"This book reads like a legal thriller; it will leave you thinking about the nature of justice and inspired by the human spirit." -Sister Helen Prejean
Justice Imperiled is the story of the brilliant lawyer Max Hirschberg, one of Germany's most courageous defenders of justice in the face of Hitler's rise to power. Hirschberg lived an extraordinary life at a defining moment in German and European history. By the time he fled Nazi Germany in

1934, he had argued a series of cases in Munich's courtrooms that shed light on the history of political justice in pre-Nazi Germany and, by extension, the miscarriage of justice in all Western democracies. Hirschberg was a rare figure: he fought for cases that reflected the new democracy rather than the old monarchy, that valued equality rather than hierarchy, and that showed respect for workers as well as aristocrats. Throughout the Weimar period

Hirschberg squared off in court against Munich's conservatives, reactionaries, and Nazis—twice facing Hitler himself. As he litigated politically charged disputes, he also began fighting to reverse the criminal convictions of innocent defendants and to study what mistaken verdicts teach us about the criminal justice system as a whole. In a unique blend of biography and courtroom drama, Justice Imperiled captures the excitement of Hirschberg's actual cases and presents legal battles

that still rage, in different circumstances, to this day.

Based on his extensive experience in international librarianship, Peter Johan Lor, South Africa's first National Librarian and a former Secretary General of the IFLA, has written the first comprehensive and systematic overview of international and comparative librarianship. His book provides a conceptual framework and methodological

guidelines for the field and covers the full range of international relations among libraries and information services, with particular attention to the international political economy of information, the international diffusion of innovations and policy in library and information services, LIS development and international aid. It concludes with a discussion of the practical relevance and future of international and comparative studies in LIS.

Although much of the hubris and hyperbole surrounding the 1990's Internet has softened to a reasonable level, the inexorable momentum of information growth continues unabated. This wealth of information provides resources for adapting to the problems posed by our increasingly complex world, but the simple availability of more information does not guarantee its successful transformation into valuable knowledge that

shapes, guides, and improves our activity. When faced with something like the analysis of sense-making behavior on the web, traditional research models tell us a lot about learning and performance with browser operations, but very little about how people will actively navigate and search through information structures, what information they will choose to consume, and what conceptual models they will induce about the landscape of cyberspace.

Thus, it is fortunate that a new field of research, Adaptive Information Interaction (All), is becoming possible. All centers on the problems of understanding and improving human-information interaction. It is about how people will best shape themselves to their information environments, and how information environments can best be shaped to people. Its roots lie in human-computer interaction (HCI), information retrieval, and the behavioral and social

sciences. This book is about Information Foraging Theory (IFT), a new theory in Adaptive Information Interaction that is one example of a recent flourish of theories in adaptationist psychology that draw upon evolutionary-ecological theory in biology. IFT assumes that people (indeed, all organisms) are ecologically rational, and that human information-seeking mechanisms and strategies adapt the structure of the information environments

in which they operate. Its main aim is to create technology that is better shaped to users.

Information Foraging Theory will be of interest to student and professional researchers in HCI and cognitive psychology.

During a 1931 trial of four Nazi stormtroopers, known as the Eden Dance Palace trial, Hans Litten grilled Hitler in a brilliant and merciless three-hour cross-examination, forcing him into multiple

contradictions and evasions and finally reducing him to helpless and humiliating rage (the transcription of Hitler's full testimony is included.) At the time, Hitler was still trying to prove his embrace of legal methods, and distancing himself from his stormtroopers. The courageous Litten revealed his true intentions, and in the process, posed a real threat to Nazi ambition. When the Nazis seized power two years after the trial, friends and family

urged Litten to flee the country. He stayed and was sent to the concentration camps, where he worked on translations of medieval German poetry, shared the money and food he was sent by his wealthy family, and taught working-class inmates about art and literature. When Jewish prisoners at Dachau were locked in their barracks for weeks at a time, Litten kept them sane by reciting great works from memory. After five years of torture and hard labor-

and a daring escape that failed-Litten gave up hope of survival. His story was ultimately tragic but, as Benjamin Hett writes in this gripping narrative, it is also redemptive. "It is a story of human nobility in the face of barbarism." The first full-length biography of Litten, the book also explores the turbulent years of the Weimar Republic and the terror of Nazi rule in Germany after 1933. [in sidebar] Winner of the 2007 Fraenkel Prize for outstanding work of contemporary history, in

manuscript. To be published throughout the world.

Weimar Germany's Left-Wing Intellectuals

University of Chicago Press

A magisterial history of the artists and writers who left Weimar when the Nazis came to power In 1933 thousands of intellectuals, artists, writers, militants and other opponents of the Nazi regime fled Germany. They were, in the words of Heinrich Mann, "the best of Germany," refusing to

remain citizens in this new state that legalized terror and brutality. Exiled across the world, they continued the fight against Nazism in prose, poetry, painting, architecture, film and theater. Weimar in Exile follows these lives, from the rise of national socialism to their return to a ruined homeland, retracing their stories, struggles, setbacks and rare victories. The dignity in exile of Walter Benjamin, Ernst Bloch, Bertolt Brecht, Alfred Döblin, Hanns Eisler,

Heinrich Mann, Thomas Mann, Anna Seghers, Ernst Toller, Stefan Zweig and many others provides a counterpoint to the story of Germany under the Nazis.

