Domestic demand continued to grow at rapid rates, despite corrective fiscal and monetary policy measures. Although trade and financial sector reforms advanced and foreign direct investment (FDI) regulations were liberalized, there was less progress in improving the business environment, reducing labor market rigidities, and restructuring and privatizing public enterprises. IMF staff stressed the need for further advances in trade liberalization, improved fiscal management, financial system restructuring, labor market reform, privatization, and elimination of subsidies. The managed float exchange regime remains appropriate for Iran.

These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. NOTE: This replaces Standard Prequalification Document: Procurement of Works (September 1999), Stock no. 14601 (ISBN 0-8213-4601-6).

This report was produced by the Working Group on biofuels of the International Panel for Sustainable Resource Managemet. It provides an overview of the key problems and perspectives toward sustainable production and use of biofuels. It is based on an extensive literature study, taking into account recent major reviews. The focus is on so-called first generation biofuels while considering further lines of development. In the overall context of enhancing resource productivity, options for more efficient and sustainable production and use of biomass are examined. In particular, "modern biomass use" for energetic purposes, such as biomass used for (co-)generation of heat and power and liquid biofuels for transport, are addressed and related to the use of biomass for food and material purposes. Whereas improving the efficiency of biomass production plays a certain role towards enhancing sustainability, progress will ultimately depend on a more efficient use of biotic (and abiotic) resources (incl. for instance an increased fuel economy of car fleets), although a full consideration of all relevant strategies towards this end (e.g changing diets high in animal based foods and reducing food losses) is beyond the scope of this report.

Selama ini, masih banyak orang bahkan para pejabat pengambil keputusan yang beranggapan bahwa dengan swakelola maka "segalanya bisa dilakukan dengan swakelola pula". Buku ini akan meluruskan anggapan salah tersebut, dengan pemberian contoh-contoh yang aplikatif dan penjelasan yang mengalir runtut, baik tinjauan dari sisi perencanaan, pengorganisasian, pelaksanaan, pengawasan, maupun perpajakan. Achmad Karsono, Perwakilan BPKP Provinsi Maluku, Trainer dan PKA PB/J, Anggota P3I Kurangnya rujukan yang dapat menjadi pedoman dalam pelaksanaan swakelola

merupakan kendala utama bagi para praktisi. Regulasi yang menjadi satu-satunya referensi harus kembali dijabarkan dalam bentuk buku agar lebih mudah dipahami. New York Times Bestseller Ever wonder how politics turned into a take-no-prisoners blood sport? The New York Times bestselling author of *Stonewalled* pulls back the curtain on the shady world of opposition research and reveals the dirty tricks those in power use to influence your opinions. Behind most major political stories in the modern era, there is an agenda; an effort by opposition researchers, spin doctors, and outside interests to destroy an idea or a person. The tactic they use is the Smear. Every day, Americans are influenced by the Smear without knowing it. Paid forces cleverly shape virtually every image you cross. Maybe you read that Donald Trump is a racist misogynist, or saw someone on the news mocking the Bernie Sanders campaign. The trick of the Smear is that it is often based on some shred of truth, but these media-driven "hit pieces" are designed to obscure the truth. Success hinges on the Smear artist's ability to remain invisible; to make it seem as if their work is neither calculated nor scripted. It must appear to be precisely what it is not. Veteran journalist Sharyl Attkisson has witnessed this practice firsthand. After years of being pitched hit jobs and puff pieces, she's an expert at detecting Smear campaigns. Now, the hard-hitting investigative reporter shares her inside knowledge, revealing how the Smear takes

shape and who its perpetrators are—including Clinton confidant Sidney Blumenthal and, most influential of all, "right-wing assassin turned left-wing assassin" (National Review) political operative David Brock and his Media Matters for America empire. Attkisson exposes the diabolical tactics of Smear artists, and their outrageous access to the biggest names in political media—operatives who are corrupting the political process, and discouraging widespread citizen involvement in our democracy.
