This is a book for those who are not yet comfortable with prayer or who have reached an impasse in their prayer lives. Cole offers help to both groups by demonstrating different kinds of prayer, helping the reader find ways to pray in various situations, and providing sample prayers. He also suggests practical ways of approaching scriptural prayers such as the Lord's Prayer and the Psalms, contemplative prayers such as open prayer and centering prayer, prayer within the traditions of the church, and prayer using the language of worship. The volume includes study questions at the end of each chapter.

The University of Notre Dame Press is pleased to bring Ernst Haas's classic work on European integration, *The Uniting of Europe*, back into print. First published in 1958 and last printed in 1968, this seminal volume is the starting point for anyone interested in the pre-history of the European Union. Haas uses the European Coal and Steel Community (ECSC) as a case study of the community formation processes that occur across traditional national and state boundaries. Haas points to the ECSC as an example of an organization with the "power to redirect the loyalties and expectations of political actors." In this pathbreaking book Haas contends that, based on his observations of the actual integration process, the idea of a "united Europe" took root in the years immediately following World War II. His careful and rigorous analysis tracks the development of the ECSC, including, in his 1968 preface, a discussion of the eventual loss of the individual identity of the ECSC through its absorption into the new European Community. Featuring a new introduction by Haas analyzing the impact of his book over time, as well as an updated bibliography, *The Uniting of Europe* is a must-have for political scientists and historians of modern and contemporary Europe. This book is the inaugural volume of Notre Dame's new Contemporary European Politics and Society Series.

These are the best of Moliere's masterful one-acts, blending broad farce and pointed wit to express his never-ending delight in human foibles. But Moliere is more than just the "master of the laugh," for behind the comic gestures of these matchless rogues, tight-fisted masters, possessive lovers and elegant ladies lurk fears, insecurities and their consequences. Includes: *The Jealous Husband*, *The Flying Doctor*, *Two Precious Maidens Ridiculed*, *The Imaginary Cuckold*, *The Rehearsal at Versailles*, *The Forced Marriage*, *The Seductive Mistress*.

What is the nature of a conceptual scheme? Are there alternative conceptual schemes? If so, are some more justifiable or correct than others? The later Wittgenstein already addresses these fundamental philosophical questions under the general rubric of "grammar" and the question of its "arbitrariness"--and does so with great subtlety. This book explores Wittgenstein's views on these questions. Part I interprets his conception of grammar as a generalized (and otherwise modified) version of Kant's transcendental idealist solution to a puzzle about necessity. It also seeks to reconcile Wittgenstein's seemingly inconsistent answers to the question of whether or not grammar is arbitrary by showing that he believed grammar to be arbitrary in one sense and non-arbitrary in another. Part II focuses on an especially central and contested feature of Wittgenstein's account: a thesis of the diversity of grammars. The author discusses this thesis in connection with the nature of formal logic, the limits of language, and the conditions of semantic understanding or access. Strongly argued and clearly written, this book will appeal not only to philosophers but also to students of the human sciences, for whom Wittgenstein's work holds great relevance.

Blockchain technology is powering our future. As the technology behind cryptocurrencies like bitcoin and Facebook's Libra, open software platforms like Ethereum, and disruptive companies like Ripple, it's too important to ignore. In this revelatory book, Don Tapscott, the bestselling author of *Wikinomics*, and his son, blockchain expert Alex Tapscott, bring us a brilliantly researched, highly readable, and essential book about the technology driving the future of the economy. Blockchain is the ingeniously simple, revolutionary protocol that allows transactions to be simultaneously anonymous and secure by maintaining a tamperproof public ledger of value. Though it's best known as the technology that drives bitcoin and other digital currencies, it also has the potential to go far beyond currency, to record virtually everything of value to humankind, from birth and death certificates to insurance claims, land titles, and even votes. Blockchain is also essential to understand if you're an artist who wants to make a living off your art, a consumer who wants to know where that hamburger meat really came from, an immigrant who's tired of paying big fees to send money home to your loved ones, or an entrepreneur looking for a new platform to build a business. And those examples are barely the tip of the iceberg. As with major paradigm shifts that preceded it, blockchain technology will create winners and losers. This book shines a light on where it can lead us in the next decade and beyond.

