The Selected Works of Andrew Lang: Volume 1 Anthropology: Fairy Tale, Folklore, the Origins of Religion, Psychical

Research Edited by Andrew Teverson, Alexandra Warwick and Leigh Wilson This is the first critical edition of the works of Andrew Lang (1844-1912), the Scottish writer whose enormous output spanned the whole range of late-nineteenth century intellectual culture. Neglected since his death, partly because of the diversity of his interests and the volume of his writing, his cultural centrality and the interdisciplinary nature of his work make him a vital figure for contemporary scholars. This volume covers Lang's wide and influential engagement with the central areas of late nineteenth-century anthropology. Lang made decisive interventions in debates around the meaning of folk tales and the origins of religion, as well as being an important figure in the investigation of spiritualist claims through psychical research. The work reproduced here includes journalism, essays, extracts from books and previously unpublished letters which together articulate and challenge some of the central ideas and discussions of the period, including evolution, the relation between modern and non-modern cultures, the nature of

scientific claims to truth, and the consequences of materialism. The volume will provide new and illuminating ways of understanding and assessing the period for scholars across a range of disciplines, including those interested in the histories of the fairy story, of science, of the occult, of colonialism and of anthropology.

Full explanatory notes

Andrew Teverson is Professor of English Literature and Associate Dean for the Faculty of Arts and Social Sciences at Kingston University, London. His research centres on the use and meaning of fairy tales, and he has published both on the employment of them in contemporary writing and on the historical development of the form. He is the author of *Fairy Tale* (Routledge, 2013).

Alexandra Warwick is Professor of English Studies and Head of the Department of English, Linguistics and Cultural Studies at the University of Westminster. Her research is on Victorian culture, in particular the fin de siècle. Leigh Wilson is Reader in Modern Literature in the Department of English, Linguistics and Cultural Studies at the University of Westminster. Her research focuses on modernism, on the place of supernatural and occult beliefs and practices in the late nineteenth and early twentieth centuries, and on the contemporary British novel. She is the author of *Modernism and Magic: Experiments with Spiritualism, Theosophy and the Occult* (EUP, 2013).

Charles Perrault, the author of *Little Red Writing Hood* and other famous fairy tales, was not only a well-known writer in 17th-

century France and a leader in the literary Quarrel of the Ancients and Moderns, but also an important political figure involved in the formation of the great Academies and in the construction of the Louvre and Versailles. His *Memoirs* give firsthand glimpses of personalities such as Louis XIV, Colbert, and Bernini and illuminate the unique interdependence of art and politics in the age of Louis the Great. In recollected conversations and anecdotes of Perrault's experiences at the French court, this vividly narrated account evokes the spirit of an important moment in French artistic and intellectual life and reveals the personal background of a man whose name is often unrecognized, but whose work has achieved worldwide fame. - Jacket flap.

Seventeenth-Century French Writers Peter Lang
"Probability Designs develops a comprehensive account of the predictions and probabilities at play in literature, in particular novels. Novels, it is argued, provide readers with a designed sensory flow in their plots, style, and relation to other texts. The model traces, based on research in predictive processing, how this designed sensory flow revises readers' expectations and leads them to engage in exploratory thinking. The model is then embedded in a co-evolutionary account of how language, writing, and fictionality enable literary designer environments in which thought can be extended beyond the everyday. Literary form, as

traced in probability designs, performs particular cognitive work in these designer environments"--

'Of all literary fakes this is surely the most impudent, ingenious, and successful. The Comtesse D'Aulnoy was never in Spain (but) she was a born traveller. Not without reason have the editors of The Broadway Travellers included her fiction in their library of fact. For, despite its falseness, it is intellectually the real thing.' Saturday Review However her work is judged today, it seems certain that Madame D'Aulnoy was one of the most widely-read and most popular authors of her time. Seeing Spain at a strange moment in her history, it is the end of a great age. The last descendent of Charles V is king; after him the nation is destined to enter upon a new phase, under a new dynasty. After reading this journey we see and touch Spain and the reader can judge the Spanish character from a witness who saw it.

