BRYANT RAMIREZ

Earth in Mind Prickly Paradigm

This open access book offers an overview of the beautiful, powerful, and dynamic array of opportunities to promote health through the arts from

theoretical, methodological, pedagogical, and critical perspectives.

This is the first-known text to connect the disparate inter-disciplinary literatures into a coherent volume for health promotion practitioners, researchers, and teachers. It provides a one-stop depository for using the arts as tools for health promotion in many

settings and as bridges across communities, cultures, and sectors. The diverse applications of the arts in health promotion transcend the multiple contexts within which health is created, i.e., individual, community, and societal levels, and has a number of potential health, aesthetic, and social outcomes. Topics covered within the chapters include: Exploring the Potential of the Arts to Promote Health and Social Justice Drawing as a Salutogenic Therapy Aid for Grieving Adolescents in Botswana Community Theater for Health Promotion in Japan From Arts to Action: Project SHINE as a Case Study of Engaging Youth in Efforts to Develop Sustainable Water, Sanitation, and Hygiene Strategies in Rural Tanzania and India Movimiento Ventana: An Alternative

Proposal to Mental Health in Nicaragua Using Art to Bridge Research and Policy: An Initiative of the United States National Academy of Medicine Arts and Health Promotion is an innovative and engaging resource for a broad audience including practitioners, researchers, university instructors, and artists. It is an important text for undergraduate- and graduate-level courses, particularly in program planning, research methods (especially qualitative methodology), community health, and applied art classes. The book also is useful for professional development among current health promotion practitioners, community nurses, community psychologists, public health professionals, and social workers.

"The centrality of death rituals has in anthropologically informed studies of Buddhism been little documented. The current volume brings together a range of perspectives on Buddhist death rituals including ethnographic, textual, historical and theoretically informed accounts, and presents the diversity of the Buddhist funeral cultures of mainland Southeast Asia and China. It arises out of the University of Bristol's Centre for Buddhist Studies research project Buddhist Death Rituals in Southeast Asia and China, funded by the United Kingdom's Arts and Humanities Research Council. This project involved extensive new research in Thailand, Laos and China. Other items from that project

included several public exhibitions, extensive stills photographs, and several video films. The project-team produced two 30 minutes films on the ghost festival in Laos and China, one on urban funerals in Chiang Mai (Thailand) and several shorter clips dealing with funeral cultures in Laos, Thailand and China. Most of this material (and an extensive bibliography on the topic) is available free of charge from the project website located at the webpage of the Department of Theology and Religious Studies (Centre for Buddhist Studies) at the University of Bristol"--
BodySpace Springer Nature
BodySpace brings together some of the best known geographers writing on gender and sexuality today. Together they explore the role of space and place

in the performance of gender and sexuality. The book takes a broad perspective on feminism as a theoretical critique, and aims to ground - and destabilize - notions of citizenship, work, violence, "race" and disability in their geographical contexts. The book explores the idea of knowledge as embodied, engendered and embedded in place and space. Gender and sexuality are explored - and destabilized - through the methodological and conceptual lenses of cartography, fieldwork, resistance, transgression and the divisions between local/global and public/private space. Contributors: Linda Martin Alcoff, Kay Anderson, Vera Chouinard, Nancy Duncan, J.K. Gibson-Graham, Ali Grant, Kathleen Kirby, Audrey Kobayashi, Doreen Massey, Linda

McDowell, Wayne Myslik, Heidi Nast, Gillian Rose, Joanne Sharp, Matthew Sparke, Gill Valentine

The Para-Academic Handbook Mohr Siebeck

Brie Arthur's *Gardening with Grains* is a passion project that grew from a light-bulb, aha moment - that's when she realized we've been missing a dynamic piece of the burgeoning foodscape movement. We've learned the joys of interplanting our blooming flowerbeds with veggies, herbs and berries - but what about the grains, those ancient and beautiful grasses that practically gave us civilization: wheat, barley and oats for winter; corn, rice and sorghum for the warm season. *Gardening with Grains* is a pioneering book, a companion to Arthur's *The Foodscape Revolution*.

