Human Development Indices and Indicators: 2018 Statistical Update is being released to ensure consistency in reporting on key human development indices and statistics. It provides a brief overview of the state of human development—snapshots of current conditions as well as long-term trends in human development indicators. It includes a full statistical annex of human development

composite indices and indicators across their various dimensions. This update includes the 2017 values and ranking for the HDI and other composite indices as well as current statistics in key areas of human development for use by policymakers, researchers and others in their analytical, planning and policy work. In addition to the standard HDR tables, statistical dashboards are included to draw attention to the relationship between human well-being and five topics: quality of human development, life-course gender gaps, women's empowerment, environmental sustainability and socioeconomic

sustainability. Accompanying the statistical annex is an overview of trends in human development, highlighting the considerable progress, but also the persistent deprivations and disparities. [Decent Work in Global Supply Chains](#) Elsevier Water-related infrastructure could contribute significantly to the development of the Mekong region. At the same time, poor water infrastructure could lead to development challenges for the countries in the region. Innovation for Water Infrastructure Development in the Mekong Region discusses

the challenges facing the region as well as the possible innovative policy options, including those used in Emerging Asian countries, and with reference to the experiences of OECD member countries. It provides analysis and recommendations for the region's policy makers to consider in their efforts to improve water infrastructure. The report first provides an overview of the socio-economic contributions and environmental challenges of the Mekong River. It then presents some potential new financing options for the development of water infrastructure, using digital tools such as Fintech and blockchain. It also examines the potential of using the spillover effect of tax revenues to attract private finance. It then goes on to discuss the importance of strengthening water infrastructure resilience against natural disasters, including the current COVID-19 pandemic, and finally analyses the challenges of water regulations in the Mekong region.

Organic agriculture world-wide allows farmers to produce healthy food with low levels of external inputs, and often shortens the value chains, giving farmers a higher share of the consumer dollar. This book reports on long-term

comparative organic farming systems research trials carried out over the last four years in South Africa's Southern Cape, as well as research on the organic sector and the technical tools it requires in South Africa, Zambia, Uganda and Tanzania. The trials show how the yield gap between organic and conventional crops was closed over 3 years. Water use efficiency was also greater in the organic farming system, and pests and diseases were effectively controlled using biological products. Farmer training approaches, soil carbon analysis, participatory guarantee systems, the Zambian organic farming sector (agronomy) and Ugandan organic farmer training support, and a sector plan for southern African organic farming are examined.

Regional Biodiversity Strategy

The Addis Ababa principles and guidelines for the sustainable use of biodiversity provide a framework for assisting governments, indigenous and local communities, resource managers, the private sector and other stakeholders, about how to ensure that their uses of biological diversity will not lead to its long-term

decline. The practical principles in most instances apply to both consumptive and non-consumptive uses of biodiversity components. They take into account requirements related to policies, laws, and regulations; management of biological diversity; socio-economic conditions; and information, research, and education.

#### **Development**

'An impressive collection of authoritative treatments of major current and ongoing topics in public sector human resource management, provided by both well-established experts and up-and-coming scholars who are becoming leaders in the field. A valuable resource for courses on the topic and an important reference for scholars and those seeking to maintain expert knowledge about it.' – Hal G. Rainey, The University of Georgia, US  
This insightful book presents current thinking and research evidence on the role of human resource management policies and practices in increasing service quality, efficiency and organizational

effectiveness in the public sector. Internationally, public sector organisations face enormous challenges, including increasingly uncertain political and economic environments, more vigilant and cost-conscious governments, rapidly evolving community needs and an ageing workforce. This collection examines a range of HRM-related topics that will influence the capacity of public sector agencies to negotiate and respond to the challenges ahead. These topics include managing public sector human resources during an economic downturn, enhancing the satisfaction and motivation of public sector employees, attracting and retaining talent, leadership development, and case studies in successful public sector organizational change. With each chapter drawing on the latest research, but also emphasizing the practical implications, this collection is suitable for practitioners, researchers and students alike. It will also be valuable for HR specialists and managers of HR units in the public sector.

The first part of this book looks at several types of crimes, old and new, from the angle of human rights and human rights violations. The second part sketches the influence of the human rights paradigm on the criminal justice system in North America and Europe. The last part addresses issues relating to crime and human rights.

*Crime and Human Rights* Provides an overview of the phenomenon of the informal economy, its impact on the attainment of decent work for all workers and employers and the ILO's approach to the transition to formality, as set out in the 2002 Conclusions. Looks at the regulatory environment relating to the informal economy at the international and national levels, with examples of existing laws and practice from different regions, legal systems, traditions and circumstances adopted by ILO constituents to ensure a progressive transition to the formal economy. Examines the need for an integrated policy framework, encompassing the ILO's four strategic objectives (fundamental principles and rights at

work, employment, social protection and social dialogue) adapted to the national context of each member State for a progressive transition to the formal economy and decent work.
