City Profiles USA 2006-2007 Food & Agriculture Org.

In *A Sense of Place*, journalist/travel writer Michael Shapiro goes on a pilgrimage to visit the world's great travel writers on their home turf to get their views on their

careers, the writer's craft, and most importantly, why they chose to live where they do and what that place means to them. The book chronicles a young writer's conversations with his heroes, writers he's read for years who inspired him both to pack his bags to travel and to pick up a pen and write. Michael skillfully coaxes a collective portrait through his interviews, allowing the authors to speak intimately about the writer's life, and how place influences their work and perceptions. In each chapter Michael sets the scene by describing the writer's surroundings, placing the reader squarely in the locale, whether it be Simon Winchester's Massachusetts, Redmond O'Hanlon's London, or Frances Mayes's Tuscany. He then lets the writer speak about life and the world, and through quiet probing draws out fascinating commentary from these remarkable people. For Michael it's a dream come true, to meet his mentors; for readers, it's an engaging window onto the twin landscapes of great travel writers and the world in which they live.

Frommer's South Pacific *Frommers Listen to a free companion podcast on Frommers.com A cruise is a complete vacation, so it's important that you choose the one that's right for you. Frommer's Cruises & Ports of Call is the most user-friendly, opinionated, and comprehensive guide you can buy before you set sail. We provide in-depth coverage on cruises departing from U.S. ports to the Caribbean, Alaska, Bermuda, Mexico and Canada. Unlike rating systems used in other guides, our system is simple. We break down the essential elements of a cruise experience (dining, activities, children's activities, entertainment,

service, overall enjoyment, and overall value), and rate them from "poor" to "outstanding." Photos of each ship combine with the text to give a better sense of the very real differences among the various lines. Most important, this is the only cruise guide that provides the real prices people pay for cruises, not just the rack rates. Other guides tell you that a seven-night cruise aboard Royal Caribbean's Adventure of the Seas costs \$1,919. You can pay that if you want to, but only Frommer's tells you that the same cruise is selling for \$999. We give both the rack rates and the discount price for every cruise we review. This feature alone makes Frommer's Cruises and Ports of Call by far the most valuable trip-planning book among cruise guides. Our authors, noted cruise experts who've personally checked out every ship sailing in and around North America, offer candid and unbiased opinions on them all. They are completely up to date, with all the latest developments and the newest ships. You'll also get complete coverage of the major port destinations, with advice on how to spend your limited time ashore.

Europe on 5 Dollars a Day *Frommers Climate change is causing unprecedented damage to our ecosystem. Increasing temperatures, ocean warming and acidification, severe droughts, wildfires, altered precipitation patterns, melting glaciers, rising sea levels and amplification of extreme weather events have direct implications for our food systems. While the impacts of such environmental factors on food security are well known, the effects on food safety receive less attention. The purpose of Climate change: Unpacking the burden on food safety is to

identify and attempt to quantify some current and anticipated food safety issues that are associated with climate change. The food safety hazards considered in the publication are foodborne pathogens and parasites, harmful algal blooms, pesticides, mycotoxins and heavy metals with emphasis on methylmercury. There is also, a dedicated section on the benefits of forward-looking approaches such as horizon scanning and foresight, which will not only aid in anticipating future challenges in a shifting global food safety landscape, but also help build resilient food systems that can be continually updated as more knowledge is assimilated. By building a more widespread and better understanding of the consequences climate change has on food safety, it is hoped that this document will aid in fostering stronger international cooperation in making our food safer by reducing the global burden of these concerns.