"Nothing of the former world holds true anymore," Zofia Nalkowska wrote in her Wartime Diaries on 7 May 1943. "Nothing has remained." The burning of the Warsaw ghetto had

broken Nalkowska's privileged life in two; in the years to come, the need to bear witness to the horrors she had seen firsthand would lead this gifted member of the Polish avant-garde to write the stories in Medallions.

From the #1 New York Times bestselling author, "a brilliant biography"* of the 28th president of the United States. *Doris Kearns Goodwin One hundred years after his inauguration, Woodrow

Wilson still stands as one of the most influential figures of the twentieth century, and one of the most enigmatic. And now, after more than a decade of research and writing, Pulitzer Prize-winning author A. Scott Berg has completed Wilson—the most personal and penetrating biography ever written about the twenty-eighth President. In addition to the hundreds of thousands of documents in the Wilson Archives, Berg was the first biographer to gain access to two recently

discovered caches of papers belonging to those close to Wilson. From this material, Berg was able to add countless details—even several unknown events—that fill in missing pieces of Wilson's character, and cast new light on his entire life. From the visionary Princeton professor who constructed a model for higher education in America to the architect of the ill-fated League of Nations, from the devout Commander in Chief who ushered the country

through its first great World War to the widower of intense passion and turbulence who wooed a second wife with hundreds of astonishing love letters, from the idealist determined to make the world “safe for democracy” to the stroke-crippled leader whose incapacity—and the subterfuges around it—were among the century’s greatest secrets, from the trailblazer whose ideas paved the way for the New Deal and the Progressive

administrations that followed to the politician whose partisan battles with his opponents left him a broken man, and ultimately, a tragic figure—this is a book at once magisterial and deeply emotional about the whole of Wilson’s life, accomplishments, and failings. This is not just Wilson the icon—but Wilson the man.

The Handbook of Polish, Czech, and Slovak Holocaust Fiction aims to increase the visibility and show the versatility of works from East-Central European countries. It is the first encyclopedic work to bridge the gap between the literary production of countries that are considered to be main sites of the Holocaust and their recognition in international academic and public discourse. It contains over 100 entries offering not only facts

about the content and motifs but also pointing out the characteristic fictional features of each work and its meaning for academic discourse and wider reception in the country of origin and abroad. The publication will appeal to the academic and broader public interested in the representation of the Holocaust, anti-Semitism, and World War II in literature and the arts. Besides prose, it also considers poetry and theatrical plays from 1943 through 2018. An

introduction to the historical events and cultural developments in Poland, Czechoslovakia, Czech, and Slovak Republic, and their impact on the artistic output helps to contextualise the motif changes and fictional strategies that authors have been applying for decades. The publication is the result of long-term scholarly cooperation of specialists from four countries and several dozen academic centres.

Crossroad Reviews 'This was incredible!... such a slow burn romance but the build-up had my heart beating out of my chest, the angst and suspense was killing me... This book was perfectly paced and the lack of info-dumping, love triangles and insta-love made for a perfect start to a new series. Switching from POV's from England and Paris and following

the characters as they go from across countries was a great concept. With the addition of magic, action and adventure this book could really do no wrong in my eyes. There isn't a cliffhanger ending just the promise of lots more to come in the next installment which I'm now anxiously awaiting. I highly recommend this to fellow fantasy lovers who are looking for a brand new world to immerse themselves in, with great characters, a promising romance and a thrilling journey ahead.' translation includes a foreword by Henryk Grynberg, also a Holocaust survivor. *Medallions* University of Michigan Press Few scholarly fields have developed in recent decades as rapidly and vigorously as Holocaust Studies. At the start of the twenty-first century, the persecution and murder perpetrated by the Nazi regime have become the subjects of an enormous literature in multiple academic disciplines and a touchstone of public and intellectual discourse in

such diverse fields as politics, ethics and religion. Forward-looking and multi-disciplinary, this handbook draws on the work of an international team of forty-seven outstanding scholars. The handbook is thematically divided into five broad sections. Part One, *Enablers*, concentrates on the broad and necessary contextual conditions for the Holocaust. Part Two, *Protagonists*, concentrates on the principal persons and groups involved in the Holocaust and attempts to

disaggregate the conventional interpretive categories of perpetrator, victim, and bystander. It examines the agency of the Nazi leaders and killers and of those involved in resisting and surviving the assault. Part Three, Settings, concentrates on the particular places, sites, and physical circumstances where the actions of the Holocaust's protagonists and the forms of persecution were literally grounded. Part Four, Representations, engages complex

questions about how the Holocaust can and should be grasped and what meaning or lack of meaning might be attributed to events through historical analysis, interpretation of texts, artistic creation and criticism, and philosophical and religious reflection. Part Five, Aftereffects, explores the Holocaust's impact on politics and ethics, education and religion, national identities and international relations, the prospects for genocide prevention, and the

defense of human rights. Przegląd orientalistyczny Univ of California Press The final part of this book takes an in-depth look at Ronald Reagan. His advanced age is not unusual in a political leader. Other heads of government in the post-war world have been as old as, or even older than, he when they held office; for example, Churchill, Insn, Chiang Kai-shek, Nehru, Salazar, De Gualle, Kenyatta, Tito, Mao Zedong, Adenauer, and Ulbricht. The large number of names gives

the impression that contemporary leadership is gerontocracy. The book

is divided into three sections. The first two examine middle age and old age, with each section

offering numerous case studies from a variety of countries.
