Healing and Transformation Harper Collins

By 1987, the British Transformers was at the peak of its powers. Alternating between US reprints showing the struggle for leadership within the Autobot and Decepticon forces and UK material dealing with the insane future Decepticon Galvatron's attempts to rule yesterday, what had started as a toy advert had become a sprawling space opera seared into the minds of an entire generation. Stuart Webb was one such reader, and in 2012 he began a journey looking through every single issue of the series, commenting on its highs and lows. He became the first person to look at every backup strip and editorial and how they worked together to create the most thorough exploration of a publishing phenomenon ever undertaken. It's also highly personal, full of humour and silliness and even the occasionally thoughtful moment. The final result is an essential read, not just for Transformers fans, but also for those interested in the history of Marvel UK and the impact this simple little comic had on an entire generation.

Taproots for Transformation Cengage Learning

Winner of the AAACE Cyril O. Houle Award This book constructs a deepening, interdisciplinary understanding of adult learning and imaginatively reframes its transformative aspects. The authors explore the tension at the heart of current understanding of 'transformative' adult learning: that while it can be framed as both easy and imperative, personal transformation is in fact rooted in the context in which we live, our stories and

relationships. At its core, transformation is never easy – nor always desirable – and the authors thus draw on interdisciplinary and auto/biographical inquiry to explore what it means to change our presuppositions and frames of meaning that guide our thinking. Using their linguistic, gendered, academic and cultural differences, the authors illuminate how the social, contextual, cultural, cognitive and psychological dimensions of transformation intertwine. In doing so, they emphasise the importance of transformation as a contingent struggle for meaning and recognition, social justice, fraternity, and the pursuit of truth. This engaging book will be of interest to students and scholars of transformative learning and education.

Exploring thirty years of work by The Centre for Performance Research (CPR), *A Performance Cosmology* explores the future challenges of performance and theatre through a diverse and fascinating series of interviews, testimonies and perspectives from leading international theatre practitioners and academics. Contributors include: Philip Auslander, Rustom Bharucha, Tim Etchells, Jane Goodall, Guillermo Gomez-Pena, Jon McKenzie, Claire MacDonald, Susan Melrose, Alphonso Lingis, Richard Schechner, Rebecca Schneider, Edward Scheer, and Freddie Rokem. *A Performance Cosmology* is structured as a travelogue through a matrix of strategic, imaginary, interdisciplinary field stations. This innovative framework enables readings which disrupt linearity and afford different forms of thematic engagement. The resulting volume opens entirely new vistas on the old, new, and as yet unimagined, worlds of performance.

Sophie's World McGraw-Hill

A spiritual journey, a lush travelogue, a parable of sports and philosophy—John Updike called this unique novel “a golf classic if any exists in our day.” When an American traveler on his way to India stops to play a round on one of the most beautiful and legendary golf courses in Scotland, he doesn't know that his game—and his life—are about to change forever. He is introduced to Shivas Irons, a mysterious golf pro whose sublime insights stick with him long after the eighteenth hole. From the first swing of the Scotsman's club, he realizes he is in for a most extraordinary day. By turns comic, existential, and semiautobiographical, Michael Murphy's tale traces the arc of twenty-four hours, from a round of golf on the Links of Burningbush to a night fueled by whiskey, wisdom, and wandering—even a sighting of Seamus MacDuff, the holy man who haunts the hole they call Lucifer's Rug. “Murphy's book is going to alter many visions,” The New York Times Book Review declared. More than an unforgettable approach to one of the world's most popular sports, *Golf in the Kingdom* is a meditation on the power of a game to transform the self.

