, Briggo's incredible story is one of strength, determination and a life lived firmly in the fast lane.
