Taking the example of the nuclear bombing of Hiroshima as a case in point, Francis Winters analyzes the ethics of warfare, demonstrating how the examples of World War II hold relevance to the contemporary world. The volume examines the ethics of Japan's refusal to surrender and seeks to balance the verdict of responsibility for Hiroshima by extending the analysis to the ethics of the end of the war. It also illustrates how two displays of American naval and munitions power had an impact on Japan comparable

to the September 11, 2001 assaults on America. Linking his study with two contemporary films on Iwo Jima, the author illustrates how the 1940s were an era of costly triumph that can still inspire national pride in American citizens. Unique in concept and approach, this volume will have relevance to scholars interested in both historical and contemporary politics, US-Japan relations as well as foreign policy and the ethics of warfare.

An “engrossing” history of the restaurant atop the World Trade Center “that ruled the New York City skyline from April 1976 until September 11, 2001” (Booklist, starred review). In the 1970s, New York City was plagued by crime, filth, and an ineffective government. The city was falling apart, and even the newly constructed World Trade Center threatened to be a fiasco. But in April 1976, a quarter-mile up on the 107th floor of the North Tower, a new restaurant called Windows on the World opened its doors—a glittering sign that New York wasn’t done just yet. In *The Most Spectacular Restaurant in the World*, journalist Tom Roston tells the complete history of this incredible restaurant, from its stunning \$14-million opening to 9/11 and its tragic end. There are stories of the people behind it, such as Joe Baum, the celebrated restaurateur, who was said to be the only man who could outspend an unlimited budget; the well-tipped waiters; and the cavalcade of famous guests as well as everyday people celebrating the key moments in their lives. Roston also charts the changes in American food, from baroque and theatrical to locally sourced

and organic. Built on nearly 150 original interviews, *The Most Spectacular Restaurant in the World* is the story of New York City’s restaurant culture and the quintessential American drive to succeed. “Roston also digs deeply into the history of New York restaurants, and how *Windows on the World* was shaped by the politics and social conditions of its era.” —*The New York Times* “The city’s premier celebration venue, deeply woven into its social, culinary and business fabrics, deserved a proper history. Roston delivers it with power, detail, humor and heartbreak to spare.” —*New York Post* “A rich, complex account.” —*Kirkus Reviews* (starred review)

Remembering Trauma National Geographic Books

Are horrific experiences indelibly fixed in a victim's memory? Or does the mind protect itself by banishing traumatic memories from consciousness? How victims remember trauma is the most controversial issue in psychology today, spilling out of consulting rooms and laboratories to capture headlines, rupture families, provoke legislative change, and influence criminal trials and civil suits. This

book, by a clinician who is also a laboratory researcher, is the first comprehensive, balanced analysis of the clinical and scientific evidence bearing on this issue--and the first to provide definitive answers to the urgent questions at the heart of the controversy. Synthesizing clinical case reports and the vast research literature on the effects of stress, suggestion, and trauma on memory, Richard McNally arrives at significant conclusions, first and foremost that traumatic experiences are indeed unforgettable. Though people sometimes do not think about disturbing experiences for long periods of time, traumatic events rarely slip from awareness for very long; furthermore, McNally reminds us, failure to think about traumas--such as early sexual abuse--must not be confused with amnesia or an inability to remember them. In fact, the evidence for repressed memories of trauma--or even for repression at all--is surprisingly weak. A magisterial work of scholarship, panoramic in scope and nonpartisan throughout, this unflinching lucid work will prove indispensable to anyone seeking to understand how people remember trauma.

An account of the life and work of the architect Minoru Yamasaki that leads the author to consider how (and for whom) architectural history is written. *Sandfuture* is a book about the life of the architect Minoru Yamasaki (1912–1986), who remains on the margins of history despite the enormous influence of his work on American architecture and society. That Yamasaki's most famous projects—the Pruitt-Igoe apartments in St. Louis and the original World Trade Center in New York—were both destroyed on national television, thirty years apart, makes his relative obscurity all the more remarkable. *Sandfuture* is also a book about an artist interrogating art and architecture's role in culture as New York changes drastically after a decade bracketed by terrorism and natural disaster. From the central thread

of Yamasaki's life, *Sandfuture* spirals outward to include reflections on a wide range of subjects, from the figure of the architect in literature and film and transformations in the contemporary art market to the perils of sick buildings and the broader social and political implications of how, and for whom, cities are built. The result is at once sophisticated in its understanding of material culture and novelistic in its telling of a good story.

How can this leader address the issues created by the physical plant of the building itself? How can a principal treat the difficult waters of the social and political context of the outsideworld that impacts on the school?

Throughout the 2008 season, each game played at the world's most beloved stadium brought "The House That Ruth Built" closer to shutting its gates forever. Players envisioned running off the field one last time. Vendors anticipated selling their last bags of peanuts. Fans readied themselves to raise their voices in one final cheer. In *Remembering Yankee Stadium*, Harvey Frommer—one of the country's leading baseball authorities—takes us on a journey through the stadium's storied 85-year old history, from 1927's unstoppable Murderers' Row, to Joe DiMaggio's unfathomable hitting streak, to Maris and Mantle's thrilling race for the home-run record, to the hirings—and the firings—of Billy Martin, to Derek Jeter's rise to greatness. The moments and the magic that filled this great stadium are brought alive again through dozens of interviews, a gripping

narrative, and a priceless collection of photographs and memorabilia. As the new stadium steps into the forefront, the old ballpark across the street recedes into memory, taking with it the glory and grandeur, the history and heroics, the magic and the mystique of its nearly nine decade-long life. This book captures that time and is at once an album, a keepsake, and a record of its fabulous run.