Self-Transformations BenBella Books

Heyes' monograph in feminist philosophy is on the connection between the idea of "normalization"—which per Foucault is a mode or force of control that homogenizes a population—and the gendered body. Drawing on Foucault and Wittgenstein, she argues that the predominant picture of the self—a picture that presupposes an "inner" core of the self that is expressed, accurately or not, by the outer body—obscures the connection between contemporary discourses and practices of self-transformation and the forces of normalization. In other words, pictures of the self can hold us captive when they are being read

from the outer self--the body--rather than the inner self, and we can express our inner self by working on our outer body to conform. Articulating this idea with a mix of the theoretical and the practical, she looks at case studies involving transgender people, weight-loss dieting, and cosmetic surgery. Her concluding chapters look at the difficult issue of how to distinguish non-normalizing practices of the self from normalizing ones, and makes suggestions about how feminists might conceive of subjects as embodied and enmeshed in power relations yet also capable of self-transformation. The subject of normalization and its relationship to sex/gender is a major one in feminist theory; Heyes' book is unique in her masterful use of Foucault; its clarity, and its sophisticated mix of the theoretical and the anecdotal. It will appeal to feminist philosophers and theorists.

The Tunisian revolution raises important questions regarding the articulation of resistance and political subjectivity in the context of global governmentality. By drawing from political theory, philosophy, ethnography and readings of local street art, this book restores the radical significance of the political event as an instance of possible collective action. Using the 2011 Tunisian revolution as a starting point for a broader discussion, this book analyses the processes of Orientalisation of non-Western examples of collective action and critiquing the narrative frame of the 'Arab Spring'. By focusing on the aspect of autonomous mobilities and transformations, occurred within a beyond the Tunisian space, Oana Pârvan is able answer key questions including, how moments of political rupture (such as revolutions) are interpreted by the wider public and how mobility across the Mediterranean rearticulates the distribution and recomposition of political theory categories such as class. She narrates how the Tunisian revolution can be inscribed into a long history of dispossession (colonial, regional, neoliberal) and resistance; and the culture and practices of the Tunisian revolutionaries have spread in the country and abroad (seen as a way to think beyond the methodological framework of the nation-state). This work builds on research fieldwork and the analysis of Tunisian street art (mostly of the Ahl Al Kahf collective), drawing from migration-centred ethnographic work in order to suggest a reconstruction of the event. By applying theoretical reflections inspired by

continental philosophy, media theory and autonomy of migration theory, this work develops an event-based theoretical reflection able to contribute towards rethinking contemporary Orientalism, self-representation and political subjectivity.

Spanning several generations--from newcomers to Oscar Award-winning veterans--this volume features a discussion of the movies that shaped the careers of these filmmakers and, in turn, cinema history. Here directors, including Peter Bogdanovich, Kimberly Peirce, Arthur Hiller, and John Waters, explore the film they saw at an especially formative moment, how it influenced their own work--or, in some cases, led them to tell stories through movies themselves--and the effects it had on their thoughts about cinema. Revealing stories include how after watching *Rebel Without a Cause*, John Woo started combing his hair like James Dean and even began talking like him; *Apocalypse Now* inspired Danny Boyle to take risks and make larger-than-life films; and a line in *The Wizard of Oz* --Who could ever have thought a good little girl like you could destroy all my beautiful wickedness?--has become almost a personal mantra or prayer for John Waters.

"Bob Chapman, CEO of the \$1.7 billion manufacturing company Barry-Wehmiller, is on a mission to change the way businesses treat their employees." - Inc. Magazine Starting in 1997, Bob Chapman and Barry-Wehmiller have pioneered a dramatically different approach to leadership that creates off-the-charts morale, loyalty, creativity, and business performance. The company utterly rejects the idea that employees are simply functions, to be moved around, "managed" with carrots and sticks, or discarded at will. Instead, Barry-Wehmiller manifests the reality that every single person matters, just like in a family.

