Food and Agricultural Tourism Dog n Bone

This book fills a gap in the growing academic discipline of food and agricultural tourism, offering the first multidisciplinary approach to food tourism and the role it plays in economic development, destination marketing, and gastronomic exploration. It provides a comprehensive introduction to the discipline by considering food tourism in connection with both cultural values and important issues in agriculture, food consumption and safety, and rural heritage and sustainability. The book is

divided into four Parts. Part I defines the elements of food tourism and explains its relationship with sustainability. Part II provides an overview of rural development and demonstrates the impact of industrialization and globalization on eating habits. Part III focuses on food tourism studies and market segmentation techniques to help students understand customer needs regarding food tourism products. Finally, Part IV looks at the financial, policy, and legal requirements relating to food tourism development, providing hands-on tools for students entering food tourism businesses or industries. Complemented by a wide range of international case studies, key definitions, and study questions, Food and Agricultural Tourism is essential reading for students of tourism, geography, and economic development studies.

The New York Times bestselling work of undercover reportage from our sharpest and most original social critic, with a new foreword by Matthew Desmond, author of Evicted Millions of Americans work full time, year round, for poverty-level wages. In 1998, Barbara Ehrenreich decided to join them. She was inspired in part by the rhetoric surrounding welfare reform, which promised that a job—any job—can be the ticket to a better life. But how does anyone survive, let alone prosper, on \$6 an hour? To find out, Ehrenreich left her home, took the cheapest lodgings she could find, and accepted whatever jobs she was offered. Moving from Florida to Maine to Minnesota, she worked as a waitress, a hotel maid, a cleaning woman, a nursing-home aide, and a Wal-Mart sales clerk. She lived in trailer parks and crumbling residential motels. Very quickly, she discovered that no job is truly "unskilled," that even the lowliest occupations require exhausting mental and muscular effort. She also learned that one job is not enough; you need at least two if you int to live indoors. Nickel and Dimed reveals low-rent America in all its tenacity, anxiety, and surprising generosity—a land of Big Boxes, fast food, and a thousand desperate stratagems for survival. Read it for the smoldering clarity of Ehrenreich's perspective and for a rare view of how "prosperity" looks from the bottom. And now, in a new foreword, Matthew Desmond, author of Evicted: Poverty and Profit in the American City, explains why, twenty years on in America, Nickel and Dimed is more relevant than ever.

Global Action Plan on Physical

Activity 2018-2030 Lonely Planet

Now a 6-part mini-series called *Why the Rest of Us Die* airing on VICE TV! The shocking truth about the government's secret plans to survive a catastrophic attack on US soil—even if the rest of us

die—is “a frightening eye-opener” (Kirkus Reviews) that spans the dawn of the nuclear age to today, and “contains everything one could possibly want to know” (The Wall Street Journal). Every day in Washington, DC, the blue-and-gold first Helicopter Squadron, codenamed “MUSSEL,” flies over the Potomac River. As obvious as the Presidential motorcade, most people assume the squadron is a travel perk for VIPs. They’re only half right: while the helicopters do provide transport, the unit exists to evacuate high-ranking officials in the event of a terrorist or nuclear attack on the capital. In the event of an attack, select officials would be whisked by helicopters to a ring of secret bunkers around Washington, even as ordinary citizens were left to fend for themselves. “In exploring the incredible lengths (and depths) that successive administrations have gone to in planning for the aftermath of a nuclear assault, Graff deftly weaves a tale of secrecy and paranoia” (The New York Times Book Review) with details “that read like they've been ripped from the pages of a pulp spy novel” (Vice). For more than sixty years, the US government has been developing secret Doomsday strategies to protect itself, and the multibillion-dollar Continuity of Government (COG) program takes numerous forms—from its potential to evacuate the Liberty Bell from Philadelphia to the plans to launch nuclear missiles from a Boeing-747 jet flying high over Nebraska. Garrett M. Graff sheds light on the inner workings of the 650-acre compound, called Raven Rock, just miles from Camp David, as well as dozens of other bunkers the government built for its top leaders during the Cold War, from the White House lawn to Cheyenne Mountain in Colorado to Palm Beach, Florida, and the secret plans that would have kicked in after a Cold War nuclear attack to round up foreigners and dissidents and nationalize industries. Equal parts a presidential, military, and cultural history, Raven Rock tracks the evolution of the government plan and the threats of global war from the dawn of the nuclear era through the War on Terror.