A stirring photographic tribute to the World Trade Center towers, which were the icons of the New York City skyline. Rising dramatically above all other skyscrapers at the tip of Manhattan, the World Trade Center symbolized New York. From any direction the Towers were lodestars, Manhattan's local mountains. Nearly a decade after the dark events of 9/11, New Yorkers continue to come to terms with the tragedy, and to reminisce about the views of the Towers they once had from their homes and offices. Visitors, too, are remembering how the WTC looked as they approached Manhattan by car, plane, or from the water. As we mourn for the terrible loss of life, we also want to

remember. The 72 images of the World Trade Center presented in this book depict a New York we once knew, one we are now working to rebuild. For more than two decades, practically since the Twin Towers were erected, Sonja Bullaty and Angelo Lomeo have been photographing these awesome buildings. The pictures featured here portray the WTC from all directions, starting with views from the east at dawn, and ending with evening views from the west. There are captivating panoramas from Brooklyn, Lower Manhattan, New Jersey, and uptown, taken in all seasons, as well as a section showing the grand Plaza at the center of the buildings. Together, they create an unforgettable portrait of the Twin Towers. Introducing this extraordinary collection of photographs, Paul Goldberger's text evokes the Towers and the city they came to symbolize. He recalls how they evolved in the public mind, targets of criticism to beloved American icons. He explains their architectural significance and explores their visceral meaning to New Yorkers. In contrast to books depicting the disaster and the days following it, this photographic memoir will be welcomed by

all of us—New Yorkers and visitors alike—who yearn to remember the way the city was. A portion of the book's proceeds are donated to the Twin Towers Scholarship Program care of Scholarship America.

Remembering 9/11 recalls the afterlife of the tragedy and the shock that led many to ask 'why do they hate us so much?' Engaging with the different voices that attempted to make sense of the trauma, Seidler traces the narratives of fear, loss and vulnerability and the ways in which they evolved into feelings of rage and retribution.

Remembering 9/11 Through the Eyes of a Printmaker Lexington Books

On October 3, 1873, the U.S. Army hanged four Modoc headmen at Oregon's Fort Klamath. The condemned had supposedly murdered the only U.S. Army general to die during the Indian wars of the nineteenth century. Their much-anticipated execution marked the end of the Modoc War of 1872-73. But as Boyd Cothran demonstrates, the conflict's close marked the beginning of a new struggle

over the memory of the war. Examining representations of the Modoc War in the context of rapidly expanding cultural and commercial marketplaces, Cothran shows how settlers created and sold narratives of the conflict that blamed the Modocs. These stories portrayed Indigenous people as the instigators of violence and white Americans as innocent victims. Cothran examines the production and circulation of these narratives, from sensationalized published histories and staged lectures featuring Modoc survivors of the war to commemorations and promotional efforts to sell newly opened Indian lands to settlers. As Cothran argues, these narratives of American innocence justified not only violence against Indians in the settlement of the West but also the broader process of U.S. territorial and imperial expansion.

The Man in the Red Bandanna Macmillan
A first responder's harrowing account of

9/11—the inspirational true story of an American hero who gave nearly everything for others during one of New York City's darkest hours. On September 11, 2001, FDNY Battalion Chief Richard "Pitch" Picciotto answered the call heard around the world. In minutes, he was at Ground Zero of the worst terrorist attack on American soil, as the Twin Towers of the World Trade Center began to burn—and then to buckle. A veteran of the 1993 bombing of the World Trade Center, Picciotto was eerily familiar with the inside of the North Tower. And it was there that he concentrated his rescue efforts. It was in its smoky stairwells where he heard and felt the South Tower collapse. He made the call for firemen and rescue workers to evacuate, while he stayed behind with a skeleton team of men to help evacuate a group of disabled and infirm civilians. And it was in the rubble of the North Tower where Picciotto found himself buried—for more than four hours after the building's collapse.

Trauma at Home Berghahn Books

Psychologists have done a great deal of research on the effects of trauma on the individual, revealing the paradox that

violent experiences are often secreted away beyond easy accessibility, becoming impossible to verbalize explicitly.

However, comparatively little research has been done on the transgenerational effects of trauma and the means by which experiences are transmitted from person to person across time to become intrinsic parts of the social fabric. With eight contributions covering Africa, Central and South America, China, Europe, and the Middle East, this volume sheds new light on the role of memory in constructing popular histories - or historiographies - of violence in the absence of, or in contradistinction to, authoritative written histories. It brings new ethnographic data to light and presents a truly cross-cultural range of case studies that will greatly enhance the discussion of memory and

violence across disciplines.

Wars do not fully end when the shooting stops. As G. Kurt Piehler reveals in this book, after every conflict from the Revolution to the Persian Gulf War, Americans have argued about how and for what deeds and heroes wars should be remembered. Drawing on sources ranging from government documents to *Embalmer's Monthly*, Piehler recounts efforts to commemorate wars by erecting monuments, designating holidays, forming veterans' organizations, and establishing national cemeteries. The federal government, he contends, initially sidestepped funding for memorials, thereby leaving the determination of how

and whom to honor in the hands of those with ready money—and those who responded to them. In one instance, monuments to “Yankee heroes” erected by the Daughters of the American Revolution were countered by immigrant groups, who added such figures as Casimir Pulaski and Thaddeus Kosciuszko to the record of the war. Piehler argues that the conflict between these groups is emblematic of the ongoing reinterpretation of wars by majority and minority groups, and by successive generations. Demonstrating that the battles over the Vietnam Veterans Memorial are not unique in American history, *Remembering War the American Way* reveals that the memory of war is intrinsically bound to the pluralistic definition of national identity.