This book studies three autobiographies, each of which is at least partially devoid of chronological structure: Sartre's *The Words*, Perec's *W or The Memory of Childhood*, and Sarraute's *Childhood*. Calendar-based order, traditionally associated with autobiography, fails to provide the coherence the readers expect. Hence, readers must create a sense of coherence at another level by using their conceptual resources. Conventional and Original

Metaphors in French Autobiography reveals that in these literary texts coherence is maintained based on the exploitation of conventional metaphors taken from everyday language, which the autobiographers transform in a creative yet familiar manner. These common metaphors offer guidance to readers and establish coherence between the shared life experiences of reader and autobiographer. In the course of reading, the autobiographers' and the readers' life experiences overlap through familiar metaphors, which serve as organizational devices in writing and as guiding principles in reading.

"Here is the complete text of Beautiful Angiola and The Robber with a Witch's Head - plus two never-before translated stories. In the late nineteenth-century, Laura Gonzenbach collected these tales throughout her native Sicily. Jack Zipes's translations bring these stories to life for English-speaking readers. Witches and princess, magic and trickery, and a parade of lively characters make Beautiful Angiola the perfect book for anyone who loves folk and fairy tales."--Jacket

Covering a period of more than one hundred years of work by renowned folklorists, these enlightening essays explore the timeless tale of Cinderella. In addition to the most famous versions of the story (Basile's Pentamerone, Perrault's Cendrillon, and the Grimm's Aschenputtel), this casebook includes articles on other versions of the tale from Russian, English, Chinese, Greek and French folklore. The volume concludes with several interpretive essays, including a psychoanalytic view from Dundes and a critique of the popularization of Cinderella in America.

"Folklorists, scholars of children's literature, and feminists should appreciate particularly the wide scope of this collection . . . now in paperback with an updated Bibliographical Addendum. . . .

Most helpful are the two-page introductions to each variant and to each essay which include a brief overview of the historical

times as well as suggested additional sources for more discussion."—Danny Rochman, *Folklore Forum* "A milestone, a near complete source of primary and secondary materials. . . . The selected analytical writing include definitive classic and new discoveries, covering the whole range of methodological modes and theoretical perspectives from early forms and typology to myth-ritual, social-historical, anthropological, and psychoanalytical readings. The annotated bibliography is most helpful, illuminating, and comprehensive, encompassing publications in other Western languages and works by Asianists."—Chieko Mulhern, *Asian Folklore Studies* "One can imagine several dimensions on which psychoanalysts might find such a collection interesting: as examples of applied psychoanalysis, in relation to philosophical and cultural examination of imaginative material, in relation to child development, and in the correlations between folktales of a particular culture and individual histories."—Kerry Kelly Novick, *Psychoanalytic Quarterly*

Broaching the notion of the 'frame' from a variety of analytic perspectives, and employing a range of approaches, this collection of articles engages with contemporary debates on text and image relations, literary reception and translation, narratology and cinematographic technique. The various contributions to this collection provide new readings in their respective fields, and share a common concern with exploring the productive and problematic notion of the 'frame' and of 'framing' in a wide variety of cultural media in French Studies. This

interdisciplinary analysis of literary and theoretical texts, visual art and film allows for fruitful connections to be made at the level of analysis of themes and of methodology. It thus provides material that is of interest both to specialists in these fields, and also to those seeking a more general introduction to each area. This collection of articles is selected from the proceedings of the 'Framed! in French Studies' workshop, held at the Institut Français in London in February 2006.