That's not a cliché on a mission statement; it's the bedrock of the company's success. During tough times a family pulls together, makes sacrifices together, and endures short-term pain together. If a parent loses his or her job, a family doesn't lay off one of the kids. That's the approach Barry-Wehmiller took when the Great Recession caused revenue to plunge for more than a year. Instead of mass layoffs, they found creative and caring ways to cut costs, such as asking team members to take a month of unpaid leave. As a result, Barry-Wehmiller emerged from the downturn with higher employee morale than ever before. It's natural to be skeptical when you first hear about this approach. Every time Barry-Wehmiller acquires a company that relied on traditional management practices, the new team members are skeptical too. But they soon learn what it's like to work at an exceptional workplace where the goal is for everyone to feel trusted and cared for—and where it's expected that they will justify that trust by caring for each other and putting the common good first. Chapman and coauthor Raj Sisodia show how any organization can reject the traumatic consequences of rolling layoffs, dehumanizing rules, and hypercompetitive cultures. Once you stop treating people like functions or costs, disengaged workers begin to share their gifts and talents toward a shared future. Uninspired workers stop feeling that their jobs have no meaning. Frustrated workers stop taking their bad days out on their spouses and kids. And everyone stops counting the minutes until it's time to go home. This book chronicles Chapman's journey to find his true calling, going behind the scenes as his team tackles real-world challenges with caring, empathy, and inspiration. It also provides clear steps to transform your own workplace, whether you lead two people or two hundred thousand. While the Barry-Wehmiller way isn't easy, it is simple. As the authors put it: "Everyone wants to do better. Trust them. Leaders are everywhere. Find them. People achieve good things, big and small, every day. Celebrate them. Some people wish things were different. Listen to them. Everybody matters. Show them."

In this book, Steven F. Walker considers the midlife transition from a Jungian and Eriksonian perspective, by providing vivid and powerful literary and cinematic examples that illustrate the psychological theories in a clear and entertaining way. For C.G.

Jung, midlife is a time for personal transformation, when the values of youth are replaced by a different set of values, and when the need to succeed in the world gives place to the desire to participate more in the culture of one's age and to further its development in all kinds of different ways. Erik Erikson saw "generativity," an expanded concern for others beyond one's immediate circle of family and friends, as the hallmark of this stage of life. Both psychologists saw it as a time for growth and renewal. Literary texts such as Virginia Woolf's *Mrs Dalloway*, Shakespeare's *Antony and Cleopatra*, or Sophocles' *Oedipus the King*, and films such as Fellini's *8 1/2* and *Campion's The Piano*, have the capacity to represent, sometimes more vividly and with greater dramatic concentration than actual life histories or case studies, the archetypal nature of the drama and in-depth transformation associated with the midlife transition. *Midlife Transformation in Literature and Film* focuses on the specific male and female archetypal paradigms and presents them within the general context of midlife transformation. For men, the theme of death of the young hero presides over the crisis and the transformative ordeal, whereas for women the theme of tragic abandonment acts as the prelude to further growth and independence. This book is essential reading for anyone studying Jung, Erikson, or the midlife transition. It will interest those who have already been through a midlife transition, those who are in the midst of one, as well as those who are yet to experience this challenging period.

The Best Idea in the World Little a

In this timely and provocative book, James Stent, a banker with decades of experience in Asian banking and fluency in Chinese language, explains how Chinese banks work, analyzes their strengths and weaknesses, and sets forth the challenges they face in a slowing economy. Without minimizing the real issues Chinese banks face, *China's Banking Transformation* challenges negative media accounts and reports of "China bears". Based on his 13 years of service on the boards of China Minsheng Bank, a privately owned listed bank, and China Everbright Bank, a state-controlled listed bank, the author brings the informed view of an insider to the reality of Chinese banking. *China's Banking Transformation* demonstrates that Chinese banks have transformed into modern, well-run commercial banks, playing a vital role supporting China's extraordinary economic growth.