Richly illustrated, it combines history, environmental benefits and personal stories with simple how-to's for planning, growing and harvesting 6 important grains. Includes 12 chef-tested recipes for inspiration. This is a design book, too, with planting patterns and suggestions, no matter how much or how little garden space you have. These grains are ornamental grasses, and they show off beautifully in any setting. The grouped plantings reveal the grains' varied colors and textures, interplanted with flowers like poppies, larkspur, snapdragons, nigella, zinnias, sunflowers and marigolds. Not only flowers, but salad greens and other decorative veggies play well with grains. Gardening with Grains is foodscaping for fun, beauty and bragging rights. . . and maybe even

some homemade beer and bread. (Genus illustrations and garden plans by landscape architect and botanical artist Preston Montague.)

Mesolithic Europe Routledge

Many of the environmental and social problems we face today are symptoms of a deeper systemic failing: a dominant cultural paradigm that encourages living in ways that are often directly counter to the realities of a finite planet. This paradigm, typically referred to as 'consumerism,' has already spread to cultures around the world and has led to consumption levels that are vastly unsustainable. If this pattern spreads further there will be little possibility of solving climate change or other environmental problems that are poised to dramatically disrupt human

civilization. It will take a sustained, long-term effort to redirect the traditions, social movements and institutions that shape consumer cultures towards becoming cultures of sustainability. These institutions include schools, the media, businesses and governments. Bringing about a cultural shift that makes living sustainably as 'natural' as a consumer lifestyle is today will not only address urgent crises like climate change, it could also tackle other symptoms like extreme income inequity, obesity and social isolation that are not typically seen as environmental problems. State of the World 2010 paints a picture of what this sustainability culture could look like, and how we can - and already are - making the shift. *Gardening with Grains* Cambridge

Buddhist Funeral Cultures of Southeast Asia and China Routledge
How can economics become genuinely quantitative? This is the question that French sociologist Gabriel Tarde tackled

at the end of his career, and in this pamphlet, Bruno Latour and Vincent Antonin Lépinay offer a lively introduction to the work of the forgotten genius of nineteenth-century social thought. Tarde's solution was in total contradiction to the dominant views of his time: to quantify the connections between people and goods, you need to grasp "passionate interests." In Tarde's view, capitalism is not a system of cold calculations—rather it is a constant amplification in the intensity and reach of passions. In a stunning anticipation of contemporary economic anthropology, Tarde's work defines an alternative path beyond the two illusions responsible for so much modern misery: the adepts of the Invisible Hand and the devotees of the Visible Hand will learn how to escape

the sterility of their fight and recognize the originality of a thinker for whom everything is intersubjective, hence quantifiable. At a time when the regulation of financial markets is the subject of heated debate, Latour and Lépinay provide a valuable historical perspective on the fundamental nature of capitalism.

How Canadians Communicate Island Press

"Once upon a time, veggie gardens lived in the backyard, isolated from the rest of the landscape. that's so yesterday! Welcome to a whole new world of food gardening--right up front, sharing space with your ornamental plants for year-round, knockout beauty and function...in a way that even homeowners associations (HOAs) would approve."--

Back cover.

The Return of Traditional Food Frontiers
Media SA

How Canadians Communicate, Vol. 1 is a timely collection that chronicles the extraordinary changes that are shaking the foundations of Canada's cultural and communications industries in the twenty-first century. With essays from some of Canada's foremost media scholars, this book discusses the major trends and developments that have taken place in government policy, corporate strategies, creative communities, and various communication mediums: newspapers, films, cellular and palm technology, the Internet, libraries, TV, music, and book publishing. This volume addresses many issues unique to Canada in a broader

framework of global communications. Specifically, it looks at new media communications in Aboriginal communities, the changing role of the state in cultural institutions, the conglomeratization of the media, the threat of American and global communications to Canadian voices, and the struggle to retain and reclaim local and national identities in the face of globalization. With articles from academics and professionals across Canada, How Canadians Communicate, Vol.1 provides the most current perspectives on communication in Canada in a rapidly changing world of technology and global communication. *Arts and Health Promotion* Springer Nature

It is often presumed that biblical

redaction was invariably done using scribal methods, meaning that when editors sought to modify or compile existing texts, they would do so in the process of rewriting them upon new scrolls. There is, however, substantial evidence pointing to an alternative scenario: Various sections of the Hebrew Bible appear to have been created through a process of material redaction. In some cases, ancient editors simply appended new sheets to existing scrolls. Other times, they literally cut and pasted their sources, carving out patches of text from multiple manuscripts and then gluing them together like a collage. Idan Dershowitz shows how this surprising technique left behind telltale traces in the biblical text - especially when the editors made mistakes - allowing us to

reconstruct their *modus operandi*. Material evidence from the ancient Near East and elsewhere further supports his hypothesis.

