In the spring of 1968, the Czechoslovakian Communist Party experimented with "socialism with a human face"-known then as the "Prague Spring."

Suddenly there were new important changes for the citizens of Czechoslovakia: freedom of the Press; an end to arbitrary wiretaps; and the right to travel without prior authorizations and visas. The borders opened to the West, consumer goods appeared in the stores, and the winds of freedom blew over the country. Then, in late August, Soviet tanks invaded Prague to put an end to this brief liberalization experiment.Viliam Klimá?ek's vivid novel describes the impact of Prague Spring and the Soviet Invasion on the everyday lives of twenty-five Czechoslovakian families. Retelling the stories of both Czech and Slovak diaspora, Klimá?ek reveals how these political events changed the lives and future of these families forever. After briefly enjoying new freedoms they were forced to flee their homeland. Some saw their families torn apart; others lost their possessions or were dispossessed. But they all ventured on perilous journeys seeking refuge and freedom in new countries; and, like all immigrants, they had to rebuild their lives and livelihoods. The experiences that the characters in this novel endure and overcome are continually being repeated for untold millions again and again as people around the world flee intolerance, war, climate change, and other disasters in our contemporary age. Constructing his stories on real testimonies, Klimá?ek's novel is a beautiful hymn to tolerance and the necessity of supporting marginalized people.

Do Right, Fear Nothing. Sam Hopkins is a good kid who has fallen in with the wrong crowd. Hanging around with car thieves and thugs, Sam knows it's only a matter of time before he makes one bad decision too many and gets into real trouble. But one day, Sam sees these friends harassing an eccentric schoolmate named Jennifer. Finding the courage to face the bullies down, Sam loses a bad set of friends and acquires a very strange new one. Jennifer is not just eccentric. To Sam, she seems downright crazy. She has terrifying hallucinations involving demons, the devil, and death. And here's the really crazy part: Sam is beginning to suspect that these visions may actually be prophecies—prophecies of something terrible that's going to happen very soon. Unless he can stop it. With no one to believe him, with no one to help him, Sam is all alone in a race against time. Finding the truth before disaster strikes is going to be both crazy and very, very dangerous. “The adrenaline-charged action will keep you totally immersed.” —RT Book Reviews

North Carolina's magnificent Blue Ridge Mountains have drawn people to the Swannanoa Valley since the beginning of time. Rivers and forests lured early hunters and gatherers; later inhabitants tilled the rich, fertile soil and logged the thick forests on the mountainsides. People also came to the mountains to enjoy the mystical beauty and enchantment of the area, the cool, crisp climate, and the sparkling waters of brooks and streams. Hiking, camping, and the tranquility of a woodland world provided escape from city life. The Swannanoa Valley is cradled between the Craggy Mountains to the north and the Swannanoa Mountains to the south. Mount Mitchell, the highest peak in America east of the Mississippi River, rises majestically nearby. Among the early visitors who decided to settle in the valley were those who purchased the land that later became the sites of the famous conference centers in the area-Montreat, YMCA Blue Ridge Assembly, and Ridgecrest-and businessmen, who brought industry to the area.

What is a child? The concept of childhood is so familiar that we tend to assume its universality. However, the meaning of childhood is always being negotiated, not only by the imaginations of adults, but also by nations, markets, history and children themselves. Yet, as much as the question is considered by the social world, the contributions in this book remind readers that children are also active, embodied, and inquiring agents engaged in figuring a relationship with that the world they inherit. This book's unifying theme, "The child in question," emerges from an assertion that childhood has boundaries far more elastic than can be held by the familiar notion of the innocent child developing toward a heteronormative future. The title pays homage to the work of sociologist, Diana Gittins, who, over twenty years ago, asked how the shifting meanings of children and childhood impact the lives of children. The contributions of this book examine contemporary educational policy and practice, curriculum material, literary and visual representations, and teacher narratives to further probe how and why it matters that childhood, as a concept and experience, remains as multiple and elusive as ever. The chapters in this book were originally published as a special issue of the journal, Curriculum Inquiry. [Epsom Downs](#) Read With You Publishing

This textbook focuses on the performance and application of highway engineering composite material. It collects and compiles the data obtained by the authors in numerous recent practical and research projects in the field of technology and application of highway engineering composite materials in China. It provides valuable reference materials for students and engineering technicians taking courses on the selection, design and construction of composite materials for highway engineering. It offers solutions to various practical engineering problems, and also includes in-depth theoretical analyses of related issues in simple language. Some of the concepts and applications, such as the highway pavement functional layer and the application of polymer composite material to protection of soft rocks, have not been previously covered in the literature before, and as such the book provides engineering and technical professionals with a new vision and new methods. Further, it not only explains the basic concepts, principles, and requirements of composite material for highway engineering, but also describes its application, including the related theoretical analyses, design and construction, making it ideal as a reference book for technical personnel, as well as a textbook for undergraduates and postgraduates majoring in highway engineering.

