This updated edition of *Focus Groups: A Practical Guide for Applied Research* walks readers step by step through the "how-tos" of conducting

focus group research. Using an engaging, straightforward writing style, authors Richard A. Krueger and Mary Anne Casey draw on their many years of hands-on experience in the field to cut through theory and offer practical guidance on every facet of the focus group process, including tips for avoiding problems and pitfalls. The Fifth Edition is updated with the latest research and technological innovations and includes new coverage on planning with analysis in mind;

creating conversational questions that have the potential for producing unique and valuable insights; the art of hosting a focus group; common sense thinking about reporting; more efficient strategies for planning the study; and emerging areas of focus group research, such as conducting cross-cultural, international, and Internet focus groups. "Krueger and Casey's book does a magnificent job of incorporating both theoretical and practical approaches to the study

of focus groups. It is the only hands-on book which explores the process of focus group research.” ?

Employers are increasingly recruiting their workers into politics to change elections and public policy-sometimes in coercive ways. Using a diverse array of evidence, including national surveys of workers and employers, as well as in-depth interviews with top corporate managers,

Alexander Hertel-Fernandez's *Politics at Work* explains why mobilization of workers has become an appealing corporate political strategy in recent decades. The book also assesses the effect of employer mobilization on the political process more broadly, including its consequences for electoral contests, policy debates, and political representation. Hertel-Fernandez shows that while employer political recruitment has some benefits for American

democracy-for instance, getting more workers to the polls-it also has troubling implications for our democratic system. Workers face considerable pressure to respond to their managers' political requests because of the economic power employers possess over workers. In spite of these worrisome patterns, Hertel-Fernandez found that corporate managers view the mobilization of their own workers as an important strategy for influencing politics. As he shows, companies

consider mobilization of their workers to be even more effective at changing public policy than making campaign contributions or buying electoral ads. Hertel-Fernandez closes with an array of solutions that could protect workers from employer political coercion and could also win the support of majorities of Americans. By carefully examining a growing yet underappreciated political practice, *Politics at Work* contributes to our understanding of the

changing workplace, as well as the increasing power of corporations in American politics. It is essential reading for anyone interested in the connections between inequality, public policy, and American democracy. *Vulnerability Assessment of Physical Protection Systems* SAGE Publications identifies various challenges faced by physical educators and offers solutions for overcoming them.

Springer Science & Business Media Critics of student self-reported data claim that the accumulated corpus of research documenting student learning on the basis of survey responses stands on shaky ground. This volume argues that scholarship on proper use of student self-report data is woefully underdeveloped and contributing authors offer several important insights to assist IR practitioners in identifying potential limitations associated with self-report data. Volume

editors Serge Herzog, director of institutional analysis at the University of Nevada, Reno, and Nicholas A. Bowman, postdoctoral research associate in the Center for Social Concerns at the University of Notre Dame, have assembled contributing authors who are leading scholars in the field of college student self-reports. Combined, the chapters draw on data from a mix of colleges and universities, capturing student growth at different stages of the undergraduate

experience, and even beyond graduation. This is the 150th volume of the Jossey-Bass quarterly report series *New Directions for Institutional Research*. Always timely and comprehensive, *New Directions for Institutional Research* provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination, information analysis, program evaluation, and institutional management. **IPO Banks** Emerald

Taking into account both traditional and emerging modes, this comprehensive new Handbook covers all major methodological and statistical issues in designing and analyzing surveys. With contributions from the

world's leading survey methodologists and statisticians, this invaluable new resource provides guidance on collecting survey data and creating meaningful results. Featuring examples from a variety of countries, the book reviews such things as how to deal with sample designs, write survey questions, and collect data on the Internet. A thorough review of the procedures associated with multiple modes of collecting sample survey information and applying

that combination of methods that fit the situation best is included. The International Handbook of Survey Methodology opens with the foundations of survey design, ranging from sources of error, to ethical issues. This is followed by a section on design that reviews sampling challenges and tips on writing and testing questions for multiple methods. Part three focuses on data collection, from face-to-face interviews, to Internet and interactive

voice response, to special challenges involved in mixing these modes within one survey. Analyzing data from both simple and complex surveys is then explored, as well as procedures for adjusting data. The book concludes with a discussion of maintaining quality. Intended for advanced students and researchers in the behavioral, social, and health sciences, this "must have" resource will appeal to those interested in conducting or using survey data from

anywhere in the world, especially those interested in comparing results across countries. The book also serves as a state-of-the-art text for graduate level courses and seminars on survey methodology. A companion website contains additional readings and examples. *Baccalaureate* VK Global Publications Electronic Inspection Copy available for instructors here This comprehensive text brings together in one volume both consideration of the core

My most powerful learning experiences came from chats with my students regarding their learning activities. They were full of questions and ideas about learning activities that were important to them. They showed me how to think out of the box. They helped me to think about them as learners rather than focusing on dividing the

textbooks up into time periods for the day. Schools are for children and should be about their learning activities. The learning activities should be brain compatible utilizing the knowledge about the brain and learning. Brain compatible activities are built on previous experiences, utilizing children s interest and needs to be challenging.
