The rise of the Tea Party redefined both the Republican Party and how we think about intraparty conflict. What initially appeared to be an anti-Obama protest movement of fiscal conservatives matured into a faction that sought to increase its influence in the Republican Party by any means necessary. Tea Partiers captured the party's organizational machinery and used it to replace established politicians with Tea Party-style Republicans, eventually laying the groundwork for the nomination and election of a candidate like Donald Trump. In *How the Tea Party Captured the GOP*, Rachel Marie Blum approaches the Tea Party from the angle of party politics, explaining the Tea Party's insurgent strategies as those of a party faction. Blum offers a novel theory of factions as miniature parties within parties, discussing how fringe groups can use factions to increase their political influence in the US two-party system. In this richly researched book, the author uncovers how the electoral losses of 2008 sparked disgruntled Republicans to form the Tea Party faction, and the strategies the Tea Party used to wage a systematic takeover of the Republican Party. This book not only illuminates how the Tea Party achieved its influence, but also provides a framework for identifying other factional insurgencies.

The European Blood and Marrow Transplantation Textbook for Nurses Bloomsbury Publishing

This book is open access under a CC BY 4.0 license. This textbook, endorsed by the European Society for Blood and Marrow Transplantation (EBMT), provides adult and paediatric nurses with a full and informative guide covering all aspects of transplant nursing, from basic principles to advanced concepts. It takes the reader on a journey through the history of transplant nursing, including essential and progressive elements to help nurses improve their knowledge and benefit the patient experience, as well as a comprehensive introduction to research and auditing methods. This new volume specifically intended for nurses, complements the ESH-EBMT reference title, a popular educational resource originally developed in 2003 for physicians to accompany an annual training course also serving as an educational tool in its own right. This title is designed to develop the knowledge of nurses in transplantation. It is the first book of its kind specifically targeted at nurses in this specialist field and acknowledges the valuable contribution that nursing makes in this area. This volume presents information that is essential for the education of nurses new to transplantation, while also offering a valuable resource for more experienced nurses who wish to update their knowledge.

A dramatic historical narrative of the man who stole the secret of tea from China In 1848, the British East India Company, having lost its monopoly on the tea trade, engaged Robert Fortune, a Scottish gardener, botanist, and plant hunter, to make a clandestine trip into the interior of China—territory forbidden to foreigners—to steal the closely guarded secrets of tea horticulture and manufacturing. For All the Tea in China is the remarkable account of Fortune's journeys into China—a thrilling narrative that combines history, geography, botany, natural science, and old-fashioned adventure. Disguised in Mandarin robes, Fortune ventured deep into the country, confronting pirates, hostile climate, and his own untrustworthy men as he made his way to the epicenter of tea production, the remote Wu Yi Shan hills. One of the most daring acts of corporate espionage in history, Fortune's pursuit of China's ancient secret makes for a classic nineteenth-century adventure tale, one in which the fate of empires hinges on the feats of one extraordinary man.

The Grammar and Lexis of Conversational Informal English in Advanced Textbooks defends the view that the acquisition of conversational English depends highly on the kind of materials available to L2 learners. The need to acquire a proficient competence in English is growing exponentially in an incessantly demanding society, but it is the oral skill, and more specifically the ability to communicate in everyday situations, that learners are calling for. The current learning process, nonetheless, is not particularly effective, as is shown in the data collected by the Eurobarometer and published in June 2012, which shows that only 38% of the Europeans surveyed were able to maintain a conversation in English, although 67% believed it to be the most useful language to learn for personal development. The present study supports the idea expressed in The Common European Framework of Reference for Languages, which states that a language is learnt “reactively, following the instructions and carrying out the activities prescribed for them by teachers and by textbooks” (2001: 141). Consequently, these materials should reflect the everyday use of informal discourse and allow learners to analyse, understand and interpret the different underlying messages conveyed by means of lexico-syntactic, as well as paralinguistic, elements. The book is divided into seven chapters in which various different linguistic aspects of conversation are dealt with. In the opening chapters, spoken language is presented and approached as a multidimensional entity, particularly as the sum of lexico-syntactic and socio-linguistic elements. The following chapters provide a description of the main characteristics of conversational English based on corpus-informed grammars and publications. The final chapter analyses twenty ESL textbooks in order to determine how corpus data has influenced the materials designed for the acquisition of conversational discourse.

Unlatched. WINNER OF THE IAN WARDS PRIZE 2018 By the early 20th century, the ideology of racial distance predominated in British India. This simultaneously threw a spotlight on the 'Anglo-Indian problem' and sent intimate relationships between British colonials and Indian women into the shadows of history. One Scottish missionary's solution was to isolate and raise the mixed-race children of British tea planters in an institution in Kalimpong - in the foothills of the Himalayas - before permanently resettling them far from their maternal homeland as workers in New Zealand. Historian Jane McCabe leads us through a compelling research journey that began with uncovering the story of her own grandmother, Lorna Peters, one of 130 adolescents resettled in New Zealand under the scheme between 1908 and 1938. Using records from the 'Homes' in Kalimpong and in-depth interviews with other descendants in New Zealand, she crafts a compelling, evocative, and unsentimental yet moving narrative -- one that not only brings an untold part of imperial history to light, but also transforms previously broken and hushed family histories into an extraordinary collective story. This book attends to both the affective dimension of these traumatic familial disruptions, and to the larger economic and political drivers that saw government and missionary schemes breaking up Anglo-Indian families -- schemes that relied on future forgetting.

This groundbreaking collection represents the broad scope of cutting-edge research in Cultural Linguistics, a burgeoning field of interdisciplinary inquiry into the relationships between language and cultural cognition. The materials surveyed in its chapters demonstrate how cultural conceptualisations encoded in language relate to all aspects of human life - from emotion and embodiment to kinship, religion, marriage and politics, even the understanding of life and death. Cultural Linguistics draws on cognitive science, complexity science and distributed cognition, among other disciplines, to strengthen its theoretical and analytical base. The tools it has developed have worked toward insightful investigations into the cultural grounding of language in numerous applied domains, including World Englishes, cross-cultural/intercultural pragmatics, intercultural communication, Teaching English as an International Language (TEIL), and political discourse analysis.
