How the mystery of the Bible's greatest story shaped geology: a MacArthur Fellow presents a surprising perspective on Noah's Flood. In Tibet, geologist David R. Montgomery heard a local story about a great flood that bore a striking similarity to Noah's Flood. Intrigued, Montgomery began investigating the world's flood stories and—drawing from historic works by theologians, natural philosophers, and scientists—discovered the counterintuitive role Noah's Flood played in the development of both geology and creationism. Steno, the grandfather of geology, even invoked the Flood in laying geology's founding principles based on his observations of northern Italian landscapes. Centuries later, the founders of modern creationism based their irrational view of a global flood on a perceptive critique of geology. With an explorer's eye and a refreshing approach to both faith and science, Montgomery takes readers on a journey across landscapes and cultures. In the process we discover the illusive nature of truth, whether viewed through the lens of science or religion, and how it changed through history and continues changing, even today.

Redeeming Love Twelve

NATIONAL BESTSELLER • SOON TO BE A MAJOR MOTION PICTURE • A favorite Christian romance classic—a tragically wounded soul, the man called to marry her, and the only love that heals all—now available in a beautiful keepsake, linen-bound edition! “A literary masterpiece, reminding us that God's love is unconditional.”—Debbie Macomber California's gold country, 1850. A time when men sold their souls for a bag of gold and women sold their bodies for a place to sleep. Angel expects nothing from men but betrayal. Sold into prostitution as a child, she survives by keeping her hatred alive. And what she hates most are the men who use her, leaving her empty and dead inside. Then she meets Michael Hosea, a man who seeks his Father's heart in everything. Michael obeys God's call to marry Angel and to love her unconditionally. Slowly, day by day, he defies Angel's every bitter expectation, until despite her resistance, her frozen heart begins to thaw. But with her unexpected softening comes overwhelming feelings of unworthiness and fear. And so Angel runs. Back to the darkness, away from her husband's pursuing love, terrified of the truth she no longer can deny: her final healing must come from the One who loves her even more than Michael does . . . the One who will never let her go. A powerful retelling of the story of Gomer and Hosea, Redeeming Love is a life-changing story of God's unconditional, redemptive, all-consuming love.

Jesus: His Story in Stone Thomas Nelson

Despite her success setting a self-supported Fastest Known Time record on the Pacific Crest Trail in 2013, Heather “Anish” Anderson still had such deep-seated insecurities that she became convinced her feat had been a fluke. So two years later she set out again, this time hiking through mud, rocks, and mountain blazes to crush her constant self-doubt and seek the true source of her strength and purpose. The 2,180 miles of the Appalachian Trail, from Maine to Georgia, did not make it easy. Anderson struggled with its infamous rain, humidity, insects, and steep grades for 54 days. But because she had to fight for every step, she knew when she reached the summit of Springer Mountain, the AT's southern terminus, that she had fully earned the trail. Of greater value, she learned to love herself and her body, and to feel the depth of her power. Examining emotional scars as well as her relationship with her mother, Anderson's deeply internal yet highly physical journey in Mud, Rocks, Blazes is an essential story.

The Rocks Thomas Nelson

A revelatory primer on what it means to be human, from "the perfect guide for a course correction in life" (Deepak Chopra)—and a mind-opening manual of initiation into the central mystery of existence. At the root of human conflict is our fundamental misunderstanding of who we are. The illusion that we are isolated beings, unconnected to the rest of the universe, has led us to view the "outside" world with hostility, and has fueled our misuse of technology and our violent and hostile subjugation of the natural world. To help us understand that the self is in fact the root and ground of the universe, Watts has crafted a revelatory primer on what it means to be human—and a mind-opening manual of initiation into the central mystery of existence. In *The Book*, Alan Watts provides us with a much-needed answer to the problem of personal identity, distilling and adapting the Hindu philosophy of Vedanta.

