Young readers can find out too, about the latest scientific discoveries that have changed the way we see these fascinating prehistoric animals - from new feathered dinosaurs to how and where they lived.

Dinosaurs Running Press Kids

From the smallest seeds to the tallest trees, this beautiful children's guide is a must-have for any budding botanist or plant lover. We can't live without plants. We need them for food, shelter, even the air we breathe, yet we know surprisingly little

about them. Why do thistles bristle with spines? How do some plants trap and eat insects? Did you know there are trees more than 5,000 years old? *Trees, Leaves, Flowers & Seeds* explores the mysterious world of plants to find the answers to these and many more questions. This picture-packed encyclopedia shows a wonderful variety of plants, from fantastic ferns to spiky cacti. It explores the diverse habitats of plants, herbs and spices that make our food tasty, and even how astronauts grow plants in space. It also takes a fun, more sideways look at some truly weird and wonderful plants, including leaves that are home to frogs, orchids that look like parrots, and seeds that spin like helicopters. So open this fascinating ebook and find out more about the amazing world of trees, leaves, flowers, and seeds.

Encyclopedia Prehistorica Dorling Kindersley Ltd

Introduces dinosaurs, including how scientists know they existed, what they ate, how they cared for their young, and what the descendants of dinosaurs may look like today.

The Dinosaur Book Templar Publishing

In *Team Dog*, former Navy SEAL Mike Ritland uses years' of experience to explain the science behind gaining a dog's trust, and offers invaluable steps for how to achieve any level of obedience. His unique approach uses entertaining examples and anecdotes from his work with dogs on and off the battlefield and direct tips from the Navy SEAL guidebook to teach dog owners how to choose the perfect dog for their household, establish themselves as the team leader, 'master 'command and control,' and solidify their dog's position as the family's ultimate best friend.'

The Illustrated Dinosaur Encyclopedia John Wiley & Sons

Everything around us - trees, buildings, food, light, water, air and even ourselves - is composed of minute particles, smaller than a nanometre (a billionth of a metre). Quantum physics is the science of these particles and without it none of our electronic devices, from smartphones to computers and microwave ovens, would exist. But quantum physics also pushes us to the very boundaries of what we know about science, reality and the structure of the universe. The world of quantum physics is an amazing place, where quantum particles can do weird and wonderful things, acting totally unlike the objects we experience in day-to-day life. How can atoms exist in two places at once? And just how can a cat be dead and alive at the same time? Find out more with this entertaining illustrated guide to the fascinating, mysterious world of quantum physics.

What's Where on Earth? Dinosaur Atlas Redleaf Press

Putnam's Sons Features more than 35 pop-ups. Includes up-to-the-minute information about popular dinosaurs as well as many lesser known varieties.

Delibros Penguin

Now in paperback, a sobering look at the threats to privacy posed by the new information technologies. Called "one of the best books yet written on the new information age" by Kirkus Reviews and now available in paperback, *The End of Privacy* shows how vast amounts of personal information are moving into corporate hands. Once there, this data can be combined and used to develop electronic profiles of individuals and groups that are potentially far more detailed, and far more intrusive, than the files built up in the past by state police and security agencies. Reg Whitaker shows that private e-mail can be read; employers can monitor workers' every move throughout the work day; and the U.S. Treasury can track every detail of personal and business finances. He goes on to demonstrate that we are even more vulnerable as consumers. From the familiar - bar-coding, credit and debit cards, online purchases - to the seemingly sci - -"smart cards" that encode medical and criminal records, and security scans that read DNA - *The End of Privacy* reveals how ordinary citizens are losing control of the information about them that is available to anyone who can pay for it.

Libros españoles Turtleback
