Create paintings with feeling The Painterly Approach bridges the gap between what you see as an artist, and what you feel. More than painting an appealing landscape, it's about making your viewer feel the wind, experience the dance of shadows and sunlight, and admire the wondrous intermingling of colors that attracted you to your subject in the first place. In this gorgeously illustrated book, Bob Rohm shows you how to see the world from a painterly perspective and translate it into expressive, poetic paintings that elicit an emotional response from your viewer. Clearly illustrates how to choreograph color, value, composition, texture and other fundamental elements to achieve those elusive qualities of mood and emotion Features 9 step-by-step demonstrations (in oil, pastel and acrylic) on capturing a vivid sense of time and place Covers brushstrokes, painting with a palette knife, edge control, shadows and other advanced art techniques This book focuses primarily on landscape painting but offers valuable lessons for approaching any subject in a personal and engaging way.

Space Train Engineers are a contrary lot. The most contrary of all is Adin Bartlett. Joint Commander Kevin Masters personally selects Adin and his Bountiful Express crew, Conductor Bella Bok and Space Miner Shendo "Spook" Kholper, for a historic assignment to mine microbes on a distant planet in Home's solar system. The microbes are needed to replenish surface life on Home, a planet whose loss of atmosphere has forced humans to burrow into tunnels for survival. The adventure is fitting of true Home Heroes. Only Spook, a Technologist with unnatural intuitive abilities, has reservations about the assignment. Adin's only complaint is that the desk Engineers thrive on theories that don't fit and ignore realities. Bella is the balance for the combination of the aggressive and tentative natures of her crewmates as the space train encounters the unknown with minimal information. The adventure opens the crew's minds to unbridled fears, fears that far exceed their experiences as asteroid miners, and exposes them to dangers outside of human understanding. The crew's complementary abilities are the only things that can bring their assignment to a safe conclusion - if their assignment can be completed at all.
