Antiterrorism and Effective Death Penalty Act of 1996 Houghton Mifflin Harcourt

Hailed in The New York Times Book Review as "the doyen of Middle Eastern studies," Bernard Lewis has been for half a century one of the West's foremost scholars of Islamic history and culture, the author of over two dozen books, most notably *The Arabs in History*, *The Emergence of Modern Turkey*, *The Political Language of Islam*, and *The Muslim Discovery of Europe*. Eminent French historian Robert Mantran has written of Lewis's work: "How could one resist being attracted to the books of an author who opens for you the doors of an unknown or misunderstood universe, who leads you within to its innermost domains: religion, ways of thinking, conceptions of power, culture--an author who upsets notions too often fixed, fallacious, or partisan." In *Islam and the West*, Bernard Lewis brings together in one volume eleven essays that indeed open doors to the innermost domains of Islam. Lewis ranges far and wide in these essays. He includes long pieces, such as his capsule history of the interaction--in war and peace, in commerce and culture--between Europe and its Islamic neighbors, and shorter ones, such as his deft study of the Arabic word *watan* and what its linguistic history reveals about the introduction of the idea of patriotism from the West. Lewis offers a revealing look at Edward Gibbon's portrait of Muhammad in *Decline and Fall of the Roman Empire* (unlike previous writers, Gibbon saw the rise of Islam not as something separate and isolated, nor as a regrettable aberration from the onward march of the church, but simply as a part of human history); he offers a devastating critique of Edward Said's controversial book, *Orientalism*; and he gives an account of the impediments to translating from classic Arabic to other languages (the old dictionaries, for one, are packed with scribal errors, misreadings, false analogies, and etymological deductions that pay little attention to the evolution of the language). And he concludes with an

astute commentary on the Islamic world today, examining revivalism, fundamentalism, the role of the Shi'a, and the larger question of religious co-existence between Muslims, Christians, and Jews. A matchless guide to the background of Middle East conflicts today, *Islam and the West* presents the seasoned reflections of an eminent authority on one of the most intriguing and little understood regions in the world.

In the middle of the First World War, the British War Cabinet approved and issued a statement in the form of a letter that encouraged the settlement of the Jewish people in Palestine. Signed by the Foreign Secretary Arthur Balfour, the Balfour Declaration remains one of the most important documents of the last hundred years. Jonathan Schneer explores the story behind the declaration and its unforeseen consequences that have shaped the modern world, placing it in context paying attention to the fascinating characters who conceived, opposed and plotted around it - among them Lloyd George, Lord Rothschild, T.E. Lawrence, Prince Faisal and Aubrey Herbert (the man who was 'Greenmantle'). The Balfour Declaration brings vividly to life the origins of one of the world's longest lasting and most damaging conflicts.

The Palestine War has been by far the most important military encounter in the history of the Arab-Israeli conflict. This book examines the origins of the war and its progression through two distinct stages: the guerrilla warfare between the Arab and Jewish communities of Mandatory Palestine, and the conventional inter-state war between the State of Israel and the invading Arab armies. In doing so it assesses the participants, their war aims, strategies and combat performance. Finally, it examines the reasons for Israel's success in the face of seemingly impossible odds and for the failure of the Arab nations to turn their military and numerical superiority into victory on the ground.

Marked by such profound events as the Holocaust and the establishment of the state of Israel, Judaism's long journey through the modern age has been a complex and tumultuous one, leading many Jews to ask themselves not only where they have been and where they are going, but what it means to be a Jew in today's world. For more than a century, from 1900 to 2006, campaigns of nonviolent resistance were more than twice as effective as their violent counterparts in achieving their stated goals. By attracting impressive support from citizens, whose activism takes the form of protests, boycotts, civil disobedience, and other forms of nonviolent noncooperation, these efforts help separate regimes from their main sources of power and produce remarkable results, even in Iran, Burma, the Philippines, and the Palestinian Territories. Combining statistical analysis with case studies of specific countries and territories, Erica Chenoweth and Maria J. Stephan detail the factors enabling such campaigns to succeed and, sometimes, causing them to fail. They find that nonviolent resistance presents fewer obstacles to moral and physical involvement and commitment, and that higher levels of participation contribute to enhanced resilience, greater opportunities for tactical innovation and civic disruption (and therefore less incentive for a regime to maintain its status quo), and shifts in loyalty among opponents' erstwhile supporters, including members of the military establishment. Chenoweth and Stephan conclude that successful nonviolent resistance ushers in more durable and internally peaceful democracies, which are less likely to regress into civil war. Presenting a rich, evidentiary argument, they originally and systematically compare violent and nonviolent outcomes in different historical periods and geographical contexts, debunking the myth that violence occurs because of structural and environmental factors and that it is necessary to achieve certain political goals. Instead, the authors discover, violent insurgency is rarely justifiable on strategic grounds.