Acknowledging that China's banks are different from Western banks, the author explains that they are hybrid banks, borrowing extensively from Western models, but at the same time operating within a traditional Chinese cultural framework and in line with China's governance model. From his personal experience working at board level, Stent describes the governance and management of China's banks, including the role of the Communist Party. He sees China's banks as embedded in ancient concepts of how government and society work in China, and also as actors within a market socialist political economy. The Chinese banking system today bears similarities with banking in Northeast Asian "developmental states" of recent past, and also pre-1949 Chinese banking. As the first account of Chinese banking by a Westerner who has worked in China's banks, *China's Banking Transformation* should be read by anyone interested in the political economy of contemporary China, in Asian development issues, and in banking issues generally. The book dispels misconceptions and provides insight into the financial aspects of China's economic growth story.

Atomic Habits Cengage Learning

The #1 New York Times bestseller. Over 4 million copies sold! *Tiny Changes, Remarkable Results* No matter your goals, *Atomic Habits* offers a proven framework for improving--every day. James Clear, one of the world's leading experts on habit formation, reveals practical strategies that will teach you exactly how to form good habits, break bad ones, and master the tiny behaviors that lead to remarkable results. If you're having trouble changing your habits, the problem isn't you. The problem is your system. Bad habits repeat themselves again and again not because you don't want to change, but because you have the wrong system for change. You do not rise to the level of your goals. You fall to the level of your systems. Here, you'll get a proven system that can take you to new heights. Clear is known for his ability to distill complex topics into simple behaviors that can be easily applied to daily life and work. Here, he draws on the most proven ideas from biology, psychology, and neuroscience to create an easy-to-understand guide for making good habits inevitable and bad habits impossible. Along the way, readers will be inspired and entertained with true stories from Olympic gold medalists, award-winning artists, business leaders, life-saving physicians, and star comedians who have used the science of small habits to master

their craft and vault to the top of their field. Learn how to: make time for new habits (even when life gets crazy); overcome a lack of motivation and willpower; design your environment to make success easier; get back on track when you fall off course; ...and much more. *Atomic Habits* will reshape the way you think about progress and success, and give you the tools and strategies you need to transform your habits--whether you are a team looking to win a championship, an organization hoping to redefine an industry, or simply an individual who wishes to quit smoking, lose weight, reduce stress, or achieve any other goal.

Memory and the Impact of Political Transformation in Public Space
Souvenir Press

Trenchant, expansive essays on the cultural consequences of ongoing, all-permeating technological innovation In 1994, Sven Birkerts published *The Gutenberg Elegies*, his celebrated rallying cry to resist the oncoming digital advances, especially those that might affect the way we read literature and experience art—the very cultural activities that make us human. After two decades of rampant change, Birkerts has allowed a degree of everyday digital technology into his life. He refuses to use a smartphone, but communicates via e-mail and spends some time reading online. In *Changing the Subject*, he examines the changes that he observes in himself and others—the distraction when reading on the screen; the loss of personal agency through reliance on GPS and one-stop information resources; an increasing acceptance of "hive" behaviors. "An unprecedented shift is underway," he argues, and "this transformation is dramatically accelerated and more psychologically formative than any previous technological innovation." He finds solace in engagement with art, particularly literature, and he brilliantly describes the countering energy available to us through acts of sustained attention, even as he worries that our increasingly mediated existences are not conducive to creativity. It is impossible to read *Changing the Subject* without coming away with a renewed sense of what is lost by our wholesale acceptance of digital innovation and what is regained when we immerse ourselves in a good book.