Traditional Food Knowledge: New Wine Into Old Wineskins? Crown

This book discusses a spectrum of approaches to designing the food-energy-water nexus at different spatial-urban scales. The book offers a framework for working on the FEW-nexus in a design-led context and integrates the design of urban neighbourhoods and regions with methodologies how to simultaneously engaging residents and stakeholders and evaluating the propositions in a FEW-print, measuring the environmental impact of the different designs. The examples are derived from on the ground practices in

Sydney, Tokyo, Detroit, Amsterdam and Belfast.

Mamika Univ of California Press

Frustrated by the lack of opportunities to research, create learning experiences or make a basic living within the university on our own terms, para-academics don't seek out alternative careers in the face of an evaporated future; we just continue to do what we've always done: write, research, learn, think and facilitate that process for others. As the para-academic community grows, there is a real need to build supportive networks, share knowledge, ideas and strategies that can allow these types of interventions to become sustainable and flourish. There is a very real need to create spaces of solace, action and creativity. Para-academics mimic

academic practices so they are liberated from the confines of the university. Our work, and our lives, reflect how the idea of a university as a place for knowledge production, discussion and learning, has become distorted by neo-liberal market forces. We create alternative, genuinely open access, learning-thinking-making-acting spaces on the internet, in publications, in exhibitions, discussion groups or through other mediums that seem appropriate to the situation. We don't sit back and worry about our career developments paths. We write for the love of it; we think because we have to; we do it because we care.

[Indigenous Resilience and Indigenous Knowledge Systems in the Context of Climate Change](#) LIT Verlag Münster

This book focuses on the archaeology of

the hunter-gatherer societies that inhabited Europe in the millennia between the Last Ice Age and the spread of agriculture, between 10,000 and 5,000 years ago. Traditionally viewed as a period of cultural stagnation, new data now demonstrate that this was a period of radical change and innovation. This was the period that witnessed the colonization of extensive new territory at high latitudes and high altitudes following postglacial climatic change, the development of seafaring, and the synthesis of the technological, economic, and social capabilities that underpinned the later development of agricultural and urban societies.

Dignity in the Egyptian Revolution ANU Press

This book explores the challenges facing

food security, sustainability, sovereignty, and supply chains in the Arctic, with a specific focus on Indigenous Peoples. Offering multidisciplinary insights and with a particular focus on populations in the European High North region, the book highlights the importance of accessible and sustainable traditional foods for the dietary needs of local and Indigenous Peoples. It focuses on foods and natural products that are unique to this region and considers how they play a significant role towards food security and sovereignty. The book captures the tremendous complexity facing populations here as they strive to maintain sustainable food systems - both subsistent and commercial - and regain sovereignty over traditional food production policies. A range of issues are

explored including food contamination risks, due to increasing human activities in the region, such as mining, to changing livelihoods and gender roles in the maintenance of traditional food security and sovereignty. The book also considers processing methods that combine indigenous and traditional knowledge to convert the traditional foods, that are harvested and hunted, into local foods. This book offers a broader understanding of food security and sovereignty and will be of interest to academics, scholars and policy makers working in food studies; geography and environmental studies; agricultural studies; sociology; anthropology; political science; health studies and biology.

Zero Hunger OECD Publishing

In this eloquent plea for compassion and respect for all species, journalist and gardener Nancy Lawson describes why and how to welcome wildlife to our backyards. Through engaging anecdotes and inspired advice, profiles of home gardeners throughout the country, and interviews with scientists and horticulturalists, Lawson applies the broader lessons of ecology to our own outdoor spaces. Detailed chapters address planting for wildlife by choosing native species; providing habitats that shelter baby animals, as well as birds, bees, and butterflies; creating safe zones in the garden; cohabiting with creatures often regarded as pests; letting nature be your garden designer; and encouraging natural processes and evolution in the garden. The Humane

Gardener fills a unique niche in describing simple principles for both attracting wildlife and peacefully resolving conflicts with all the creatures that share our world.

