Based on author Ion Boldea's 40 years of experience and the latest research, *Linear Electric Machines, Drives, and Maglevs Handbook* provides a practical and comprehensive resource on the steady improvement in this field. The book presents in-depth reviews of basic concepts and detailed explorations of complex subjects, including classifications and practical topologies, with sample results based on an up-to-date survey of the field. Packed with case studies, this state-of-the-art handbook covers topics such as

modeling, steady state, and transients as well as control, design, and testing of linear machines and drives. It includes discussion of types and applications—from small compressors for refrigerators to MAGLEV transportation—of linear electric machines. Additional topics include low and high speed linear induction or synchronous motors, with and without PMs, with progressive or oscillatory linear motion, from topologies through modeling, design, dynamics, and control. With a breadth and depth of coverage not found in currently available references, this book includes formulas and methods that make it an authoritative and comprehensive resource for use in R&D and testing of innovative solutions to new industrial

challenges in linear electric motion/energy automatic control.

The best dictionary available in the market at an affordable price is the Cambridge Low Price Edition Dictionary. The factors which make it attractive are its price, maximum coverage of words and most importantly it gives an 'use in sentence' for every word something you cannot find in other dictionaries. I would say this is the best dictionary suited for anyone who has a flair for English.
