Farewell to NDjamena is a literally classic that carries out a narrative on the United Nation Mission in the Central Africa Republic and Chad (MINURCAT). The book examines the withdrawal of the European Force which gave way to MINURCAT Force activities in the region. Unfortunately one year later, the force was considered not to have attained its Humanitarian Mandate especially as the Presidential election was by the corner. Chad had made peace with the then old Sudan whose President had the ICJ hammer dangling on his neck for war crimes. All effort to get President Idriss Derby of Chad to extend MINURCAT Mandate proved abortive. Subsequently the mission began to wind up gradually. The author is of the view that the numerous political challenges and conflicts in African is caused by the greed of its leaders who have turned the institutions of governance to that of personal gains. Finally, the book will assist the United Nation Secretary General to know the challenges that faced MINURCAT which led to the resignation of the Special Representative of the Secretary General. It is a must read piece.

The migration of Ethiopians across international borders is a recent phenomenon because of the limited integration of the country and society to the global economy. Since it was never colonized - aside from the Italian occupation of 1936-1941 - Ethiopia's economy and society were not directly impacted by the ebb and flow of the global economy, and thus never generated international migration. Beginning in the 1970s, due to factors such as famine, rural poverty, civil war, and political repression, an unprecedented number of Ethiopian migrants began to leave their country in search of better, more secure lives. Today, this diaspora constitutes a distinctive community dispersed across the world, but bound by a common feeling of collectiveness and a shared history of the homeland. The contributors to this volume draw their work from a wide variety of interdisciplinary fields and provide new critical insight on Ethiopian migrants and their diaspora communities. What has emerged from these scholarly works is the recognition that the Ethiopian diaspora -

although separated by oceans and nations, by politics, ethnicity, class, gender and age - are carving out a social and material world born out of their particular circumstances both "here" and "there". This book was originally published as a special issue of *African and Black Diaspora: An International Journal*. *The Week in Germany* Quill Driver Books For all being interested in astronautics, this translation of Hermann Oberth's classic work is a truly historic event. Readers will be impressed with this extraordinary pioneer and his incredible achievement. In a relatively short work of 1923, Hermann Oberth laid down the mathematical laws governing rocketry and spaceflight, and he offered practical design considerations based on those laws.
