Sky - Starter Book Basic Books (AZ)

An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

New Sky - Starter Longman

Is it time to refresh the way you think about teaching Earth science? Learning to Read the Earth and Sky is the multifaceted resource you need to bring authentic science—and enthusiasm—into your classroom. It offers inspiration for reaching beyond prepared curricula, engaging in discovery along with your students, and using your lessons to support the Next Generation Science Standards (NGSS). The book provides • examples of Earth science labs and activities you and your students can do as co-investigators; • insights into student expectations and misconceptions, plus ideas for inspiring true investigation; • stories of real scientific discovery translated for classroom consideration; • exploration of how you can mentor students as a teacher-scholar; and • guidance on how to translate the sweeping core ideas of the NGSS into specific examples students can touch, see, and experience. The authors of Learning to Read the Earth and Sky are husband-and-wife educators who promote science as something to figure out, not just something to know. They write, “It is our hope that readers will find our book short on ‘edu-speak,’ long on the joy of doing science, and full of stories of students, classrooms, scientists, and Earth and sky.”

Half the Sky Kensington Books

Sky’s small town turns absolutely claustrophobic when his secret promposal plans get leaked to the entire school in this witty, heartfelt, and ultimately hopeful debut novel for fans of What if it’s Us? and I Wish You All the Best. Sky Baker may be openly gay, but in his small, insular town, making sure he was invisible has always been easier than being himself. Determined not to let anything ruin his senior year, Sky decides to make a splash at his high school’s annual beach bum party by asking his crush, Ali, to prom—and he has thirty days to do it. What better way to start living loud and proud than by pulling off the gayest promposal Rock Ledge, Michigan, has ever seen? Then, Sky’s plans are leaked by an anonymous hacker in a deeply homophobic e-blast that quickly goes viral. He’s fully prepared to drop out and skip town altogether—until his classmates give him a reason to fight back by turning his thirty-day promposal countdown into a school-wide hunt to expose the e-blast perpetrator. But what happens at the end of the thirty days? Will Sky get to keep his hard-won visibility? Or will his small-town blues stop him from being his true self? *Under Red Skies* Simon and Schuster

A deeply personal and shocking look at how China is coming to terms with its conflicted past as it emerges into a modern, cutting-edge superpower. Through the stories of three generations of women in her family, Karoline Kan, a former New York Times reporter based in Beijing, reveals how they navigated their way in a country beset by poverty and often-violent political unrest. As the Kans move from quiet villages to crowded towns and through the urban streets of Beijing in search of a better way of life, they are forced to confront the past and break the chains of tradition, especially those forced on women. Raw and revealing, Karoline Kan offers gripping tales of her grandmother, who struggled to make a way for her family during the Great Famine; of her mother, who defied the One-Child Policy by giving birth to Karoline; of her cousin, a shoe factory worker scraping by on 6 yuan (88 cents) per hour; and of herself, as an ambitious millennial striving to find a job—and true love—during a time rife with bewildering social change. *Under Red Skies* is an engaging eyewitness account and Karoline’s quest to understand the rapidly evolving, shifting sands of China. It is the first English-language memoir from a Chinese millennial to be published in America, and a fascinating portrait of an otherwise-hidden world, written from the perspective of those who live there.

The epic story of why passenger pigeons became extinct and what that says about our current relationship with the natural world. When Europeans arrived in North America, 25 to 40 percent of the continent’s birds were passenger pigeons, traveling in flocks so massive as to block out the sun for hours or even days. The downbeats of their wings would chill the air beneath and create a thundering roar that would drown out all other sound. John James Audubon, impressed by their speed and agility, said a lone passenger pigeon streaking through the forest “passes like a thought.” How prophetic—for although a billion pigeons crossed the skies 80 miles from Toronto in May of 1860, little more than fifty years later passenger pigeons were extinct. The last of the species, Martha, died in captivity at the Cincinnati Zoo on September 1, 1914. As naturalist Joel Greenberg relates in gripping detail, the pigeons’ propensity to nest, roost, and fly together in vast numbers made them vulnerable to unremitting market and recreational hunting. The spread of railroads and telegraph lines created national demand that allowed the birds to be pursued relentlessly. Passenger pigeons inspired awe in the likes of Audubon, Henry David Thoreau, James Fenimore Cooper, and others, but no serious effort was made to protect the species until it was too late. Greenberg’s beautifully written story of the passenger pigeon paints a vivid picture of the passenger pigeon’s place in literature, art, and the hearts and minds of those who witnessed this epic bird, while providing a cautionary tale of what happens when species and natural resources are not harvested sustainably.

