Twenty-five languages die each year; at this pace, half the world's five thousand languages will disappear within the next century. In this timely book, Claude Hagège seeks to make clear the magnitude of the cultural loss represented by the crisis of language death. By focusing on the relationship of language to culture and the world of ideas, Hagège shows how languages are themselves

crucial repositories of culture; the traditions, proverbs, and knowledge of our ancestors reside in the language we use. His wide-ranging examination covers all continents and language families to uncover not only how languages die, but also how they can be revitalized—for example in the remarkable case of Hebrew. In a striking metaphor, Hagège likens languages to bonfires of social behavior that leave behind sparks even after they die; from these sparks languages can be rekindled and made to live again.

A 30-metre-high spire that can be pulled down, a dog that managed to catch 108 criminals without human help, a hidden giant face on the pedestal of Elias Lönnrot's statue, a hidden Kalevala-scene fresco inside the Old Student House, a statue for a homeless alcoholic, a grave with a cannonball, the smallest public statue in Helsinki ... Far from the crowds and the usual clichés, Helsinki still conceals treasures that are only revealed

to locals and visitors who know how to step off the beaten track. An indispensable guide for those who thought they already knew the city, or would like to discover its other facets.

This publication contains thirty-five papers written by European historians in relation to five key periods in European history: the year of revolutions 1848, the Balkan wars of 1912-13, the search for peace in 1919, the end of the Second World War and the beginning of the Cold War in 1945, and the events of 1989-90 in central and eastern Europe. The papers are drawn from five conferences organised by the Council of Europe based on the principles of Recommendation Rec (2001) 15 on European history teaching. They consider events based on the concept of 'multiperspectivity' which seeks to facilitate an open approach to historical debate based on critical analysis of different perspectives of historical developments, often involving controversial and sensitive issues. This publication is complemented by two related titles: a teaching manual and a DVD of original documents.

**Secret Helsinki** Cambridge University Press Outsourcing Economics has a double meaning. First, it is a book about the economics of outsourcing. Second, it examines the way that economists have understood globalization as a pure market phenomenon, and as a result have 'outsourced' the explanation of world economic forces to other disciplines. Markets are embedded in a set of institutions - labor, government, corporate, civil society, and household - that mold the power asymmetries that influence the distribution of the gains from globalization. In this book, William Milberg and Deborah Winkler propose an institutional theory of trade and development starting with the growth of global value chains - international networks of production that have restructured the global economy and its governance over the past twenty-five years. They find that offshoring leads to greater economic insecurity in industrialized countries that lack institutions supporting workers. They also find that offshoring allows firms to reduce domestic investment and focus on finance and short-run stock movements.
