### Human Resources Development Review

2008 World Bank Publications

This book focuses on how to improve the quality of jobs and meet the aspirations of youth in Sub-Saharan Africa. It finds that a strong foundation for human capital development can be key to boosting earnings, arguing for a balanced approach that builds skills and demand for labor.

Through 25 chapters authored by some of the leading researchers in the field, the Human Resources Development Review 2008 provides an extensive overview of the

contextual factors driving human resources development in South Africa. A key theme throughout the volume is the importance of a multi-faceted skills development strategy operating at three levels. The first entails high-skills policies aimed at expanding export-oriented manufacturing production and services provision, particularly in new globally competitive 'niche' areas. The second relates to the economy's ongoing need for intermediate skills, as is evident in the shortage of skilled artisans and technologists. Finally, the provision of basic, entry-level skills is important in view of the urgent need for large-scale job creation schemes, triggered by public sector initiatives, to ameliorate high levels of

unemployment and despondency, especially amongst the youth. [Forest Economics](#) HSRC Press

Provides an overview of the spectrum of concerns within the field of child care in Canada. The book pays particular attention to developments in the field from the mid-1980s to the mid-1990s.

Social workers have been involved in social development for many years, but it is only recently that these ideas have been explicitly applied to social work practice. The result is that a new and distinctive approach to social work practice known as developmental social work has emerged. Developmental social work emphasizes the role of social investment in professional practice. These investments meet the material needs of social work's clients and facilitate their full integration into the social and economic life of the community. Developmental social workers believe that client strengths and capabilities need to be augmented with public resources and services if those served by the profession are to live productive and fulfilling lives. Although

developmental social work is inspired by international innovations, particularly in the developing countries, it is highly relevant to practice in the United States and other Western nations. In the first book to lay out a clear framework for developmental social work practice, chapters will focus on the traditional fields of social work practice, showing how social investment strategies can be adopted by social workers in their daily practice with populations including families and children, people with mental illness, homeless youth, people with disabilities, the elderly, and those in the correctional system. By facilitating clients' full social and economic participation through a variety of strategies, such as microenterprise or asset-building programs, practitioners can help bring about meaningful changes in clients' lives and throughout their communities. The editors and contributors offer a highly original exposition of developmental social work theory and practice, providing a definitive guide to an emerging and exciting new approach to practice.

Structural adjustment is not just an economic strategy designed to assist countries in addressing technical problems related to trade, growth and the balance of payments. It embodies also, this author argues, a social, cultural, and even quasi-religious vision for the remaking of Africa and the world. John Mihevc focuses on three aspects of structural adjustment in particular. He provides an entirely innovative characterization of World Bank thinking as essentially fundamentalist in the scale of its

ambitions, its ignoring of the complexities of social reality, and its denial of the legitimacy of contrary views of development. He gives a trenchant account of the criticisms which World Bank policies have elicited. And he considers the response from African churches and social movements representing voices of resistance and providing an alternative vision.

This powerful volume represents the broadest engagement with disability issues in South Africa yet. Themes include theoretical approaches to, and representations of, disability; governmental and civil society responses to disability issues; aspects of education as these pertain to the oppression/liberation of disabled people; social security for disabled people; the complex politics permeating service provision relationships; and a consideration of disability in relation to human spaces - physical,

economic and philosophical. Firmly located within the social model of disability, this collection resonates powerfully with contemporary thinking and research in the disability field and sets a new benchmark for cutting-edge debates in a transforming South Africa. *Skills Shortages in South Africa*

Education, Economy & Society is a compelling and comprehensive antidote to the misconstrued nature of the relationship between education and society in South Africa. It provides a constructive critique of conventional discourses, but also alternative approaches to understanding the connections between education and the triple scourge of unemployment, inequality, and poverty. The book's contributors passionately argue that South African education finds its value and purpose in a focus on social justice, transformation, and democratic citizenship.

The joy of education is to capture human imaginations and unleash their creativity towards a more humane and compassionate society.

This rich resource explores the possibilities for a new pedagogy in post-school education and training through empirical research on skills, technology, and issues of employment on the shop floor; a critical analysis of the youth wage subsidy; and workers' education. The book will appeal to a wide audience including students and academics in the fields of industrial sociology, economics, adult education, further education and training, and those in youth development.
