The only serious competitor to Emily Post as etiquette maven to America between the wars, LILLIAN EICHLER WATSON (b. 1902) was a 19-year-old copywriter for the book publisher Doubleday when she was commissioned to rewrite the outdated Encyclopedia of Etiquette by Emily Holt. This is the guide to good manners she produced in 1921, mining her own

experience as a social misfit and would-be social climber, and it was a huge hit with those aspiring to a grander station. Volume I covers: [why it pays to be agreeable [the secret of social success [engagements and weddings [how and when to make an introduction [the intricacies of the social call [calling cards for the young lady, the married couple, and others [correspondence and invitations [appropriate dress for children [addressing titled people [and much more.

When Ford rolled out the Mustang in April 1964 it was an instant hit. Even with its immense popularity it didn't stop Ford Corporate, zone managers, and dealerships from taking it an extra step further. Just two short months later, the first special-edition Mustang debuted at the Indianapolis 500 tasked with pacing the race, and it's been full throttle ever since. This book examines more than 300 special-edition Mustangs from 1964 through today. Coverage includes factory offerings such as the 2001 Bullitt and SVT Cobras, regional promotions including the Twister Special, third-party tuners such as

Roush and Saleen, and factory race cars including the 1968-1/2 Cobra Jets and the 2000 Cobra-R. You may find Mustangs in this book that you had no idea even existed! Never has a volume this detailed and with this many model Mustangs been offered published. The authors have taken their decades of research and logged them into a single compilation. Each Mustang is accompanied by production numbers, key features, and photos of surviving cars whenever possible. This book is sure to be a valued resource in your Mustang memorabilia collection! p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." - an excerpt

Matt Keegan interviews artists and commissions writing to reassess the 1990s as the moment when the Democratic Party abandoned its New Deal values and swung to the right In the wake of the Trump election, artist Matt Keegan (born 1976) began investigating the Democratic Party's shifts over recent decades. In the late '80s, members of the Democratic Leadership Council successfully moved the party's platform to the right by including a pro-business, pro-military, interventionist agenda, and downplaying social infrastructure as a calculated break from its New Deal-era foundation. This shift led to Bill Clinton's consecutive terms. 1996 captures this pivotal time in American politics and society through the experience of artists who completed their undergraduate studies in that year and voted for Clinton, and others who were born in 1996 and voted for the first time in 2016. Essays focus on cultural and ideological shifts from that time, such as the 1994 Crime Bill, 1996 Immigration Act, the Telecommunications Act, the start of Fox News and beyond.

 Spearhead of Logistics is a narrative branch history of the U.S. Army's Transportation Corps, first published in 1994 for transportation personnel and reprinted in 2001 for the larger Army community. The Quartermaster Department coordinated transportation support for the Army until World War I revealed the need for a dedicated corps of specialists. The newly established Transportation Corps, however, lasted for only a few years. Its significant utility for coordinating military transportation became again transparent during World War II, and it was resurrected in mid-1942 to meet the unparalleled logistical demands of fighting in distant theaters. Finally becoming a permanent branch in 1950, the Transportation Corps continued to demonstrate its capability of rapidly supporting U.S. Army operations in global theaters over the next fifty years. With useful lessons of high-quality support that validate the necessity of adequate

transportation in a viable national defense posture, it is an important resource for those now involved in military transportation and movement for ongoing expeditionary operations. This text should be useful to both officers and noncommissioned officers who can take examples from the past and apply the successful principles to future operations, thus ensuring a continuing legacy of Transportation excellence within Army operations. Additionally, military science students and military historians may be interested in this volume.

Native plants are a foundation of ecological function, affecting soil conservation, wildlife habitat, plant communities, invasive species, and water quality. Establishing locally-adapted, self-sustaining plant communities can also support transportation goals for safety and efficiency. Past obstacles to establishing native plant communities on roadsides

have been technical, informational, and organizational. Effective strategies and practical techniques for revegetating the disturbed conditions with limited resources must be made available to practitioners. Multiple disciplines, ranging from engineering to soil science, ecology, botany, and wildlife science, must be able to work cooperatively, not in isolation. This report offers an integrated approach to facilitate the successful establishment of native plants along roadsides and other areas of disturbance associated with road modifications. It guides readers through a comprehensive process of: 1) initiating, 2) planning, 3) implementing, and 4) monitoring a roadside revegetating project with native plants.

