As in most areas of science and engineering, the most important and useful theories are the ones that capture the essence, and therefore the beauty, of physical phenomena. This is true of signals and systems. Signals and Systems: Analysis Using Transform Methods and MATLAB captures the mathematical beauty of signals and systems and offers a student-centered, pedagogically driven approach. The author has a clear understanding of the issues students face in learning the material and does a superior job of addressing these issues. The book is intended to cover a one-semester sequence in Signals and Systems for juniors in engineering. This text is created in modular format, so instructors can select chapters within the framework that they teach this course.

From thriller and suspense master Brett Battles comes Pale Horse, the third book in the Project Eden thriller series. A simple push of a button and the world will never be the same. Martina Gable returns home from college to spend Christmas break with her family, but the relaxing vacation she expects is not even close to what she'll get. Sanjay, a young man in Mumbai who knows more than he should about Project Eden's plan, will do whatever he can to keep Kusum, the girl he loves, alive and safe. A boy named Brandon Ash runs for his life in the hills of Montana, wanting only to see his family again. But first there is Daniel, the boy's father, who watches Olivia Silva's finger hover over the enter key that will decide the fate of humanity. Do you think you're safe? Pale Horse is part of the Project Eden continuing saga, which is best read after completing volumes 1 and 2 (Sick and Exit 9). Praise for the Project Eden Thrillers "Sick didn't just hook me. It hit me with a devastating uppercut on every primal level—as a parent, a father, and a human being." — Blake Crouch, author of Run "...a gem of an outbreak story that unfolds like a thriller movie and never lets up, all the way to the last page. Absolutely my favorite kind of story!" — John Maberry, New York Times bestselling author "...not only grabs you by the throat, but by the heart and gut as well, and by the time you finish you feel as if you've just taken a runaway train through dangerous territory. Buy these books now. You won't regret it." — Robert Browne, author of The Paradise Prophecy and Trial Junkies "You think Battles was badass before? He just cranked it up to 500 joules. CLEAR!" — PopCultureNerd.com "Brett Battles at his best, a thriller that also chills, with a secret at its core that's almost too scary to be contained within the covers of a book." — Tim Hallinan, author of the Edgar-nominated The Queen of Patpong

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the

desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.

Earl Babbie, best-selling author in the field, is joined by Lucia Benaquisto, experienced researcher and teacher for The Basics of Social Research, First Canadian Edition. This outstanding author team makes abstract theory understandable with humour and down-to-earth examples. Canadian examples and Canadian social science research make the text even more relevant to students. This textbook is for a one semester course in research methods. The adaptation is unique because it took the American edition but added unique chapters and methods based on the reviewers' desire for comprehensive coverage. There is more material on ethics and qualitative research in the Canadian edition. There is also coverage of a more advanced topic, the elaboration model. This adaptation is also unique in the Canadian market because of its rich ancillary package.
