This series is an excellent preparation for the linear and modular mathematics GCSE specifications offered by AQA, Edexcel and OCR. The books for the Foundation tier have been especially praised for helping raise the confidence of students, who as a result have a better understanding of the mathematics and a clearer self awareness of what they've learned. Foundation 1 is the first of two main books for the Foundation tier. It is also designed to follow on from Foundation Transition, a preparatory key stage 4 text for those who have followed a 'support' course in key stage 3.

The Internet's Coming of Age Peter Pauper Press Incorporated
In many ways what is identified today as "cultural globalization" in Eastern Europe has its roots in the Cold War phenomena of samizdat ("do-it-yourself" underground publishing) and tamizdat (publishing abroad). This volume offers a new understanding of how information flowed between East and West during the Cold War, as well as the much broader circulation of cultural products instigated and sustained by these practices. By expanding the definitions of samizdat and tamizdat from explicitly political print publications to include other forms and genres, this volume investigates the wider cultural sphere of alternative and semi-official texts, broadcast media, reproductions of visual art and music, and, in the post-1989 period, new media. The underground circulation of uncensored texts in the Cold War era serves as a useful foundation for comparison when looking at current examples of censorship, independent media, and the use of new media in countries like China, Iran, and the former Yugoslavia.

Working in a world of hurt fills a significant gap in the studies of the psychological trauma wrought by war. It focuses not on soldiers, but on the men and women who fought to save them in casualty clearing stations, hospitals and prison camps. The writings by doctors, nurses, ambulance drivers and other medical personnel reveal the spectrum of their responses that range from breakdown to resilience. Through a rich analysis of both published and unpublished personal from the First World War in the early twentieth century to Iraq in the early twenty-first, Acton and Potter put centre stage the letters, diaries, memoirs and weblogs that have chronicled physical and emotional suffering, many for the first time. Wide-ranging in scope, interdisciplinary in method, and written in a scholarly yet accessible style, *Working in a world of hurt* is essential reading for lecturers and students as well as the general reader.

The goal of this monograph is to develop the theory of wavelet harmonic analysis on the sphere. By starting with orthogonal polynomials and functional Hilbert spaces on the sphere, the foundations are laid for the study of spherical harmonics such as zonal functions. The book also discusses the construction of wavelet bases using special functions, especially Bessel, Hermite, Tchebychev, and Gegenbauer polynomials.

"Brought up on the old Waipa frontier soon after the close of the wars, when an uneasy peace existed between European and Maori, James Cowan imbibed much ancient lore as well as recent history from old-time Maori chiefs and warriors. When commissioned by the Government to write this history, he not only examined a vast amount of written material - he sought out the remaining veterans of the wars (both European and Maori, women as well as men) and from them learned at first hand much that never appears in official documents; and he tramped many a mile to view the scenes of engagements that he might render a faithful account of what happened"--From book jacket.

Modern Social Work Practice is an interactive book designed to provide readers with an opportunity to engage with key aspects of current social work practice. It also provides an excellent digest of the significant literature. Each chapter is introduced with an activity or exercise designed to aid student learning in discrete aspects of practice, building up to a complete curriculum for practice learning. The book builds upon the success and style of *Social Work Practice* (1993) and *The New Social Work Practice* (1998). Mark Doel and Steven M. Shardlow have shaped the book to take account of the National Occupational Standards for Social Work, aiming to provide a creative, practical and up-to-date resource for teaching and learning in line with current practices.

Oscillating between depiction and description, *Object of A Life* addresses Georges Perec's question: How are we to speak of common things? Making an inventory of things that come to hand in the course of daily life, playing with ideas of contradiction, categorisation, improbability and speculation, this book offers an articulation of the space produced between language and drawing.

Data Structures and Problem Solving Using Java, Second Edition provides a practical introduction to data structures and algorithms from the viewpoint of abstract thinking and problem solving, as well as the use of Java. This text has a clear separation of the interface and implementation to promote abstract thinking. Java allows the programmer to write the interface and implementation separately, to place them in separate files and compile separately, and to hide the implementation details. This book goes a step further: the interface and implementation are discussed in separate parts of the book. Part I (Tour of Java), Part II (Algorithms and Building Blocks), and Part III (Applications) lay the groundwork by discussing basic concepts and tools and providing some practical examples, but implementation of data structures is not shown until Part IV (Implementations). Class interfaces are written and used before the implementation is

known, forcing the reader to think about the functionality and potential efficiency of the various data structures (e.g., hash tables are written well before the hash table is implemented).

What most of us know as "the Internet" is actually a set of largely autonomous, loosely coordinated communication networks. As the influence of the Internet continues to grow, understanding its real nature is imperative to acting on a wide range of policy issues. This timely new book explains basic design choices that underlie the Internet's success, identifies key trends in the evolution of the Internet, evaluates current and prospective technical, operational, and management challenges, and explores the resulting implications for decision makers. The committee-composed of distinguished leaders from both the corporate and academic community-makes recommendations aimed at policy makers, industry, and researchers, going on to discuss a variety of issues: How the Internet's constituent parts are interlinked, and how economic and technical factors make maintaining the Internet's seamless appearance complicated. How the Internet faces scaling challenges as it grows to meet the demands of users in the future. Tensions inherent between open innovation on the Internet and the ability of innovators to capture the commercial value of their breakthroughs. Regulatory issues posed by the Internet's entry into other sectors, such as telephony.

Working in a World of Hurt Bildner Verlag

Many of the institutions fundamental to the role of men and women in society today were formed in late antiquity. This path-breaking study offers a comprehensive look at how Christian women of this time initiated alternative, ascetic ways of living, both with and without men. The author studies how these practices were institutionalized, and why later they were either eliminated or transformed by a new Christian Roman elite of men we now think of as the founding fathers of monasticism. - ;Situating in a period that witnessed the genesis of institutions fundamental to this day, this path-breaking study offers a comprehensive look at how ancient Christian women initiated ascetic ways of living, and how these practices were then institutionalized. Using the organization of female asceticism in Asia Minor and Egypt as a lever, the author demonstrates that - in direct contrast to later conceptions - asceticism began primarily as an urban movement. Crucially, it also originated with men and

women living together, varying the model of the family. The book then traces how, in the course of the fourth century, these early organizational forms underwent a transformation. Concurrent with the doctrinal struggles to redefine the Trinity, and with the

formation of a new Christian --acute--;lite, men such as Basil of Caesarea changed the institutional configuration of ascetic life in common: they emphasized the segregation of the sexes, and the supremacy of the rural over urban models. At the same time, ascetics became clerics, who increasingly used female saints as

symbols for the role of the new ecclesiastical elite. Earlier, more varied models of ascetic life were either silenced or condemned as heretical; and those who had been in fact their reformers became known as the founding fathers of monasticism. -