The Fairy-Tale Vanguard Routledge

A provocative new theory about fairy tales from one of the world's leading authorities. If there is one genre that has captured the imagination of people in all walks of life throughout the world, it is the fairy tale. Yet we still have great difficulty understanding how it originated, evolved, and spread—or why so many people cannot resist its appeal, no matter how it changes or what form it takes. In this book, renowned fairy-tale expert Jack Zipes presents a provocative new theory about why fairy tales were created and retold—and why they became such an indelible and infinitely adaptable part of cultures around the world. Drawing on cognitive science, evolutionary theory, anthropology, psychology, literary theory, and other fields, Zipes presents a nuanced argument about how fairy tales originated in ancient oral cultures, how they evolved through the rise of literary culture and print, and how, in our own time, they continue to change through their adaptation in an ever-growing variety of media. In making his case, Zipes considers a wide range of fascinating examples, including fairy tales told, collected, and written by women in the nineteenth century; Catherine Breillat's film adaptation of Perrault's "Bluebeard"; and contemporary fairy-tale drawings,

paintings, sculptures, and photographs that critique canonical print versions. While we may never be able to fully explain fairy tales, *The Irresistible Fairy Tale* provides a powerful theory of how and why they evolved—and why we still use them to make meaning of our lives.

Tales of Times Past: The Fairy Tales of Charles Perrault
Bucknell University Press

This anthology has a double aim: to present a body of poetry, none of it easily available, some of it never before reproduced, and to point up a particular trend, until now nearly lost sight of in the maze of generalizations about eighteenth-century French poetry. This trend, called individualist, in contradistinction to the academic and universalist trends of the century, has been chosen since it is the least known and most original of the three. The individualist poets are avowed moderns, and their attitude toward poetry and their concept of its nature often anticipate attitudes held by our poets of our own time. There has not been available to this point a sufficiently representative body of poems by these poets, a gap that Professors Finch and Joliat have attempted to fill with their anthology. Readers will find the notes to the poems especially useful, since many of them provide out-of-the-way background material and, as well, offer new insights into the poetry of the individualist poets as a group.

A majority of the chapters in this book were originally presented as papers at a conference held at Queen's University Belfast in

September 2006. The volume explores the oral-written dynamic in the conte français/francophone, focusing on key aspects of the relationship between oral and written forms of the conte. The chapters fall into four broad thematic areas (the oral-written dynamic in early modern France; literary appropriations and transformations; postcolonial contexts; storytelling in contemporary France: linguistic strategies). Within these broad areas, some chapters deal with sources and influences (such as that of written on oral and vice versa), others with the nature of the discourse resulting from an oral-written dynamic (discourse structure, linguistic features etc.), some with the oral-written interface as it affects the definition of genre, others with the role of the 'oral' within the literary or written text (use of storytelling scenarios, the problematics inherent in transcribing/adapting the spoken word etc.). This chronological and methodological range allows us to situate the emergence of the form in socio-cultural and historical terms, and to open up debate around the role of the conte in particular geographical and political contexts: regional, national, European and postcolonial. This book contains

contributions in both English and French.

The Book of the Short Story Peter Lang

The fairy tales of Charles Perrault—10 timeless stories published from 1693 to 1697—have endured in the public imagination, becoming archetypes that define the genre. Told with style, sophistication, and wry humor, Perrault's tales inspired writers and folklorists throughout the 18th, 19th, and 20th centuries and were the basis for numerous popular adaptations, including the animated films of Walt Disney. Featuring all 10 of Perrault's fairy tales—including "Little Red Riding-Hood," "Cinderella," "Sleeping Beauty," "Puss in Boots," "Little Thumbling," and "Bluebeard"—this Top Five Classics compilation also presents all 41 engraved illustrations by Gustave Doré from his famed 1862 edition, with a new translation of Perrault's original French texts (including the morals in verse), an informative introduction, and a detailed author biography. Meant for children, but enjoyed by readers of all ages, this illustrated edition captures the wonder, charm, humor, and fright of the original tales, in a modern translation that reflects the simple yet elegant language of Charles Perrault.