A new investigation, based on previously unseen KGB documents, reveals the startling truth behind Stalin's last great conspiracy. On January 13, 1953, a stunned world learned that a vast conspiracy had been unmasked among Jewish doctors in the USSR to murder Kremlin leaders. Mass arrests quickly followed. The Doctors' Plot, as this alleged scheme came to be called, was Stalin's last crime. In the fifty years since Stalin's death many myths have grown up about the Doctors' Plot. Did Stalin himself invent the conspiracy against the Jewish doctors or was it engineered by subordinates who wished to eliminate Kremlin rivals? Did Stalin intend a purge of all Jews from Moscow, Leningrad, and other major cities, which might lead to a Soviet Holocaust? How was this plot related to the cold war then dividing Europe, and the hot war in Korea? Finally, was the Doctors' Plot connected with Stalin's fortuitous death? Brent and Naumov have explored an astounding arra of previously unknown, top-secret documents from the KGB, the

presidential archives, and other state and party archives in order to probe the mechanism of on of Stalin's greatest intrigues -- and to tell for the first time the incredible full story of the Doctors' Plot.

The growth rate of real hourly wages in France has fallen below the trend growth rate of total factor productivity. The distribution of wage and earnings growth has not been uniform across deciles. A breakdown in employment growth by wage deciles also suggests important composition changes. The development of key labor market variables has been discussed in this note. Microeconomic estimations provide evidence of an outward shift in the relationship between wages and unemployment that is independent of changes in labor demand taxes and unemployment income.

North Carolina harbors an incredible diversity of habitats that provide food and shelter for more than 440 bird species throughout the year, making the state a destination for birders and nature lovers. The North Carolina Birding Trail is a driving trail linking birders and tourists with great birding sites across the state and the local communities in which they are found. The third of three regional guides, the Mountain Trail Guide presents 105 premier birding destinations in the North Carolina mountains, from the Tennessee border in the west to Interstate 77 in the east. The spiral-bound volume features maps, detailed site descriptions, and color photographs throughout. Each site description includes directions as well as information on access, focal species and habitats, and on-site visitor amenities. Special "while you're in the area" listings accompany each of eighteen site groupings, so visitors can travel to a cluster of birding destinations and enjoy other local highlights and attractions along the way.

The basic idea behind this volume is to probe the nature of grammaticalization. Its contributions focus on the following questions: (i) In how far can grammaticalization be considered a universal diachronic process or mechanism of change and in how far is it conditioned by synchronic factors? (ii) What is the role of the speaker in grammaticalization? (iii) Does grammaticalization itself provide a cause for change or is it an epiphenomenon, i.e. a conglomeration of causal factors/mechanisms which elsewhere occur independently? (iv) If it is epiphenominal, how do we explain that similar pathways so often occur in known cases of grammaticalization? (v) Is grammaticalization unidirectional? (vi) What is the nature of the parameters guiding grammaticalization? The overall aim of the book is to enrich our understanding of what grammaticalization does or does not entail via detailed case studies in combination with theoretical and methodological discussions.

Design and Operation of heat Exchangers and Their Networks presents a comprehensive and detailed analysis on the thermal design methods for the most common types of heat exchangers, with a focus on their networks, simulation procedures for their operations, and measurement of their thermal performances. The book addresses the fundamental theories and principles of heat transfer performance of heat exchangers and their applications and then applies them to the use of modern computing technology. Topics discussed include cell methods for condensers and evaporators, dispersion models for heat exchangers, experimental methods for the evaluation of heat exchanger performance, and thermal calculation algorithms for multi-stream heat exchangers and heat exchanger networks. Includes MATLAB codes to illustrate how the technologies and methods discussed can be easily applied and developed. Analyses a range of different models, applications, and case studies in order to reveal more advanced solutions for industrial applications. Maintains a strong focus on the fundamental theories and principles of the heat transfer performance of heat exchangers and their applications for complex flow arrangement.

This book is in memory of the YAVNOVITCH AND GILINSKI FAMILIES OF KOBYLNIK whose link to GLUBOKIE came from the autobiography of the late Meir Yavnovitch (Meir Yavnai z"l, of Tel Aviv), who went to GLUBOKIE to continue his education and lived with his mother's (Raiza Gilinski) cousins, SHALOM AND GITA(?) of Glubokie (whose business was seeds, oil, grease for the Carriage wheels, etc). This was about 1921-1925 where he studied with a private tutor. He was not embarrassed to write about his romances with the beautiful girls of Glubokie, Gite Gordon was one of them (mentioned in this book, pag3 97-the lover of a German officer-Shultz, Gite was later murdered) which adorns his photo album. Translating these Yizkor books opens up a window for many children of Holocaust survivors who never met their murdered relatives, a never-ending story in which many, many intrigues are discovered and adds dimension to one's family history....