Offers a coherent strategy for ending oil dependence, starting with the United States but applicable worldwide. There are many analyses of the oil problem. This synthesis is the first roadmap of the oil solution, one led by business for profit, not dictated by government for reasons of ideology. This roadmap is independent,

peer-reviewed, written for business and military leaders, and co-funded by the Pentagon. It combines innovative technologies and new business models with uncommon public policies: market-oriented without taxes, innovation-driven without mandates, not dependent on major (if any) national legislation, and designed to support, not distort, business logic.

When two sisters set out across a remote stretch of Montana road to visit their friend, little do they know it will be the last time anyone might ever hear from them again. The girls—and their car—simply vanish. Former police investigator Cody Hoyt has just lost his job and has fallen off

the wagon after a long stretch of sobriety. Convinced by his son and his former rookie partner, Cassie Dewell, he begins the drive south to the girls' last known location. As Cody makes his way to the lonely stretch of Montana highway where they went missing, Cassie discovers that Gracie and Danielle Sullivan aren't the first girls who have disappeared in this area. This majestic landscape is the hunting ground for a killer whose viciousness is outmatched only by his intelligence. And he might not be working alone. Time is running out for Gracie and Danielle...Can Cassie overcome her doubts and lack of experience and use her innate skill? Can Cody Hoyt battle his own demons and find this killer before another victim vanishes on the highway?

"Just what is a Muscle Car?" Road Test magazine asked in June 1967. The answer: "Exactly what the name implies. It is a product of the American car industry adhering to the hot rodder's philosophy of taking a small car and putting a BIG engine in it. . . . The Muscle Car is Charles Atlas kicking sand in the face of the 98 horsepower weakling." Unconcerned with such trivial details as comfort and handling, the vintage American muscle car was built for straight-line speed and quickly became the ride of choice for power-hungry racers and serious gearheads. In a country where performance was measured in brute force, a quarter mile at a time, the muscle car was the perfect machine. In the intervening years, these down-and-dirty, high-performing beauties have earned their place in the automotive pantheon. As

prized by collectors and aficionados as they are by denizens of garages and drag strips, classic muscle cars now fetch upwards of a million dollars at auctions and feature in any story of America's automotive glory days. The icons of muscle car art—including Camaro and Chevelle SS, the Hemi and 440-6 'Cuda, Challenger, Roadrunner, Super Bee, GTX, Super Bird, Daytona Charger, Super Cobra Jet and Boss Mustang, Talladega Torino, Buick GSX and W30 Oldsmobile 442, and AMX Javelin—are all here, on full display in this lavishly illustrated volume, each described in a detailed essay followed by a gallery of portraits and special gatefold presentations that capture the art of the muscle car at its finest.

Spearhead of Logistics

From the late 1960s until the end of the Cold War, the United States Air Force acquired and flew Russian-made MiG jets, culminating in a secret squadron dedicated to exposing American fighter pilots to enemy technology and tactics. Red Eagles tells the story of this squadron from the first tests of MiGs following the Vietnam War when the USAF had been woefully under-prepared in aerial combat.

These initial flights would develop into the "black" or classified program known internally as Constant Peg. At a secret air base in Nevada, ace American fighter pilots were presented with a range of different MiG jets with a simple remit: to expose "the threat" to as many of their brethren as possible. Maintaining and flying these "assets" without spare parts or manuals was an almost impossible task, putting those flying the MiGs in mortal danger on every flight. Despite these challenges, in all more than 5,900 American aircrews would train against America's secret MiGs, giving them the skills they needed to face the enemy in real combat situations. For the first time, this book tells the story of Constant Peg and the 4477th Red Eagles Squadron in the words of the men who made it possible.