A Sky Without Lines NSTA Press

How radio astronomers challenged national borders, disciplinary boundaries, and the constraints of vision to create an international scientific community. For more than three thousand years, the science of astronomy depended on visible light. In just the last sixty years, radio technology has fundamentally altered how astronomers see the universe. Combining the wartime innovation of radar and the established standards of traditional optical telescopes, the "radio telescope" offered humanity a new vision of the universe. In *A Single Sky*, the historian David Munns explains how the idea of the radio telescope emerged from a new scientific community uniting the power of radio with the international aspirations of the discipline of astronomy. The radio astronomers challenged Cold War era rivalries by forging a united scientific community looking at a single sky. Munns tells the interconnecting stories of Australian, British, Dutch, and American radio astronomers, all seeking to learn how to see the universe by means of radio. Jointly, this international array of radio astronomers built a new "community" style of science opposing the "glamour" of nuclear physics. *A Single Sky* describes a communitarian style of science, a culture of interdisciplinary and international integration and cooperation, and counters the notion that recent science has been driven by competition. Collaboration, or what a prominent radio astronomer called "a blending of radio invention and astronomical insight," produced a science as revolutionary as Galileo’s first observations with a telescope. Working together, the community of radio astronomers revealed the structure of the galaxy.

Way to Go! Simon & Schuster Books for Young Readers

A boy’s nomadic life in Mongolia is under threat in a novel that “captures the mountains, valleys and steppes in all their surpassing beauty and brutality” (Minneapolis Star-Tribune). In the high Altai Mountains of northern Mongolia, a young shepherd boy comes of age, tending his family’s flocks on the mountain steppes and knowing little of the world beyond the surrounding peaks. But his nomadic way of life is increasingly disrupted by modernity. This confrontation comes in stages. First, his older siblings leave the family yurt to attend a distant boarding school. Then the boy’s grandmother dies, and with her his connection to the old ways. But perhaps the greatest tragedy strikes when his dog, Arsylang—“all that was left to me”—ingests poison set out by the boy’s father to protect his herd from wolves. “Why is it so?” Dshurukawaa cries out in despair to the Heavenly Blue Sky, to be answered only by the wind. Rooted in the oral traditions of the Tuvan people, *The Blue Sky* weaves the timeless story of a boy poised on the cusp of manhood with the story of a people on the threshold. “Thrilling. . . . Tschinag makes it easy for his readers to fall into

the beautiful rhythms of the Tuvans’ daily life.” —Los Angeles Times Book Review “In this pristine and concentrated tale of miraculous survival and anguished loss, Tschinag evokes the nurturing warmth of a family within the circular embrace of a yurt as an ancient way of life lived in harmony with nature becomes endangered.” —Booklist

In *Between Earth and Sky*, a rich tapestry of personal stories, information, and illustrations, world-renowned canopy biologist Nalini M. Nadkarni becomes our captivating guide to the leafy wilderness above our heads. Through her luminous narrative, we embark on a multifaceted exploration of trees that reveals the profound connections we have with them, the dazzling array of things they can provide us, and the powerful lessons they teach us.

The Sky Is the Limit Longman

The Sky is the Limit is intended to convey to children the limitless choices for what they can be when they grow up. The author encourages children to shoot for the stars and aim for the sky. There is a twist at the end because as we adults know... the sky is not the limit.

Sky Level 1 Student’s Book New Edition Blackstone Publishing

Let your child take an exciting, visual journey from Earth’s core to the edge of the outer atmosphere! Explore the elements that make up the soil, the sea, and the sky.Examine detailed charts and graphs about the earth’s crust, caves, and clouds.Scan facts and figures on weather, mountains, and more, based on the best-selling Wonders of Creation series! Designed by the creative team that developed the innovative and award-winning Big Book of History, the Big Book of Earth and Sky unfolds as a 15-foot chart. It is removable so it can be viewed either panel-by-panel or hung on the wall as a full-length display. A teacher’s guide helps bring out additional insights with questions, education activities, and additional readings, all of which enhance this excellent reference tool and help a parent or teacher utilize it within their science curriculum. This stunning chart will pique the interest of children and bring a study of God’s world to brilliant life!

Tunnel in the Sky Hachette Books

In Amanda Skenandore’s provocative and profoundly moving debut, set in the tragic intersection between white and Native American culture, a young girl learns about friendship, betrayal, and the sacrifices made in the name of belonging. On a quiet Philadelphia morning in 1906, a newspaper headline catapults Alma Mitchell back to her past. A federal agent is dead, and the murder suspect is Alma’s childhood friend, Harry Muskrat. Harry—or Asku, as Alma knew him—was the most promising student at the “savage-taming” boarding school run by her father, where Alma was the only white pupil. Created in the wake of the Indian Wars, the Stover School was intended to assimilate the children of neighboring reservations. Instead, it robbed them of everything they’d known—language, customs, even their names—and left a heartbreaking legacy in its wake. The bright, courageous boy Alma knew could never have murdered anyone. But she barely recognizes the man Asku has become, cold and embittered at being an outcast in the white world and a ghost in his own. Her lawyer husband, Stewart, reluctantly agrees to help defend Asku for Alma’s sake. To do so, Alma must revisit the painful secrets she has kept hidden from everyone—especially Stewart. Told in compelling narratives that alternate between Alma’s childhood and her present life, *Between Earth and Sky* is a haunting and complex story of love and loss, as a quest for justice becomes a journey toward understanding and, ultimately, atonement.