Close Listening brings together seventeen strikingly original essays, especially written for this volume, on the poetry reading, the sound of poetry, and the visual performance of poetry. While the performance of poetry is as old as poetry itself, critical attention to modern and postmodern poetry performance has been surprisingly slight. This volume, featuring work by critics and poets such as Marjorie Perloff, Susan Stewart, Johanna Drucker, Dennis Tedlock, and Susan Howe, is the first comprehensive introduction to the ways in which twentieth-century poetry has been practiced as a performance art. From the performance styles of individual poets and types of poetry to the relation of sound to meaning, from historical and social approaches to poetry readings to new imaginations of prosody, the entries gathered here investigate a compelling range of topics for anyone interested in poetry. Taken together, these essays encourage new forms of "close listenings"--not only to the printed text of poems but also to tapes, performances, and other expressions of the sounded and visualized word. The time is right for such a volume: with readings, spoken word events, and the Web gaining an increasing audience for poetry, Close Listening opens a number of new avenues for the critical discussion of the sound and performance of poetry.

The Menace of Multiculturalism Routledge

In this brand new radical analysis of globalization, Cynthia Enloe examines recent events—Bangladeshi garment factory deaths, domestic workers in the Persian Gulf, Chinese global tourists, and the UN gender politics of guns—to reveal the crucial role of women in international politics today. With all new and updated chapters, Enloe describes how many women's seemingly personal strategies—in their marriages, in their housework, in their coping with ideals of beauty—are, in reality, the stuff of global politics. Enloe offers a feminist gender analysis of the global politics of both masculinities and femininities, dismantles an apparently overwhelming world system, and reveals that system to be much more fragile and open to change than we think.

Human Rights and the Image of God is a critical analysis of the relationship between Christian theology and human rights. Written in a lucid and accessible style, this is an excellent resource for students and academics interested in theology, human rights and the historical background to contemporary ethical debates. The development of the idea of human rights in western society and politics is closely followed, as are the conflicts and debates associated with the idea of human rights. The author surveys the ways in which this development has been closely related to the development of a just war theory.

Whole School Curriculum Development In The Primary School Greenwood Publishing Group

This volume of collected essays by some of the most prominent academics studying anarchism bridges the gap between anarchist activism on the streets and anarchist theory in the academy. Focusing on anarchist theory, pedagogy, methodologies, praxis, and the future, this edition will strike a chord for anyone interested in radical social change. This interdisciplinary work highlights connections between anarchism and other perspectives such as feminism, queer theory, critical race theory, disability studies, post-modernism and post-structuralism, animal liberation, and environmental justice. Featuring original articles, this volume brings together a wide variety of anarchist voices whilst stressing anarchism's tradition of dissent. This book is a must buy for the critical teacher, student, and activist interested in the state of the art of anarchism studies.

The assumption still made in much social science research that Europe provides a universal model of development is fundamentally mistaken, according to R. Bin Wong. The solution is not, however, simply to reject Eurocentric norms but to build complementary perspectives, such as a Sinocentric one, to evaluate current understandings of European developments. A genuinely comparative perspective, he argues, will free China from wrong expectations and will allow those working on European problems to recognize the distinct character of Western development.

Wittgenstein on the Arbitrariness of Grammar Birkhäuser

This WTO/FAO copublication focuses on the institutional framework for international trade in food, the significance of international food standards, and the benefits for public health and for trade that can be derived through the implementation of such standards. It aims to raise awareness of international food standards, highlighting the importance of coordination and cooperation among agriculture, health, and trade authorities.

One-act Comedies of Molière Penguin

In this broad and penetrating indictment of multiculturalism, the author strives to expose inconsistencies and duplicity in the arguments of diversity's proponents and to sound a warning against the dire consequences for American culture if the tenets of "political correctness" are allowed to take root in our culture.

A man desperately tries to keep his pact with the Devil, a woman is imprisoned in an insane asylum by her husband because of religious differences, and, on the testimony of a mere stranger, "a London citizen" is sentenced to a private madhouse. This anthology of writings by mad and allegedly mad people is a comprehensive overview of the history of mental illness for the past five hundred

years-from the viewpoint of the patients themselves. Dale Peterson has compiled twenty-seven selections dating from 1436 through 1976. He prefaces each excerpt with biographical information about the writer. Peterson's running commentary explains the national differences in mental health care and the historical changes that have take place in symptoms and treatment. He traces the development of the private madhouse system in England and the state-run asylum system in the United States. Included is the first comprehensive bibliography of writings by the mentally ill.

This revised, updated edition provides a comprehensive and rigorous description of the application

of Hamilton's principle to continuous media. To introduce terminology and initial concepts, it begins with what is called the first problem of the calculus of variations. For both historical and pedagogical reasons, it first discusses the application of the principle to systems of particles, including conservative and non-conservative systems and systems with constraints. The foundations of mechanics of continua are introduced in the context of inner product spaces. With this basis, the application of Hamilton's principle to the classical theories of fluid and solid mechanics are covered. Then recent developments are described, including materials with microstructure, mixtures, and continua with singular surfaces.