How does a good manager become a great leader? Ask around in business circles, and you'll get a thousand different answers. But now, internationally-renowned leadership expert Dr. Peter Fuda has created a single, coherent roadmap for leadership effectiveness in *Leadership Transformed*. After more than a decade's research and practice, Dr. Fuda shares the seven common themes that have enabled hundreds of CEOs across the world to transform themselves into highly effective leaders, and transform the performance of their organizations as well. Through his work, Dr. Fuda discovered that the best way to elicit deep and broad discussion of the seven leadership themes--and to describe the CEOs' mastery of what they had learned--was through metaphor. Fire--motivational forces that initiate and sustain transformation efforts Snowball--mutual accountability, and the consequent momentum that occurs when a critical mass of leaders commit to shared leadership principles Master chef--leadership frameworks, tools, and strategies that can be 'artfully' deployed Coach--how a 'coaching staff' can collectively help leaders achieve their aspirations Mask--leaders can shed the heavy burden of wearing a mask in favor of a more congruent "best self" Movie--leaders can develop critical capabilities of self-awareness and reflection Russian dolls--how a leader's personal journey can align with the journeys of their colleagues and organization Dr. Fuda has helped leaders on four continents achieve greatness. Previously available only to the select clients of his industry-leading consultancy, now his expert knowledge can accelerate your own leadership transformation.

Outperform the competition with Subir Chowdhury's next-generation management system "Nobody knows quality like Subir Chowdhury, and *The Power of LEO* reveals the elegant new approach he has pioneered with the world's top companies. I couldn't recommend this book more." —Marshall Goldsmith, author of the New York Times bestsellers *MOJO* and *What Got You Here Won't Get You There* "The Power of LEO will be beneficial to any organization that utilizes its principles and incorporates them into their culture. Subir Chowdhury's LEO is guaranteed to produce results." —Michael King, CEO and National President, Volunteers of America "A no-nonsense book full of real-life case examples, practical tips, and proven strategies. If you're looking to make quality a way of life, this is definitely the book for you." —Jim Kouzes, coauthor of the bestselling *The Leadership Challenge* "We have applied LEO in my hospital and it works. Subir Chowdhury's book will serve as a powerful reminder to the healthcare industry that its primary goal is to develop, enhance, and delight its most important customer: the patient." —Mark L.

Rosenblum, M.D., Chair, Department of Neurosurgery, Henry Ford Health System, and Vice President of Clinical Programs, Henry Ford West Bloomfield Hospital “Most management strategies are great in theory. But how does a line executive put it to use? The Power of LEO shows us how in practical, down-to-earth terms and anecdotes. A most useful read!” —Jim Lawrence, CEO, Rothschild North America and former Vice Chairman and CFO, General Mills “It doesn’t take long for you to see that this isn’t just another business book on improving processes; it also applies to everyone on a personal level. And Chowdhury writes from the heart. I enjoyed his easy-to-read case histories of businesses that have taken the LEO approach and it was proven to be equally effective at putting out fires, transforming process flow, and for developing new products and services.” —Qualitydigest.com About the Book:

Hailed as “the Quality Prophet” by BusinessWeek, Subir Chowdhury is the long-established global authority on the critical importance of quality and how to achieve it with Design for Six Sigma (DFSS). Now, he takes it to the next level by showing you how to build quality into the DNA of your entire organization. In his bestselling book, Chowdhury introduced his next-generation management system—LEO. In The Power of LEO, he describes how continuous focus on quality improvement can revolutionize any process—from manufacturing operations to managerial decision making. The secret is to cease delegating the responsibility of quality to specific teams or departments and permanently lodge it within the core of an organization’s culture. Chowdhury’s profoundly simple yet extraordinarily effective management system is based on three basic principles:

Listen—Seek input from all stakeholders within your organization, from suppliers to employees to customers Enrich—Create new ideas for improvement and solutions for problems using simple techniques Optimize—Select the best improvement idea or solution, subject it to testing in the real world, and correct all shortcomings Quality methodologies like Six Sigma and Lean can be highly effective but are used narrowly and by limited personnel within an organization. LEO is the encompassing strategy that can be easily embraced by everyone within an organization, resulting in measurable improvements in your operations, products, and bottom line. If you’re serious about competing in the global marketplace, join Subir Chowdhury on his quest for overall quality and transform your organization from a company that does some things well into an established industry leader.