How Canadians Communicate VI

Viking Adult

A stunning guide to growing, harvesting, and arranging gorgeous dahlia blooms from celebrated farmer-florist and New York Times bestselling author Erin Benzakein, founder of Floret Flower Farm. World-renowned flower farmer and floral designer Erin Benzakein reveals all the secrets to growing, cultivating, and arranging gorgeous dahlias. These coveted floral treasures come in a dazzling range of colors, sizes, and forms, with enough variety for virtually every garden space and personal

preference, making them one of the most beloved flowers for arrangements. In these pages, readers will discover: • Expert advice for planting, harvesting, and arranging garden-fresh dahlias • A simple-to-follow overview of the dahlia classification system • An A-Z guide with photos and descriptions of more than 350 varieties • Step-by-step how-to's for designing show-stopping dahlia bouquets that elevate any occasion
Expert Author: Erin Benzakein's gorgeous flowers are celebrated throughout the world. Her book Floret Farm's A Year in Flowers was a New York Times bestseller and her first book, Floret Farm's Cut Flower Garden, won the American Horticultural Society Book Award. Filled with Wisdom: Overflowing with hundreds of lush photographs and

invaluable advice, *DISCOVERING DAHLIAS* is an essential resource for gardeners and a must-have for anyone who loves flowers, including flower lovers, avid and novice gardeners, floral designers, florists, small farmers, stylists, and designers.

A social history of the Delaware River discusses trout fishing in the Catskills, the botanists who use it as a living laboratory, eel fisherman, pollution, and more. 20,000 first printing. \$20,000 ad/promo. Tour.

Food Security in the High North
Chronicle Books

"... a diverse and stimulating group of essays that together represents a significant contribution to thinking about

the nascent field of contemporary Asian art studies ... *Contemporary Asian Art and Exhibitions: Connectivities and World-making* ... brings together essays by significant academics, curators and artist working in Australia, Asia and the United Kingdom that reflect on contemporary art in the Asia-Pacific region, and Australia's cultural interconnections with Asia. It will be a welcome addition to the body of literature related to these emergent areas of art historical study." — Dr Claire Roberts, Senior Lecturer in Art History, University of Adelaide This volume draws together essays by leading art experts observing the dramatic developments in Asian art and exhibitions in the last two decades. The authors explore new regional and global

connections and new ways of understanding contemporary Asian art in the twenty-first century. The essays coalesce around four key themes: world-making; intra-Asian regional connections; art's affective capacity in cross-cultural engagement; and Australia's cultural connections with Asia. In exploring these themes, the essays adopt a diversity of approaches and encompass art history, art theory, visual culture and museum studies, as well as curatorial and artistic practice. With introductory and concluding essays by editors Michelle Antoinette and Caroline Turner this volume features contributions from key writers on the region and on contemporary art: Patrick D Flores, John Clark, Chaitanya Sambrani, Pat HOFFIE, Charles

Merewether, Marsha Meskimmon, Francis Maravillas, Oscar Ho, Alison Carroll and Jacqueline Lo. Richly illustrated with artworks by leading contemporary Asian artists, *Contemporary Asian Art and Exhibitions: Connectivities and World-making* will be essential reading for those interested in recent developments in contemporary Asian art, including students and scholars of art history, Asian studies, museum studies, visual and cultural studies.

Risk Terrain Modeling Greenwood Publishing Group

This book presents a psychoanalysis of technoscience. Basic concepts and methods developed by Freud, Jung, Bachelard and Lacan are applied to case histories (palaeoanthropology, classical

conditioning, virology). Rather than by disinterested curiosity, technoscience is driven by desire, resistance and the will to control. Moreover, psychoanalysis focusses on primal scenes (Dubois' quest for the missing link, Pavlov's discovery of the conditioned reflex) and opts for

triangulation: comparing technoscience to "different scenes" provided by novels, so that Dubois's work is compared to missing link novels by Verne and London and Pavlov's experiments with Skinner's Walden Two, while virology is studied through the lens of viral fiction.