Sky 2 Test Book New Edition New Leaf Publishing Group

The groundbreaking female pilot featured in the hit Broadway musical *Come from Away* tells her story in this high-flying and inspiring picture-book autobiography! When Beverley Bass was a young girl in the late 1950s, she told her parents she wanted to fly planes--and they told her that girls couldn't be pilots. Still, they encouraged her, and brought her to a nearby airport to watch the planes take off and land. After decades of refusing to take no for an answer, in 1986 Beverley became the first female pilot promoted to captain by American Airlines and led the first all-female crewed flight shortly thereafter. Her revolutionary career became even more newsworthy when she was forced to land in the remote town of Gander, Newfoundland, on September 11, 2001, due to US airspace closures. After several days there, she flew her crew and passengers safely home. Beverley's incredible life is now immortalized in the hit Broadway musical *Come from Away*. Here, discover how she went from an ambitious young girl gazing up at the sky to a groundbreaking pilot smiling down from the cockpit. "Inspiring and up, up, and away all the way."--Kirkus "An inspiring biography about one woman's determination to forge a new path."--Booklist

High quality binding, premium design, paperback, beautiful glossy cover, size 8.5"x11"108 beautifully made pages- Great Teacher Appreciation Gift, end of school year gift, Thank You Teacher Gift.

A Feathered River Across the Sky Astra Publishing House

In the tradition of *Iron and Silk* and *Touch the Dragon*, Jamie Zeppa's memoir of her years in Bhutan is the story of a young woman's self-discovery in a foreign land. It is also the exciting debut of a new voice in travel writing. When she left for the Himalayan kingdom of Bhutan in 1988, Zeppa was committing herself to two years of teaching and a daunting new experience. A week on a Caribbean beach had been her only previous trip outside Canada; Bhutan was on the other side

of the world, one of the most isolated countries in the world known as the last Shangri-La, where little had changed in centuries and visits by foreigners were restricted. Clinging to her bags full of chocolate, hair conditioner and Immodium, she began the biggest challenge of her life, with no idea she would fall in love with the country and with a Bhutanese man, end up spending nine years in Bhutan, and begin a literary career with her account of this transformative journey. At her first posting in a remote village of eastern Bhutan, she is plunged into an overwhelmingly different culture with squalid Third World conditions and an impossible language. Her house has rats and fleas and she refuses to eat the local food, fearing the rampant deadly infections her overly protective grandfather warned her about. Gradually, however, her fear vanishes. She adjusts, begins to laugh, and is captivated by the pristine mountain scenery and the kind students in her grade 2 class. She also begins to discover for herself the spiritual serenity of Buddhism. A transfer to the government college of Sherubtse, where the housing conditions are comparatively luxurious and the students closer to her own age, gives her a deeper awareness of Bhutan's challenges: the lack of personal privacy, the pressure to conform, and the political tensions. However, her connection to Bhutan intensifies when she falls in love with a student, Tshewang, and finds herself pregnant. After a brief sojourn in Canada to give birth to her son, Pema Dorji, she marries Tshewang and makes Bhutan her home for another four years. Zeppa's personal essay about her culture shock on arriving in Bhutan won the 1996 CBC/Saturday Night literary competition and appeared in the magazine. She flew home to accept the prize, where people encouraged her to pursue her writing. Her letters from Bhutan also featured on CBC's Morningside. The book that grew out of this has been published in Canada and the United States to ecstatic reviews, followed by British, German, Dutch, Italian and Spanish editions. Although cultural differences finally separated Jamie and Tshewang in 1997 while she was writing the book and she returned to Canada, she will always feel at home in Bhutan. Zeppa shares her compelling insights into this land and culture, but *Beyond the Sky and the Earth* is more than a travel book. With rich, spellbinding prose and bright humour, it describes a personal journey in which Zeppa acquires a deeper

understanding of what it means to leave one's home behind, and undergoes a spiritual transformation.

A Single Sky Pearson Longman

This new edition offers - New cross-cultural and cross-curricular content that bring the world into the classroom; New systematic practice and graded exercises for mixed-ability classes; New testing package to cover all the assessment needed; New photos, dialogues and texts that provide lively and motivating up-to-date lessons.

Lonely Castle in the Mirror Harper Horizon

Tiger Ann Parker wants nothing more than to get out of the rural town of Saitter, Louisiana--far away from her mentally disabled mother, her "slow" father who can't read an electric bill, and her classmates who taunt her. So when Aunt Dorie Kay asks Tiger to spend the summer with her in Baton Rouge, Tiger can't wait to go. But before she leaves, the sudden revelation of a dark family secret prompts Tiger to make a decision that will ultimately change her life. Set in the South in the late 1950s, this coming-of-age novel explores a twelve-year-old girl's struggle to accept her grandmother's death, her mentally deficient parents, and the changing world around her. It is a novel filled with beautiful language and unforgettable characters, and the importance of family and home. My Louisiana Sky is a 1998 Boston Globe - Horn Book Award Honor Book for Fiction.