Fourteen-year-old Dylan is sent to live with his estranged grandfather, Angus. Basically strangers, the two avoid each other as best they can. One day Dylan discovers a young orca stranded high up on the rocky beach. Dylan runs to tell his grandfather. There's nothing that can be done, says Angus. The sun is coming up, and soon the orca will die of exposure. But Dylan knows he has to try to save the whale. He collects towels to cover the delicate skin of the orca and begins transporting buckets of water from the ocean below to keep it hydrated. It's grueling work, and it will be hours before the tide comes back in and the water is high enough for the orca to swim free. Angus is moved by his grandson's determination and helps as best he can. They both desperately hope that soon the orca will be able to join its family, who have been calling out to it just offshore. *On the Rocks* is an inspiring story about the ups and downs of family.

A Time to Embrace Zondervan

Musician and songwriter Phil Madeira turns his talent for evocative lyricism from the stage to the page as he invites us to wander with him on his relentless search for God. From a joke involving a glass eye in a family that doesn't always see eye-to-eye, a judgmental "Grandmonster" who makes an (almost) redeeming connection in her final moments, or a crumbling marriage and the surprise of new love, Madeira's raw and tender stories illustrate the journey we all share, along with wise reflections to get through it. Roaming from his evangelical roots to discover a successful career in Americana music, Madeira boils away the detritus of religion to discover a faith "on the rocks": sometimes leaving him stranded on the rocky shore, sometimes savored like a smooth drink on a summer's day, but always leading to a God "not worrying about changing or chastising his broken children, but singing in a low, guttural hum, forged in the heat of his passion for humans, a God almighty love song." Just like a sweet old hymn can rekindle even a doubting cynic's longing for God, Madeira's beckoning voice can turn a wandering heart toward home with laughter and hope.

"People of good will wish to see science and religion at peace. . . . I do not see how science and religion could be unified, or even synthesized, under any common scheme of explanation or analysis; but I also do not understand why the two enterprises should experience any conflict." So states internationally renowned evolutionist and bestselling author Stephen Jay Gould in the simple yet profound thesis of his brilliant new book. Writing with bracing intelligence and elegant clarity, Gould sheds new light on a dilemma that has plagued thinking people since the Renaissance. Instead of choosing between science and religion, Gould asks, why not opt for a golden mean that accords dignity and distinction to each realm? At the heart of Gould's penetrating argument is a lucid, contemporary principle he calls NOMA (for nonoverlapping magisteria)—a "blessedly simple and entirely conventional resolution" that allows science and religion to coexist peacefully in a position of respectful noninterference. Science defines the natural world; religion, our moral world, in recognition of their separate spheres of influence. In elaborating and exploring this thought-provoking concept, Gould delves into the history of science, sketching affecting portraits of scientists and moral leaders wrestling with matters of faith and reason. Stories of seminal figures such as Galileo, Darwin, and Thomas Henry Huxley make vivid his argument that individuals and cultures must cultivate both a life of the spirit and a life of rational inquiry in order to experience the fullness of being human. In his bestselling books *Wonderful Life*, *The Mismeasure of Man*, and *Questioning the Millennium*, Gould has written on the abundance of marvels in human history and the natural world. In *Rocks of Ages*, Gould's passionate humanism, ethical discernment, and erudition are fused to create a dazzling gem of contemporary cultural philosophy. As the world's preeminent Darwinian

theorist writes, "I believe, with all my heart, in a respectful, even loving concordat between . . . science and religion."

Birthing Forth the Treasures of the Father's Heart Anchor

NATIONAL BESTSELLER • From the author of *Into the Wild* and *Into Thin Air*, this extraordinary work of investigative journalism takes readers inside America's isolated Mormon Fundamentalist communities. Defying both civil authorities and the Mormon establishment in Salt Lake City, the renegade leaders of these Taliban-like theocracies are zealots who answer only to God; some 40,000 people still practice polygamy in these communities. At the core of Krakauer's book are brothers Ron and Dan Lafferty, who insist they received a commandment from God to kill a blameless woman and her baby girl. Beginning with a meticulously researched account of this appalling double murder, Krakauer constructs a multi-layered, bone-chilling narrative of messianic delusion, polygamy, savage violence, and unyielding faith. Along the way he uncovers a shadowy offshoot of America's fastest growing religion, and raises provocative questions about the nature of religious belief.
